

RELIGION & HUMAN NATURE

KEITH WARD

Religion And Human Nature

William R. Miller, Harold D. Delaney

Religion And Human Nature:

Religion and Human Nature Keith Ward, 1998-11-19 Continuing Keith Ward's series on comparative religion this book deals with religious views of human nature and destiny. The beliefs of six major traditions are presented: the view of Advaita Vedanta that there is one Supreme Self unfolding into the illusion of individual existence; the Vaishnava belief that there is an infinite number of souls whose destiny is to be released from material embodiment; the Buddhist view that there is no eternal Self; the Abrahamic belief that persons are essentially embodied souls; and the materialistic position that persons are complex material organisms. Indian ideas of rebirth, karma, and liberation from samsara are critically analysed and compared with semitic belief in the intermediate state of Sheol, Purgatory or Paradise, the Final Judgement, and the resurrection of the body. The impact of scientific theories of cosmic and biological evolution on religious beliefs is assessed, and a form of soft emergent materialism is defended with regard to the soul. In this context a Christian doctrine of original sin and atonement is presented, stressing the idea of soteriology as opposed to forensic justice. Finally a Christian view of personal immortality and the end of all things is developed in conversation with Jewish and Muslim beliefs about judgement and resurrection. **On**

Human Nature Michel Tibayrenc, Francisco J. Ayala, 2016-09-12 *On Human Nature* Biology Psychology Ethics Politics and Religion covers the present state of knowledge on human diversity and its adaptive significance through a broad and eclectic selection of representative chapters. This transdisciplinary work brings together specialists from various fields who rarely interact, including geneticists, evolutionists, physicians, ethologists, psychoanalysts, anthropologists, sociologists, theologians, historians, linguists, and philosophers. Genomic diversity is covered in several chapters dealing with biology, including the differences in men and apes and the genetic diversity of mankind. Top specialists known for their open mind and broad knowledge have been carefully selected to cover each topic. The book is therefore at the crossroads between biology and human sciences, going beyond classical science in the Popperian sense. The book is accessible not only to specialists but also to students, professors, and the educated public. Glossaries of specialized terms and general public references help nonspecialists understand complex notions with contributions avoiding technical jargon. Provides greater understanding of diversity and population structure and history with crucial foundational knowledge needed to conduct research in a variety of fields such as genetics and disease. Includes three robust sections on biological, psychological, and ethical aspects with cross-fertilization and reciprocal references between the three sections. Contains contributions by leading experts in their respective fields working under the guidance of internationally recognized and highly respected editors. [The Varieties of](#)

[Religious Experience](#) William James, 1920

Believers: Faith in Human Nature Melvin Konner, 2019-09-10 An anthropologist examines the nature of religiosity and how it shapes and benefits humankind. *Believers* is a scientist's answer to attacks on faith by some well-meaning scientists and philosophers. It is a firm rebuke of the Four Horsemen: Richard Dawkins, Daniel Dennett, Sam Harris, and Christopher Hitchens, known for writing about religion as something irrational and

ultimately harmful Anthropologist Melvin Konner who was raised as an Orthodox Jew but has lived his adult life without such faith explores the psychology development brain science evolution and even genetics of the varied religious impulses we experience as a species Conceding that faith is not for everyone he views religious people with a sympathetic eye his own upbringing his apprenticeship in the trance dance religion of the African Bushmen and his friends and explorations in Christian Buddhist Hindu Muslim and other faiths have all shaped his perspective Faith has always manifested itself in different ways some revelatory and comforting some kind and good some ecumenical and cosmopolitan some bigoted coercive and violent But the future Konner argues will both produce more nonbelievers and incline the religious among us holding their own by having larger families to increasingly reject prejudice and aggression A colorful weave of personal stories of religious and irreligious encounters as well as new scientific research Believers shows us that religion does much good as well as undoubted harm and that for at least a large minority of humanity the belief in things unseen neither can nor should go away

Human Nature, Human Evil, and Religion Jarvis Streeter, 2009 In this book Jarvis Streeter details Ernest Becker's anthropological theories and compares them with traditional and contemporary Christian thought on human nature sin and salvation in order to see how the two approaches compare and where Becker might have insights to offer contemporary Christian thinkers Ernest Becker was a pioneer in the interdisciplinary study of human nature and motivation drawing from the fields of evolutionary biology psychology psychiatry cultural anthropology sociology philosophy and religion to create what he termed a Science of Man His goal was to understand the most basic human motives particularly those that led to evil behavior in order to ameliorate them and create a more humane world He concluded following the thought of Alfred Adler Otto Rank and philosophical and religious existentialism that the related urges to avoid death anxiety gain self esteem and symbolically deny death were the key human motives ones which were also responsible for human evil and that religion has had a complex role to play for both good and ill in human history

BOOK JACKET *Neuroscience, Psychology, and Religion* Malcolm Jeeves, Warren, Jr. Brown, 2009-03-01 Neuroscience Psychology and Religion is the second title published in the new Templeton Science and Religion Series In this volume Malcolm Jeeves and Warren S Brown provide an overview of the relationship between neuroscience psychology and religion that is academically sophisticated yet accessible to the general reader The authors introduce key terms thoroughly chart the histories of both neuroscience and psychology with a particular focus on how these disciplines have interfaced religion through the ages and explore contemporary approaches to both fields reviewing how current science religion controversies are playing out today Throughout they cover issues like consciousness morality concepts of the soul and theories of mind Their examination of topics like brain imaging research evolutionary psychology and primate studies show how recent advances in these areas can blend harmoniously with religious belief since they offer much to our understanding of humanity's place in the world Jeeves and Brown conclude their comprehensive and inclusive survey by providing an interdisciplinary model for shaping the ongoing dialogue Sure to be of

interest to both academics and curious intellectuals Neuroscience Psychology and Religion addresses important age old questions and demonstrates how modern scientific techniques can provide a much more nuanced range of potential answers to those questions Psychology, Religion, and Spirituality Fraser Watts,2017-03-06 This book gives an up to date overview

and evaluation of what psychology tells us about religious beliefs practices and experiences **Nature, Human Nature, and God** Ian G. Barbour, Ian Barbour offers analyses of the shape and import of evolutionary theory indeterminacy neuroscience information theory and artificial intelligence He also addresses deeper philosophical issues and the idea of nature itself Then Barbour advances to the interconnected religious questions at the core of contemporary debate Are humans free Does religion itself evolve Are we immortal Is God omnipotent How does God act in nature Barbour s work offers hope that newer religious insights and imperatives occasioned by deep interaction with science can address the environmental and global challenges posed by the relentless advance of science *Encyclopedia of Religion and Nature*

Bron Taylor,2008-06-10 The Encyclopedia of Religion and Nature originally published in 2005 is a landmark work in the burgeoning field of religion and nature It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style Widely praised by reviewers and the recipient of two reference work awards since its publication see www.religionandnature.com ern this new more affordable version is a must have book for anyone interested in the manifold and fascinating links between religion and nature in all their many senses **Judeo-Christian**

Perspectives on Psychology William R. Miller,Harold D. Delaney,2005 This volume is the result and final report of a scholarly process initiated by the Pew Charitable Trusts Pew issued a challenge to eight academic disciplines Assemble a panel of senior scholars to identify the dominant models within your discipline comparing and contrasting them with historic Christian perspectives regarding human nature The identified disciplines were economics history law literature philosophy political science psychology and sociology In this volume the chapters deal primarily with the Jewish and Christian perspectives of these and subsequent matters Each chapter has also benefited from critique by at least 16 senior colleagues across four rounds of review It is the hope of the editors that this text will help stimulate an increasing dialogue between psychology and faith perspectives in the decades to come Introd PsycINFO Database Record c 2005 APA all rights reserved

The Laws of Human Nature Robert Greene,2018-10-23 From the 1 New York Times bestselling author of The 48 Laws of Power comes the definitive new book on decoding the behavior of the people around you Robert Greene is a master guide for millions of readers distilling ancient wisdom and philosophy into essential texts for seekers of power understanding and mastery Now he turns to the most important subject of all understanding people s drives and motivations even when they are unconscious of them themselves We are social animals Our very lives depend on our relationships with people Knowing why people do what they do is the most important tool we can possess without which our other talents can only take us so far Drawing from the ideas and examples of Pericles Queen Elizabeth I Martin Luther King Jr and many others Greene teaches

us how to detach ourselves from our own emotions and master self control how to develop the empathy that leads to insight how to look behind people s masks and how to resist conformity to develop your singular sense of purpose Whether at work in relationships or in shaping the world around you The Laws of Human Nature offers brilliant tactics for success self improvement and self defense

Human Nature Malcolm Jeeves,2006-04 Malcolm Jeeves former editor in chief of Neuropsychologia a leading international scientific journal in behavioral and cognitive neuroscience explores the intersection of science and faith in defining what it means to be human He reports on recent scientific research on consciousness and the link between mind brain and behavior He examines issues such as determinism by indicating the possible relevance of chaos theory to enduring concerns about freedom and responsibility He looks at similarities and differences between human nature and animal nature He reexamines traditional dualist views of soul and body in the light of contemporary research on mind and brain and argues for a wholistic model This leads to addressing questions such as does spiritual awareness depend on the intactness of our brains or does spirituality stand apart from our biological substrate

Why We Believe Agustin Fuentes,2019-09-24 A wide ranging argument by a renowned anthropologist that the capacity to believe is what makes us human Why are so many humans religious Why do we daydream imagine and hope Philosophers theologians social scientists and historians have offered explanations for centuries but their accounts often ignore or even avoid human evolution Evolutionary scientists answer with proposals for why ritual religion and faith make sense as adaptations to past challenges or as by products of our hyper complex cognitive capacities But what if the focus on religion is too narrow Renowned anthropologist Agust n Fuentes argues that the capacity to be religious is actually a small part of a larger and deeper human capacity to believe Why believe in religion economies love A fascinating intervention into some of the most common misconceptions about human nature this book employs evolutionary neurobiological and anthropological evidence to argue that belief the ability to commit passionately and wholeheartedly to an idea is central to the human way of being in the world

Religion in Human Evolution Robert N. Bellah,2017-05-08 This ambitious book probes our biological past to discover the kinds of lives that human beings have imagined were worth living Bellah s theory goes deep into cultural and genetic evolution to identify a range of capacities communal dancing storytelling theorizing whose emergence made religious development possible in the first millennium BCE

God Reza Aslan,2017-11-07 NEW YORK TIMES BESTSELLER The author of Zealot explores humanity s quest to make sense of the divine in this concise and fascinating history of our understanding of God In Zealot Reza Aslan replaced the staid well worn portrayal of Jesus of Nazareth with a startling new image of the man in all his contradictions In his new book Aslan takes on a subject even more immense God writ large In layered prose and with thoughtful accessible scholarship Aslan narrates the history of religion as a remarkably cohesive attempt to understand the divine by giving it human traits and emotions According to Aslan this innate desire to humanize God is hardwired in our brains making it a central feature of nearly every religious tradition As Aslan writes Whether we are

aware of it or not and regardless of whether we are believers or not what the vast majority of us think about when we think about God is a divine version of ourselves But this projection is not without consequences We bestow upon God not just all that is good in human nature our compassion our thirst for justice but all that is bad in it our greed our bigotry our penchant for violence All these qualities inform our religions cultures and governments More than just a history of our understanding of God this book is an attempt to get to the root of this humanizing impulse in order to develop a more universal spirituality Whether you believe in one God many gods or no god at all God A Human History will challenge the way you think about the divine and its role in our everyday lives Praise for God Timely riveting enlightening and necessary HuffPost Tantalizing Driven by Reza Aslan's grace and curiosity God helps us pan out from our troubled times while asking us to consider a more expansive view of the divine in contemporary life The Seattle Times A fascinating exploration of the interaction of our humanity and God Pittsburgh Post Gazette Aslan's slim yet ambitious book is the story of how humans have created God with a capital G and it's thoroughly mind blowing Los Angeles Review of Books Aslan is a born storyteller and there is much to enjoy in this intelligent survey San Francisco Chronicle Religion and Human Enhancement Tracy J. Trothen, Calvin Mercer, 2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics **God, Human Nature and Education for Peace** Karl Ernst Nipkow, 2018-01-18 This title was first published in 2003 What prevents the human species from finally learning the lessons of social justice and global peace in an unreconciled world Are Christians better off Presenting new challenges to moral and religious education this book clarifies the true image of the biblical God around the topics of justice and reconciliation Rejuvenating interpretations of the most outstanding traditions of the Old and New Testament Karl Ernst Nipkow's approach of elementarization well known in German speaking countries is introduced for the first time in the English language Theological perspectives are confronted with data from evolutionary ethics and social psychology through practice based examples of the roots of aggression violence xenophobia and ethno centrism The analysis ends with peace and spirituality in the light of different faiths This book presents a striking blend of theology education and the social sciences to explore central issues in moral and religious education **Soul Searching** Nicholas Humphrey, 1995 Why do newspapers carry horoscopes How many people believe in telepathy Surveys show that more and more people believe in paranormal religion This study outlines the battle between material and spiritual versions of the cosmos to explain why we cling to powers and plans greater than our own It throws out a challenge to all mystical attitudes questioning the existence of a soul separate

from the body **The Perfectibility of Human Nature in Eastern and Western Thought** Harold Coward, 2012-02-01
How perfectible is human nature as understood in Eastern and Western philosophy psychology and religion Harold Coward examines some of the very different answers to this question He poses that in Western thought including philosophy psychology Judaism Christianity and Islam human nature is often understood as finite flawed and not perfectible in religion requiring God's grace and the afterlife to reach the goal By contrast Eastern thought arising in India frequently sees human nature to be perfectible and presumes that we will be reborn until we realize the goal the various yoga psychologies philosophies and religions of Hinduism and Buddhism being the paths by which one may perfect oneself and realize release from rebirth Coward uses the striking differences in the assessment of how perfectible human nature is as the comparative focus for this book The Good Book of Human Nature Carel van Schaik, Kai Michel, 2016-05-24 In The Good Book of Human Nature evolutionary anthropologist Carel van Schaik and historian Kai Michel advance a new view of Homo sapiens cultural evolution The Bible they argue was written to make sense of the single greatest change in history the transition from egalitarian hunter gatherer to agricultural societies Religion arose as a strategy to cope with the unprecedented levels of epidemic disease violence inequality and injustice that confronted us when we abandoned the bush and which still confront us today Amazon com
