**L'épreuve du réel à l'écran** François Niney, 2002-06-25 Depuis l'invention des frères Lumière actualis documentaires reportages nous promettent des visions toujours plus immenses plus proches plus vraies de la réalité sur le vif. Que valent ces miroirs argentiques etlectroniques des éléments que nous donnent elles voir et croire ces doublures auxquelles nous confions la toute paradoxale de nous d'montrer le monde et d'en produire la vérité? C'est l'examen de cette question la fois pistologique et esthétique que nous invite la 2e édition de cet ouvrage travers l'analyse approfondie des inventions du langage audiovisuel et des formes de représentation du réel à l'écran.

Idéal démocratique à l'épreuve de la Shoah (L') Shmuel Trigano, 1999-10

Pourquoi l'Europe qui a inventé l'idée que tous les hommes sont gaux a-t-elle aussi produit la Shoah? Pourquoi a-t-elle stigmatisé certains de ses citoyens au point de les détruire? Depuis de nombreuses années, le débat autour de la singularité de la Shoah est vif: les tenants de la mémoire sacrée s'opposent aux négationnistes de droite comme ses critiques de gauche. Derrière cette politique se cache une question plus profonde celle des fondements mêmes de la démocratie. Aujourd'hui encore, l'galit entre citoyens suffit-elle à fonder une société qui fait une place à chaque homme dans sa différence? Shmuel Trigano enseigne la sociologie de la politique et de la religion à l'université Paris X Nanterre. Auteur de nombreux ouvrages dans le domaine de la philosophie politique, de la spiritualité et de l'histoire, il a fondé le Collège des études juives de l'Alliance israélite universelle et la revue européenne d'études et de culture juives. **Bifurcations and Periodic Orbits of Vector Fields** Dana Schlomiuk, 2013-03-09

The last thirty years were a period of continuous and intense growth in the subject of dynamical systems. New concepts and techniques and at the same time new areas of applications of the theory were found. The 31st session of the Séminaire de Mathématiques Supérieures SMS held at the Université de Montréal in July 1992 was on dynamical systems having as its center theme Bifurcations and periodic orbits of vector fields. This session of the SMS was a NATO Advanced Study Institute ASI. This ASI had the purpose of acquainting the participants with some of the most recent developments and of stimulating new research around the chosen center theme. These developments include the major tools of the new resummation techniques with applications in particular to the proof of the non accumulation of limit cycles for real analytic plane vector fields. One of the aims of the ASI was to bring together methods from real and complex dynamical systems. There is a growing awareness that an interplay between real and complex methods is both useful and necessary for the solution of some of the problems. Complex techniques become powerful tools which yield valuable information when applied to the study of the dynamics of real vector fields. The recent developments show that no rigid frontiers between disciplines exist and that interesting new developments occur when ideas and techniques from diverse disciplines are married. One of the aims of the ASI was to show these multiple interactions at work.
