Encyclopaedism from Antiquity to the Renaissance Jason König,Greg Woolf,2013-10-17 There is a rich body of encyclopaedic writing which survives from the two millennia before the Enlightenment This book sheds new light on that material It traces the development of traditions of knowledge ordering which stretched back to Pliny and Varro and others in the classical world It works with a broad concept of encyclopaedism resisting the idea that there was any clear pre modern genre of the encyclopaedia and showing instead how the rhetoric and techniques of comprehensive compilation left their mark on a surprising range of texts In the process it draws attention to both remarkable similarities and striking differences between conventions of encyclopaedic compilation in different periods with a focus primarily on European Mediterranean culture The book covers classical medieval including Byzantine and Arabic and Renaissance culture in turn and combines chapters which survey whole periods with others focused closely on individual texts as case studies

Poythress,Wayne A. Grudem,2000 Instead of letting the language change naturally as the speakers feel the need for new forms those who are pushing political correctness are trying to impose change on language from the outside The politically correct language movement attempts to speed up and control the direction of language change It is a conscious attempt to mold the language into the form that certain people think it should take rather than let it take its normal course From a theoretical linguistic point of view such an attempt would be doomed to failure if it weren t for the fact that those who are controlling the movement have managed to give us a guilty conscience on the subject We have been made to feel that somehow we are being insensitive to the feelings of various groups if we say the wrong thing and so we try to follow the dictates of the language police as Poythress and Grudem have termed them *Sexing the Body* Anne Fausto-Sterling,2020-06-30 Now updated with groundbreaking research this award winning classic examines the construction of sexual identity in biology society and history Why do some people prefer heterosexual love while others fancy the same sex Is sexual identity biologically determined or a product of convention In this brilliant and provocative book the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced Drawing on astonishing real life cases and a probing analysis of centuries of scientific research Fausto Sterling demonstrates how scientists have historically politicized the body In lively and impassioned prose she breaks down three key dualisms sex gender nature nurture and real constructed and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and as such should not be forced to compromise their differences to fit a flawed societal definition of normality *The History of the Colored Methodist Episcopal Church in*

Hawkes, 2001-10-11 Postmodern society seems incapable of elaborating an ethical critique of the market economy Early modern society showed no such reticence Between 1580 and 1680 Aristotelian teleology was replaced as the dominant mode of philosophy in England by Baconian empiricism This was a process with implications for every sphere of life for politics and theology economics and ethics

aesthetics and sexuality Through nuanced and original readings of Shakespeare Herbert Donne Milton Traherne and Bunyan David Hawkes sheds light on the antitheatrical controversy and early modern debates over idolatry and value and trade Hawkes argues that the people of Renaissance England believed that the decline of telos resulted in a reified fetishistic mode of consciousness which manifests itself in such phenomena as religious idolatry commodity fetish and carnal sensuality He suggests that the resulting early modern critique of the market economy has much to offer postmodern society
