

About Us

The BC Bereavement Helpline (BCBH) was established as a charity in 1988 and has become a provincial leader in providing education, support and advocacy for the bereaved, their caregivers and professionals.

Although BCBH specializes in supporting those affected by traumatic loss (in particular suicide and homicide), our Helpline volunteers are here to assist anyone experiencing any form of loss.

Grief extends beyond the loss of life. It may include change in community, the end of a job, relationship, or other significant life change. Each type of loss is valid and deserves recognition and support.

It's important to recognize that there is no time limit or "right" way to grieve. The grieving process is as unique to an individual as their fingerprint.

"Grief changes shape, but it never ends."
Keanu Reeves

**Why reach out? Although grief is a natural reaction to loss, sometimes you might feel alone or as though you need additional support. By connecting with others, you may find support and comfort in your grief. Although you may feel like you are the only person feeling this pain...
YOU ARE NOT ALONE!**

contribute to the law It concludes that autonomy's status cannot be intellectually or ethically justified and that positive discrimination in favour of the other balancing principles is urgently needed in order to avoid some sinister results This book is a sustained attack on the hegemony of the idea of autonomy in medical ethics and law Charles Foster is no respecter of authority whether of university professors or of law Lords He grabs his readers by their lapels and shakes sense into them through a combination of no nonsense rhetoric and subtle argument that is difficult to resist Tony Hope Professor of Medical Ethics Oxford University This book is unlikely to be in pristine state by the time you have finished reading it Whether that is because you have thrown it in the air in celebration or thrown it across the room in frustration will depend on your perspective But this book cannot leave you cold It is a powerful polemic on the dominance of autonomy in medical law which demands a reaction Charles Foster sets out a powerful case that academic medical lawyers have elevated autonomy to a status it does not deserve in either ethical or legal terms In a highly engaging accessible account he challenges many of the views which have become orthodox within the academic community This will be a book which demands and will attract considerable debate Jonathan Herring Exeter College Oxford University This is a learned lively and thought provoking discussion of problems central to the courts approach to ethical issues in medical law What principles are involved More significantly which really underlie and inform the process of seeking justice in difficult cases Charles Foster persuasively argues and demonstrates that respect for autonomy is but one of a number of ethical principles which interact and may conflict He also addresses the sensitive issue of the extent to which thoughts and factors which go to influence legal decisions may not appear in the judgments Adrian Whitfield QC Introducing the Jake La Motta of medical ethics Foster is an academic street fighter who has bloodied his hands in the court room He provides a stinging relentless ground attack on the Goliath of medical ethics the central place of autonomy in liberal medical ethics This is now the first port of call for those who feel that medical ethics has become autonomized Julian Savulescu Uehiro Chair in Practical Ethics University of Oxford This important book offers a robust challenge to anyone whether lawyer or ethicist who sees respect for autonomy as the only game in town It argues eloquently and effectively that on the one hand despite the reverence paid to it by judges in practice the law even in the context of consent weaves together a number of moral threads of which autonomy is merely one in the pursuit of a good decision It argues on the other hand that were the day to day practice of law to be guided primarily by respect for autonomy this would be wrong Foster concludes that whilst any society that does not have laws robustly protecting autonomy is an unsafe and unhappy one so too would be a society in which too much emphasis was placed on respect for autonomy at the expense of other important moral principles This is essential reading for anyone interested in the role of autonomy and indeed of medical ethics in the law Michael Parker Professor of Bioethics University of Oxford
