Religion And Culture An Introduction To Anthropology Of Religion:

Introducing Anthropology of Religion Jack David Eller, 2007-08-07 This lively and readable survey introduces students to key areas of the field and shows how to apply an anthropological approach to the study of contemporary world religions. Written by an experienced teacher it covers all of the traditional topics of anthropology of religion including definitions and theories, beliefs, symbols and language and ritual and myth and combines analytic and conceptual discussion with up to date ethnography and theory. Eller includes copious examples from religions around the world both familiar and unfamiliar and two mini case studies in each chapter. He also explores classic and contemporary anthropological contributions to important but often overlooked issues such as violence and fundamentalism, morality, secularization, religion in America and new religious movements. Introducing Anthropology of Religion demonstrates that anthropology is both relevant and essential for understanding the world we inhabit today.

Religion and Culture Annemarie De Waal Malefijt, 1989 This book tries to answer the question can anthropology significantly contribute to a further understanding of religion by giving a broad treatment of the subject by taking into account a much greater span of time than is usually examined in anthropological books dealing with religion.

Anthropology of Religion: The Basics James S Bielo, 2015-04-10 Anthropology of Religion The Basics is an accessible and engaging introductory text organized around key issues that all anthropologists of religion face. This book uses a wide range of historical and ethnographic examples to address not only what is studied by anthropologists of religion but how such studies are approached. It addresses questions such as How do human agents interact with gods and spirits? What is the nature of doing religious ethnography? Can the immaterial be embodied in the body, language and material objects? What is the role of ritual time and place in religion? Why is charisma important for religious movements? How do global processes interact with religions? With international case studies from a range of religious traditions, suggestions for further reading and inventive reflection boxes. Anthropology of Religion The Basics is an essential read for students approaching the subject for the first time.

Religion and Culture Annemarie de Waal Malefijt, 1968 A comprehensive anthropological study of religion traces the history of the discipline, discusses the archeological discoveries that have shed light on the development of religious consciousness and examines the various manifestations, functions and changes of religious customs and beliefs.

Religion and Anthropology Brian Morris, 2006 This important textbook provides a critical introduction to the social anthropology of religion, focusing on more recent classical ethnographies. Comprehensive, free of scholastic jargon, engaging and comparative in approach, it covers all the major religious traditions that have been studied concretely by anthropologists: Shamanism, Buddhism, Islam, Hinduism, Christianity and its relation to African and Melanesian religions, and contemporary Neopaganism. Eschewing a thematic approach and treating religion as a social institution and not simply as an ideology or symbolic system, the book follows the dual heritage of social anthropology in combining an interpretative understanding and sociological analysis. The book will appeal to all students of anthropology.

whether established scholars or initiates to the discipline as well as to students of the social sciences and religious studies and for all those interested in comparative religion *Religions of the World* Lawrence Sullivan, 2012-10 Watch Lawrence Sullivan discuss his new book *Religions of the World* This new survey text for comparative religion authored and edited by Lawrence Sullivan successfully marries traditional approaches with analysis drawn from anthropology and sociology to explain the making of meaning in leading religious traditions Sacred space ritual performance sacred texts historical overviews and phenomenological insights are all examined in this full color text to show the rich diversity of religious belief and practice Distinctive in this volume are separate chapters on the diversity of Christianity across the globe Features include numerous photographs of art and artifacts maps timelines tables textboxes pedagogy and a glossary

Conceptualizing Religion Benson Saler, 1993 How might we transform a folk category in this case religion into an analytical category suitable for cross cultural research In addressing that question this book critically explores various approaches to the problem of conceptualizing religion for scholarly purposes particularly with respect to certain disciplinary interests of anthropologists The author argues that the most plausible analytical strategy can be based on the idea of family resemblances especially as that idea has been used and developed in contemporary prototype theory In the solution proposed religion is conceptualized as an affair of more or less rather than a matter of yes or no and no sharp line is drawn between religion and non religion
