**Regulatory Reform--1974** United States. Congress. Senate. Committee on Government Operations,1973

*Congressional Record* United States. Congress,1974      *Civic Duty* Manon van der Heijden,2011-11-15 This study offers a new view on public services in the early modern Low Countries and answers the following questions who provided public facilities in urban communities and in which ways did public amenities change in the period between 1500 and 1800 It throws light on the ways in which responsibilities were shared between city dwellers and the factors which influenced the allocation and reallocation of public services between the sixteenth and nineteenth centuries The present study looks at those who provided various services to their communities the ways in which they were rewarded and monitored and the gain they may have sought It focuses on the situation in the Low Countries but in many respects it also describes the development of the provision of public services in most towns in early modern Western Europe The complex mixture of central and local private and public ecclesiastical and secular individual and corporate initiatives characterized to a greater or lesser extent urban communities everywhere in Western Europe Above all early modern towns were civil societies in which community services such as health care poor relief and public security were largely shaped and formed by conceptions of citizenship and collective interest      **Becoming Entitled** Abigail Trollingier,2020-09-18 In the 1930s the unemployed were organizing

Jobless workers felt they were entitled to a new kind of government protection the protection from undeserved unemployment and the financial straits that such unemployment created They wanted dignified forms of relief including work relief during the Depression and unemployment insurance after *Becoming Entitled* artfully chronicles the emergence of this worker entitlement and the people who cultivated it Abigail Trollingier focuses largely on Chicago after the Progressive Era where the settlement house and labor movements both flourished She shows how reformers joined workers and relief officials to redeem the unemployed and secure government funded social insurance for them *Becoming Entitled* also offers a critical reappraisal of New Deal social and economic changes suggesting that the transformations of the 1930s came from reformers in the middle who helped establish a limited form of entitlement for workers Ultimately Trollingier highlights the achievements made by reformers working on city and nation wide issues She captures the moment when some people shed the stigma that came with unemployment and demanded that the government do the same      *Economics of Faith* Esther Chung-Kim,2021-04-02 *Economics of Faith* examines the role of religious leaders in the development of poor relief institutions in early modern Europe As preachers policy makers advocates and community leaders these reformers offered a new interpretation of salvation and good works that provided the religious foundation for poor relief reform Although poverty was once associated with the religious image of piety reformers no longer saw it as a spiritual virtue Rather they considered social welfare reform to be an integral part of religious reform and worked to modify existing poor relief institutions or to set up new ones Population growth economic crises and migration in early modern Europe caused poverty and begging to be an

ever increasing concern and religious leaders encouraged the development and expansion of poor relief institutions This new cadre of reformers served as catalysts organizers stabilizers and consolidators of strategies to alleviate poverty the most glaring social problem of early modern society Although different roles emerged from varying relationships and negotiations with local political authorities and city councils reform minded ministers and lay leaders shaped a variety of institutions to address the problem of poverty and to promote social and communal responsibility As religious options multiplied within Christianity one's understanding of community determined the boundaries albeit contested and sometimes fluid of responsible poor relief This goal of communal care would be especially relevant for religious refugees who as foreigners and strangers became responsible for caring for their own group

Lutheran Reformation and the Law ,2022-01-04 The volume provides new evidence of how the legal ideas of the Lutheran Reformation were put into practice especially in the Nordic countries and how they worked in the history of law Denmark Finland Norway and Sweden forming the largest Lutheran area in the world this lacuna is considerable The first part of the book deals with the legal theological and philosophical thought of the reformers The second part examines the impact of the Reformation on particular aspects of legal reform especially marriage and criminal law and the law on poor relief in the Northern Europe The study is based on interdisciplinary research by theologians and legal historians Contributors include Kaarlo Arffman Pekka K rkk inen Mia Korpiola Virpi M kinen Heikki Pihlajam ki Antti Raunio Risto Saarinen and Reijo Ty rinoja

Welfare Reform in the Early Republic Seth Rockman,2014-05-23 Nothing provided

Poverty and Deviance in Early Modern Europe Robert Jütte,1994-03-31 This study provides an accessible and authoritative account of poverty and deviance during the early modern period informed by

those perspectives on the role of the poor themselves in the provision of welfare services characteristic of much recent social history Robert J. Tate shows how the notions of poverty and social deviance that preoccupied much contemporary thought saw their ultimate fruition in the systematic programmes for social welfare that emerged during the nineteenth century. Contrary to the once traditional historical emphasis on the ameliorative role of individual reformers, Professor J. Tate's account looks much more closely at the poor themselves and the complex network of social and communal relationships they inhabited. He examines the lives not only of poor relief recipients but of the vast number of destitute individuals who had to find other means to stay alive and how these people shaped their own patterns of survival within given communities. **Poor People's**

**Movements** Frances Fox Piven, Richard Cloward, 1978-12-12 Have the poor fared best by participating in conventional electoral politics or by engaging in mass defiance and disruption? The authors of the classic *Regulating the Poor* assess the successes and failures of these two strategies as they examine in this provocative study four protest movements of lower class groups in 20th century America: The mobilization of the unemployed during the Great Depression that gave rise to the Workers Alliance of America; The industrial strikes that resulted in the formation of the CIO; The Southern Civil Rights Movement; The movement of welfare recipients led by the National Welfare Rights Organization. [Quakerism, Its Legacy, and Its Relevance for Gandhian Research](#) Satish Sharma, 2017-11-06 This elaborate book explores Quakerism, its legacy and its relevance for Gandhian research. The topics covered here include the historical circumstances, conditions and thought that led to the birth of Quakerism; the seeds and history of the movement; the themes, principles and practices of the sect; and the aid, change, reform and conciliation efforts Quakers made to make people, communities and nations more tolerant, problem free and united. As such, the book will appeal to scholars, planners, policy makers and practitioners concerned with the boundaries of liberties, freedoms, pacifism, peace and justice across people, communities and nations. [Who's Afraid of Frances Fox Piven?](#) Frances Fox Piven, 2011-08-09 The sociologist and political scientist Frances Fox Piven and her late husband Richard Cloward have been famously credited by Glenn Beck with devising the Cloward Piven Strategy, a world view responsible according to Beck for everything from creating a culture of poverty and fomenting violent revolution to causing global warming and the recent financial crisis. Called an enemy of the people over the past year, Piven has been subjected to an unprecedented campaign of hatred and disinformation spearheaded by Beck. How is it that a distinguished university professor, past president of the American Sociological Association and recipient of numerous awards and accolades for her work on behalf of the poor and for American voting rights has attracted so much negative attention? For anyone who is skeptical of the World According to Beck, here is a guide to the ideas that Glenn fears most. *Who's Afraid of Frances Fox Piven?* is a concise, accessible introduction to Piven's actual thinking versus Beck's outrageous claims from her early work on welfare rights and poor people's movements, written with her late husband Richard Cloward through her influential examination of American voting habits and her most recent work on the possibilities for a new movement for progressive

reform A major corrective to right wing bombast this essential book is also a rich source of ideas and inspiration for anyone interested in progressive change

**Medicine, Government and Public Health in Philip II's Spain** Michele L. Clouse,2016-04-22 Bridging the gap between histories of medicine and political institutional histories of the early modern crown this book explores the relationship between one of the most highly bureaucratic regimes in early modern Europe Spain and crown interest in and regulation of medical practices Complementing recent histories that have emphasized the interdependent nature of governance between the crown and municipalities in sixteenth century Spain this study argues that medical policies were the result of negotiation and cooperation among the crown the towns and medical practitioners During the reign of Philip II 1556-1598 the crown provided unique opportunities for advancements in the medical field among practitioners and support for the creation and dissemination of innovative medical techniques In addition crown support for and regulation of medicine served as an important bureaucratic tool in the crown's effort to expand and solidify its authority over the distinct kingdoms and territories under Castilian authority and the municipalities within the kingdom of Castile itself The crown was not the only agent of change in the medical world however Medical policies and their successful implementation required consensus and cooperation among competing political authorities Bringing to life a cast of characters from early modern Spain from the female empiric who practiced bonesetting and surgery to the university trained Latin physician whose medical textbook standardized medical education in the universities the book will broaden the scope of medical history to include not only the development of medical theory and innovative practice but also address the complex tensions between various authorities which influenced the development and nature of medical practice and perceptions of public health in early modern Europe Juxtaposing the history of medicine with the history of early modern state building brings a unique perspective to this challenging book that reassesses the relationship between the monarch and intellectual milieu of medicine in Spain It further challenges the dominance of studies of medical regulation from France and England and illuminates a

diverse and innovative world of Spanish medical practice that has been neglected in standard histories of early modern medicine
