Religion and Family in a Changing Society Penny Edgell, 2013-12-03 The 1950s religious boom was organized around the male breadwinner lifestyle in the burgeoning postwar suburbs But since the 1950s family life has been fundamentally reconfigured in the United States How do religion and family fit together today This book examines how religious congregations in America have responded to changes in family structure and how families participate in local religious life Based on a study of congregations and community residents in upstate New York sociologist Penny Edgell argues that while some religious groups may be nostalgic for the Ozzie and Harriet days others are changing knowing that fewer and fewer families fit this traditional pattern In order to keep members with nontraditional family arrangements within the congregation these innovators have sought to emphasize individual freedom and personal spirituality and actively to welcome single adults and those from nontraditional families Edgell shows that mothers and fathers seek involvement in congregations for different reasons Men tend to think of congregations as social support structures and to get involved as a means of participating in the lives of their children Women by contrast are more often motivated by the quest for religious experience and can adapt more readily to pluralist ideas about family structure This Edgell concludes may explain the attraction of men to more conservative congregations and women to nontraditional religious groups A Faith of Their Own Lisa Pearce, Melinda Lundguist Denton, 2011-01-07 Adding to the contributions made by Soul Searching and Souls in Transition two books which revolutionized our understanding of the religious lives of young Americans Lisa Pearce and Melinda Lundquist Denton here offer a new portrait of teenage faith Drawing on the massive National Study of Youth and Religion s telephone surveys and in depth interviews with more than 120 youth at two points in time the authors chart the spiritual trajectory of American adolescents and young adults over a period of three years Turning conventional wisdom on its head the authors find that religion is an important force in the lives of most though their involvement with religion changes over time just as teenagers themselves do Pearce and Denton weave in fascinating portraits of actual youth to give depth to mere numerical rankings of religiosity which tend to prevail in large studies One teenager might rarely attend a service yet count herself profoundly religious another might be deeply involved in a church's social world yet claim to be not like deep into the faith They provide a new set of gualitative categories Abiders Assenters Adapters Avoiders and Atheists quoting from interviews to illuminate the shading between them And with their three year study they offer a rich understanding of the dynamic nature of faith in young people s lives during a period of rapid change in biology personality and social interaction Not only do degrees of religiosity change but so does its nature whether expressed in institutional practices or personal belief By presenting a new model of religious development and change illustrated with compelling personal accounts of real teenagers Pearce and Denton offer parents scholars and religious leaders a new guide for understanding religious development in teens The SAGE Handbook of Cultural Sociology David Inglis, Anna-Mari

Keister, Darren E. Sherkat, 2014-07-10 Examines how social inequality is affected by religious beliefs and affiliation with contributions in the fields of religion and sociology Talking Prices Olav Velthuis, 2013-10-24 How do dealers price contemporary art in a world where objective criteria seem absent Talking Prices is the first book to examine this question from a sociological perspective On the basis of a wide range of gualitative and guantitative data including interviews with art dealers in New York and Amsterdam Olav Velthuis shows how contemporary art galleries juggle the contradictory logics of art and economics In doing so they rely on a highly ritualized business repertoire For instance a sharp distinction between a gallery s museumlike front space and its businesslike back space safeguards the separation of art from commerce Velthuis shows that prices far from being abstract numbers convey rich meanings to trading partners that extend well beyond the works of art A high price may indicate not only the quality of a work but also the identity of collectors who bought it before the artist s reputation was established Such meanings are far from unequivocal For some a high price may be a symbol of status for others it is a symbol of fraud Whereas sociological thought has long viewed prices as reducing gualities to guantities this pathbreaking and engagingly written book reveals the rich world behind these numerical values Art dealers distinguish different types of prices and attach moral significance to them Thus the price mechanism constitutes a symbolic system akin Seeing the World Mitchell Stevens, Cynthia Miller-Idriss, Seteney Shami, 2018-02-06 An in depth look at why to language American universities continue to favor U S focused social science research despite efforts to make scholarship more cosmopolitan U S research universities have long endeavored to be cosmopolitan places yet the disciplines of economics political science and sociology have remained stubbornly parochial Despite decades of government and philanthropic investment in international scholarship the most prestigious academic departments still favor research and expertise on the United States Why Seeing the World answers this question by examining university research centers that focus on the Middle East and related regional area studies Drawing on candid interviews with scores of top scholars and university leaders to

understand how international inquiry is perceived and valued inside the academy Seeing the World explains how intense competition for tenure line appointments encourages faculty to pursue American projects that are most likely to garner professional advancement At the same time constrained by tight budgets at home university leaders eagerly court patrons and clients worldwide but have a hard time getting departmental faculty to join the program Together these dynamics shape how scholarship about the rest of the world evolves At once a work and occupations study of scholarly disciplines an essay on the formal organization of knowledge and an inquiry into the fate of area studies Seeing the World is a must read for anyone who cares about the future of knowledge in a global era A Fraught Embrace Ann Swidler, Susan Cotts Watkins, 2017-03-07 The complex relationships between altruists beneficiaries and brokers in the global effort to fight AIDS in Africa In the wake of the AIDS pandemic legions of organizations and compassionate individuals descended on Africa from faraway places to offer their help and save lives A Fraught Embrace shows how the dreams of these altruists became entangled with complex institutional and human relationships Ann Swidler and Susan Cotts Watkins vividly describe the often mismatched expectations and fantasies of those who seek to help of the villagers who desperately seek help and of the brokers on whom both Western altruists and impoverished villagers must rely Based on years of fieldwork in the heavily AIDS affected country of Malawi this powerful book digs into the sprawling AIDS enterprise and unravels the paradoxes of AIDS policy and practice All who want to do good from idealistic volunteers to world weary development professionals depend on brokers as guides fixers and cultural translators These irreplaceable but frequently unseen local middlemen are the human connection between altruists dreams and the realities of global philanthropy The mutual misunderstandings among donors brokers and villagers each with their own desires and moral imaginations create all the drama of a romance longing exhilaration disappointment heartache and sometimes an enduring connection Personal stories public scandals and intersecting sometimes clashing fantasies bring the lofty intentions of AIDS altruism firmly down to earth Swidler and Watkins ultimately argue that altruists could accomplish more good not by seeking to transform African lives but by helping Africans achieve their own goals A Fraught Embrace unveils the tangled relations of those involved in the collective struggle to contain an epidemic The Oxford Handbook of Cultural Sociology Jeffrey C. Alexander, Ronald Jacobs, Philip Smith, 2012-01-26 Since sociologists returned to the study of culture in the past several decades a pursuit all but anathema for a generation cultural sociology has emerged as a vibrant field Edited by three leading cultural sociologists The Oxford Handbook of Cultural Sociology presents the full theoretical and methodological vitality of this critically significant new area The Handbook gathers together works by authors confronting the crucial choices all cultural sociologists face today about analytic priorities methods topics epistemologies ideologies and even modes of writing It is a vital collection of preeminent thinkers studying the ways in which culture society politics and economy interact in the world Organized by empirical areas of study rather than particular theories or competing intellectual strands the Handbook addresses power politics and states

economics and organization mass media social movements religion aesthetics knowledge and health Allowing the reader to observe tensions as well as convergences the collection displays the value of cultural sociology not as a niche discipline but as a way to view and understand the many facets of contemporary society The first of its kind The Oxford Handbook of Cultural Sociology offers comprehensive and immediate access to the real developments and disagreements taking place in the field and deftly exemplifies how cultural sociology provides a new way of seeing and modeling social facts This groundbreaking readable handbook is the first single volume to attempt to unify its diverse contemporary applications in a wide range of traditional genres of sociology Valuable for college universities and libraries supporting undergraduate and graduate degree programs in sociology and history CHOICE **Religious Education in a Multicultural Europe** Emer Smyth, Maureen Lyons, Merike Darmody, 2013-08-29 Drawing on a major EU funded research project this book examines how religious secular beliefs are formed at school and in the family across different European countries offering insights into key policy issues concerning the place of religion in the school system and illuminating current debates around religion and multiculturalism
