**Climate Politics and the Power of Religion** Evan Berry, 2022-05-17 How does our faith affect how we think about and respond to climate change Climate Politics and the Power of Religion is an edited collection that explores the diverse ways that religion shapes climate politics at the local national and international levels Drawing on case studies from across the globe it stands at the intersection of religious studies environment policy and global politics From small island nations confronting sea level rise and intensifying tropical storms to high elevation communities in the Andes and Himalayas wrestling with accelerating glacial melt there is tremendous variation in the ways that societies draw on religion to understand and contend with climate change Climate Politics and the Power of Religion offers 10 timely case studies that demonstrate how different communities render climate change within their own moral vocabularies and how such moral claims find purchase in activism and public debates about climate policy Whether it be Hindutva policymakers in India curanderos in Peru or working class people s concerns about the transgressions of petroleum extraction in Trinidad religion affects how they all are making sense of and responding to this escalating global catastrophe

**Religion, Language, and Power** Nile Green, Mary Searle-Chatterjee, 2008-07-15 Religion Language and Power shows that the language of religion is far from neutral and that the packaging and naming of what English speakers call religious groups or identities is imbued with the play of power Religious Studies has all too often served to amplify voices from other centers of power whether scripturalist or otherwise normative and dominant This book s de centering of English classifications goes beyond the remit of most postcolonial studies in that it explores the classifications used in a range of languages including Arabic Sanskrit Chinese Greek and English to achieve a comparative survey of the roles of language and power in the making of religion In contextualizing these uses of language the ten contributors explore how labels are either imposed or emerge interactively through discursive struggles between dominant and marginal groups In dealing with the interplay of religion language and power there is no other book with the breadth of this volume

*Faith in Black Power* Kerry Pimlott, 2017-01-20 In 1969 nineteen year old Robert Hunt was found dead in the Cairo Illinois police station The white authorities ruled the death a suicide but many members of the African American community believed that Hunt had been murdered a sentiment that sparked rebellions and protests across the city Cairo suddenly emerged as an important battleground for black survival in America and became a focus for many civil rights groups including the NAACP The United Front a black power organization founded and led by Reverend Charles Koen also mobilized thanks in large part

to the support of local Christian congregations In this vital reassessment of the impact of religion on the black power movement Kerry Pimblott presents a nuanced discussion of the ways in which black churches supported and shaped the United Front She deftly challenges conventional narratives of the de Christianization of the movement revealing that Cairoites embraced both old time religion and revolutionary thought Not only did the faithful fund the mass direct action strategies of the United Front but activists also engaged the literature on black theology invited theologians to speak at their rallies and sent potential leaders to train at seminaries Pimblott also investigates the impact of female leaders on the organization and their influence on young activists offering new perspectives on the hypermasculine image of black power Based on extensive primary research this groundbreaking book contributes to and complicates the history of the black freedom struggle in America It not only adds a new element to the study of African American religion but also illuminates the relationship between black churches and black politics during this tumultuous era

Religion, Power, Politics Konrad Raiser, 2013 The expectations that economic leaders and politicians have of religions and their leaders as guardians of the moral and ethical traditions of humanity and of their ability to mediate in the current situations of conflict requires religions and not least Christian churches to engage in critical self reflection about their action in the public space Konrad Raiser Religion pervades today s headlines yet not always in a positive way Is there a positive role for religion in the future Focusing on the global picture and on all religions not the least Christianity in this book author Konrad Raiser closely probes the relationship between religion and politics in all its rich promising and sometimes deadly combinations As a Christian theologian with decades of international and interreligious experience Raiser s enlightening book wrestles with the most contentious questions posed by the ambiguous status of religion in a post secular world the advent of a global economic order that leaves whole regions behind the rise of fundamentalism in religious traditions religion and violence religiously motivated terrorism Anchored in fundamental considerations about how religion and politics relate to each other in both practice and in theory Raiser searches for a positive cultural role for religion in today s emerging global culture and in the path to peace and justice

**Religion, Identity and Power** Ahmet Erdi Ozturk, 2021-01-05 This book examines Turkey s ethno religious activism and power related political strategies in the Balkans between 2002 and 2020 the period under the rule of the Justice and Development Party AKP to determine the scopes of its activities in the region Ahmet Erdi zt rk illuminates an often neglected aspect of Turkey s relations with its Balkan neighbours that emerged as a result of the much discussed authoritarian turn a broader shift in Turkish domestic and foreign policy from a realist secular to a Sunni Islamic orientation with ethno nationalist policies zt rk draws on personal testimonies given by both Turkish and non Turkish Muslim and non Muslim interviewees in three country

cases Bulgaria North Macedonia and Albania The findings shed light on contemporary issues surrounding the continuous redefinition of Turkish secularism under the AKP rule and the emergence of a new Muslim elite in Turkey

**Catholics and Politics** Kristin E. Heyer, Mark J. Rozell, Michael A. Genovese, 2008-10-29 Catholic political identity and engagement defy categorization The complexities of political realities and the human nature of such institutions as church and government often produce a more fractured reality than the pure unity depicted in doctrine Yet in 2003 under the leadership of then prefect Joseph Cardinal Ratzinger now Pope Benedict XVI the Congregation for the Doctrine of the Faith issued a Doctrinal Note on Some Questions Regarding the Participation of Catholics in Political Life The note explicitly asserts The Christian faith is an integral unity and thus it is incoherent to isolate some particular element to the detriment of the whole of Catholic doctrine A political commitment to a single isolated aspect of the Church's social doctrine does not exhaust one's responsibility toward the common good Catholics and Politics takes up the political and theological significance of this integral unity the universal scope of Catholic concern that can make for strange political bedfellows confound predictable voting patterns and leave the church poised to critique narrowly partisan agendas across the spectrum Catholics and Politics depicts the ambivalent character of Catholics mainstream arrival in the U S over the past forty years integrating social scientific historical and moral accounts of persistent tensions between faith and power Divided into four parts Catholic Leaders in U S Politics The Catholic Public Catholics and the Federal Government and International Policy and the Vatican it describes the implications of Catholic universalism for voting patterns international policymaking and partisan alliances The book reveals complex intersections of Catholicism and politics and the new opportunities for influence and risks of cooptation of political power produced by these shifts Contributors include political scientists ethicists and theologians The book will be of interest to scholars in political science religious studies and Christian ethics and all lay Catholics interested in gaining a deeper understanding of the tensions that can exist between church doctrine and partisan politics

*Genealogies of Religion* Talal Asad, 1993-08-18 In *Genealogies of Religion* Talal Asad explores how religion as a historical category emerged in the West and has come to be applied as a universal concept The idea that religion has undergone a radical change since the Christian Reformation from totalitarian and socially repressive to private and relatively benign is a familiar part of the story of secularization It is often invoked to explain and justify the liberal politics and world view of modernity And it leads to the view that politicized religions threaten both reason and liberty Asad's essays explore and question all these assumptions He argues that religion is a construction of European modernity a construction that authorizes for Westerners and non Westerners alike particular forms of history making

*Religion and Power* Professor David Martin, 2014-08-28 In this book David Martin argues against Juergen Habermas that religion and politics share a common mythic basis and that it is misleading to contrast the rationality of politics with the irrationality of religion In contrast to Richard Dawkins and New Atheists generally Martin argues that the approach taken is brazenly unscientific and that the proclivity to violence is a

shared feature of religion nationalism and political ideology alike rooted in the demands of power and social solidarity

*Religion and Power in Europe* Joaquim Carvalho, 2007      **Meta-Religion** James W. Laine, 2015-01-03 Whereas many textbooks treat the subject of world religions in an apolitical way as if each religion were a path for individuals seeking wisdom and not a discourse intimately connected with the exercise of power James W Laine treats religion and politics as halves of the same whole tracing their relationship from the policies of Alexander the Great to the ideologies of modern Europe secularists with stops in classical India China and the Islamic world Meta Religion is a groundbreaking text that brings power and politics to the fore of our understanding of world religions placing religion at the center of world history This synthetic approach is both transformative and enlightening as it presents a powerful model for thinking differently about what religion is and how it functions in the world With images and maps to bring the narrative to life Meta Religion combines sophisticated scholarly critique with accessibility that students and scholar alike will appreciate      *Patterns of Power* David Chidester, 1988      *Religion and Power* Nicole Maria Brisch, 2008 This volume represents a collection of contributions presented during the Third Annual University of Chicago Oriental Institute Seminar Religion and Power Divine Kingship in the Ancient World and Beyond held at the Oriental Institute February 23 24 2007 The purpose of this conference was to examine more closely concepts of kingship in various regions of the world and in different time periods The study of kingship goes back to the roots of fields such as anthropology and religious studies as well as Assyriology and Near Eastern archaeology More recently several conferences have been held on kingship drawing on cross cultural comparisons Yet the question of the divinity of the king as god has never before been examined within the framework of a cross cultural and multi disciplinary conference Some of the recent anthropological literature on kingship relegates this question of kings who deified themselves to the background or voices serious misgivings about the usefulness of the distinction between divine and sacred kings Several contributors to this volume have pointed out the Western Judeo Christian background of our categories of the human and the divine However rather than abandoning the term divine kingship because of its loaded history it is more productive to examine the concept of divine kingship more closely from a new perspective in order to modify our understanding of this term and the phenomena associated with it      *Religion and Empire* Richard A. Horsley, 2003 Horsley brings his skills to bear on the questions concerning religious rhetoric and empire building How do the teachings of Jesus affect our understanding of the uses of power How can we understand the invocation of God in modern political rhetoric These questions and more are explored      **Power Religion** Michael Scott Horton, 1992 What happens when the church starts to rely on the world's method of living instead of God's specified plan Those concerned with the many liberal changes occurring in the evangelical church will be intrigued and awakened by this challenging book Fifteen theologians and Bible scholars explore how sociology in the form of the church growth movement has taken the place of revival and reform      **The Meek and the Militant** Paul N. Siegel, 1986 Everyone knows that Marx wrote religion is the opium of the people but all too

frequently this aphorism is regarded as exhausting what he and Engels had to say on the subject In fact they presented a penetrating critique of religion that explains its origin and persistence from the preface This classic volume sheds much needed light on a topic of renewed interest the impact of religion on politics whether Islam in the Middle East or right wing Christian fundamentalism in North America Paul Siegel 1916 2004 a writer and activist published numerous books on literature and politics including Shakespeare in His Time and Ours 1968      *Religion, Power and Violence* Ram Puniyani,2005-07-21 In Indian context      Religion and Power Professor David Martin,2014-08-28 In this book David Martin argues against Juergen Habermas that religion and politics share a common mythic basis and that it is misleading to contrast the rationality of politics with the irrationality of religion In contrast to Richard Dawkins and New Atheists generally Martin argues that the approach taken is brazenly unscientific and that the proclivity to violence is a shared feature of religion nationalism and political ideology alike rooted in the demands of power and social solidarity
