Religion Nationalism In Soviet East European Politics:

Religion and Nationalism in Soviet and East European Politics Sabrina P. Ramet, 1989 Religious organizations in many countries of the communist world have served as agents for the preservation defense and reinforcement of nationalist feelings and in playing this role have frequently been a source of frustration to the Communist Party elites Although the relationship between governments and religious groups varies according to the particular country and group in question the mosaic of these relationships constitutes a revealing picture of the political reform shaping the lives of Soviet and East European citizens Religion and Politics in Contemporary Russia Tobias Köllner, 2020-12-13 Based on extensive original research at the local level this book explores the relationship between Russian Orthodoxy and politics in contemporary Russia It reveals close personal links between politicians at the local regional and national levels and their counterparts at the equivalent level in the Russian Orthodox Church priests and monks bishops and archbishops who are extensively consulted about political decisions It outlines a convergence of conservative ideology between politicians and clerics and also highlights that despite working closely together there are nevertheless many tensions The book examines in detail particular areas of cooperation and tension reform to religious education and a growing emphasis on traditional moral values the restitution of former church property and the introduction of new festive days Overall the book concludes that there is much uncertainty ambiguity and great local variation *Religion, Politics and Nation-Building in Post-Communist Countries* Greg Simons, David Westerlund, 2016-03-03 The increasing significance and visibility of relationships between religion and public arenas and institutions following the fall of communism in Europe provide the core focus of this fascinating book Leading international scholars consider the religious and political role of Christian Orthodoxy in the Russian Federation Romania Georgia and Ukraine alongside the revival of old indigenous religions often referred to as shamanistic and look at how despite Islam's long history and many adherents in the south Islamophobic attitudes have increasingly been added to traditional anti Semitic anti Western or anti liberal elements of Russian nationalism Contrasts between the church's position in the post communist nation building process of secular Estonia with its role in predominantly Catholic Poland are also explored *Religion Politics and Nation Building in Post Communist Countries* gives a broad overview of the political importance of religion in the Post Soviet space but its interest and relevance extends far beyond the geographical focus providing examples of the challenges in the spheres of public religious and social policy for all transitional countries **East European Nationalism, Politics and Religion** Peter F. Sugar, 2024-10-28 The multi national region of Europe situated between the German speaking lands and those of the former Soviet Union has witnessed many varied manifestations of nationalism over the last two centuries Professor Sugar has been in the forefront of those seeking to understand and explain these Eastern European nationalisms and eleven of his essays on the subject are included in this second selection of his studies The first two essays deal with problems of ethnicity and its specific manifestations in the region the next three

present the growth of national antagonisms during the 19th century The third and longest section then sets out to examine the interaction of fully developed nationalism in Eastern Europe with the various political movements and religious organizations that impacted upon these lands

Post-Soviet Political Order Barnett Rubin, Jack Snyder, 2002-11-01 Post Soviet Political Order asks what is shaping the institutional pattern of the post Soviet political order what the new order will be like what patterns of conflict are emerging and what can be done about stabilising the region In considering these questions the contributors converge on four common themes the institutional legacy of empire the social processes unleashed by imperial collapse patterns of bargaining within and between states to resolve conflicts arising out of the imperial collapse the impact of the wider international setting on the pattern of post imperial politics Focusing on the former Soviet Union and Eastern European countries the contributors show how strong state institutions are essential if conflict and political instability are to be avoided

Modes of Religiosity in Eastern Christianity Vlad Naumescu, 2007 This volume offers original insights into the religious transformations taking place in postsocialist western Ukraine Applying a cognitive theory based on two modes of religiosity the doctrinal and the imagistic author Vlad Naumescu reveals the mechanisms of reproduction and change that make the local eastern Christian tradition a living tradition of faith He combines rich ethnographic materials with historical and theological sources to depict a religion in equilibrium between the two modes maintaining revelation at the core of its doctrinal corpus He argues that religion is a potential source for social change that empowers people to act upon reality and transform it With his innovative exploration of the dynamics of an eastern Christian tradition Naumescu makes a major contribution to the emerging anthropology of Christianity as well as to studies of postsocialism

Soviet and Kosher Anna Shternshis, 2006-05-21 Kosher pork an oxymoron Anna Shternshis s fascinating study traces the creation of a Soviet Jewish identity that disassociated Jewishness from Judaism The cultural transformation of Soviet Jews between 1917 and 1941 was one of the most ambitious experiments in social engineering of the past century During this period Russian Jews went from relative isolation to being highly integrated into the new Soviet culture and society while retaining a strong ethnic and cultural identity This identity took shape during the 1920s and 1930s when the government attempted to create a new Jewish culture national in form and socialist in content Soviet and Kosher is the first study of key Yiddish documents that brought these Soviet messages to Jews notably the Red Haggadah a Soviet parody of the traditional Passover manual songs about Lenin and Stalin scripts from regional theaters Socialist Realist fiction and magazines for children and adults More than 200 interviews conducted by the author in Russia Germany and the United States testify to the reception of these cultural products and provide a unique portrait of the cultural life of the average Soviet Jew

Islam and Colonialism Will Myer, 2003-08-27 Tracing the development of western thought about Central Asia this book argues that for historical and political reasons Central Asia was seen as being in a colonial relationship with Russia Consequently an anti colonial revolution in Asia was seen as the greatest threat to the USSR The book questions the

suitability of the colonial model for understanding the region's recent political history and challenges many of the assumptions which underlay the adoption of such a model and examines how this one interpretation came to dominate western discourse to the virtual exclusion of all others

The Bosnian Muslims Francine Friedman, 2018-10-08 Although their plight now dominates television news worldwide the Bosnian Muslims were until recently virtually unknown outside of Yugoslavia This meticulously researched comprehensive book traces the turbulent history of the Bosnian Muslims and shows how their mixed secular and religious identity has shaped the conflict in which they are now so tragically embroiled Although their plight now dominates television news worldwide the Bosnian Muslims were until recently virtually unknown outside of Yugoslavia Who are these people Why are they the focus of their former neighbors' rage What role did they play in Yugoslavia before they became the victims of ethnic cleansing Why has Bosnia Hercegovina once a model of ethnic tolerance and multicultural harmony suddenly exploded into ethnic violence Focusing on these questions Friedman provides a comprehensive study of this national group whose plight has riveted governments the press and the public alike With a name reflecting both their religious and their national identity the Bosnian Muslims are unique in Europe as indigenous Slavic Muslims Descendants of schismatic Christians from the Middle Ages they converted to Islam after the Ottoman conquest of Bosnia The book follows them as they went from victims of crusades during the Middle Ages to members of the ruling elite within the Ottoman Empire from rulers back to subjects under Austria Hungary and later subjects again this time under the Serbs in the interwar Yugoslav Kingdom and the Communists after World War II The Bosnian Muslims have survived through it all even thriving during certain periods most notably when they were recognized by Tito as a nation Meticulously tracing their turbulent history and assessing the issues surrounding Bosnian Muslim nationhood in Yugoslavia Friedman shows us how the mixed secular and religious identity of the Bosnian Muslims has shaped the conflict in which they are now so tragically embroiled

Religious Nationalism in Modern Europe Philip W. Barker, 2008-08-20 This volume examines the enduring nature of religious nationalism in modern Europe Through a series of in depth case studies covering Ireland England Poland and Greece the author argues that religious frontiers or geographic lines of division between different and unique religions are central to the formation of religiously based national identities Typically as states develop economically and politically religion plays a lesser role in both individual lives and national identity However at religious frontiers religion becomes useful for differentiating and mobilizing groups of people This is particularly true when the religious frontier also represents a threat or conflict Although religion may not be the root of conflict in these instances the conflict takes on religious tones because of its ability to unite an otherwise diverse population Religion takes precedence over language culture or other national building blocks because the other can best be distinguished in religious terms The in depth case studies allow for a deep historical understanding of the processes which converge to create a modern religious nation Greatly expanding our current understanding of the conditions in which religious nationalism develops this important book has

implications for our understanding of religion and politics secularization European politics and foreign policy *Political Transformation and Changing Identities in Central and Eastern Europe* Andrew M. Blasko, Diana Januauškiene, 2008

Conversion After Socialism Mathijs Pelkmans, 2009-11-01 The large and sudden influx of missionaries into the former Soviet Union after seventy years of militant secularism has been controversial and the widespread occurrence of conversion has led to anxiety about social and national disintegration Although these concerns have been vigorously discussed in national arenas social scientists have remained remarkably silent about the subject This volume's focus on conversion offers a novel approach to the dislocations of the postsocialist experience In eight well researched ethnographic accounts the authors analyze a range of missionary encounters as well as aspects of conversion and anti conversion in different parts of the region thus challenging the problematic idea that religious life after socialism involved a simple revival of repressed religious traditions Instead they unravel the unexpected twists and turns of religious dynamics and the processes that have challenged popular ideas about religion and culture The contributions show how conversion is rooted in the disruptive qualities of the new capitalist experience and document its unsettling effects on the individual and social level The Catholic Church in Polish History Sabrina P. Ramet, 2017-06-22 The book chronicles the evolution of the church's political power throughout Poland's unique history Beginning in the tenth century the study first details how Catholicism overcame early challenges in Poland from converting the early polytheists to pushing back the Protestant Reformation half a millennium later It continues into the dawn of the modern age including the division of Poland between Prussia Russia and Austria between 1772 and 1795 the interwar years the National Socialist occupation of World War Two and the communist and post war communist eras during which The Church only half correctly presented itself as a steadfast protector of Poles with clergy members who either stood up to foreign authorities or collaborated with those same Nazi and Communist leaders This study ends with a consideration of how the Church has taken advantage of the fall of communism to push its own social agenda at times against the wishes of most Poles **Armenia** Robert Krikorian, Joseph Masih, 2013-10-11 Since the collapse of the Soviet Union Armenia has remained on the brink of becoming an economic crossroads or an isolated backwater a democratic or authoritarian state a peaceful and prosperous country or a nation on the brink of conflict Armenia's difficult independence is intricately linked with her transcaucasian neighbours and whichever path she follows they will undoubtedly be affected Armenia At the Crossroads considers Armenia as a nation and as a state and puts her tragic history into the context of current events since independence **A Twentieth-Century Crusade** Giuliana Chamedes, 2019-06-17 Giuliana Chamedes offers the first comprehensive history of the Vatican's efforts to defeat the forces of secular liberalism and communism through international law cultural diplomacy and a marriage of convenience with authoritarian and right wing rulers **Censorship** Derek Jones, 2001-12-01 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **The Formation of the Uzbek Nation-state** Anita Sengupta, 2003-01-01 The Formation of the Uzbek

Nation State is a detailed and insightful examination of the process of nation state formation in the Central Asian region in the post October revolution period based on a case study of Uzbekistan Author Anita Sengupta examines the role of language and religion in the formation of the Uzbek nation state and demonstrates the continuous transition involved in such a process

Art, Religion and Resistance in (Post-)Communist Romania Maria Alina Asavei, 2020-10-22 This book illuminates the interconnections between politics and religion through the lens of artistic production exploring how art inspired by religion functioned as a form of resistance directed against both Romanian national communism 1960 1989 and latterly consumerist society and its global market It investigates the critical tactical and subversive employments of religious motifs and themes in contemporary art pieces that confront the religious affair in post communist Romania In doing so it addresses a key gap in previous scholarship which has paid little attention to the relationship between religious art and political resistance in communist Central and South East Europe

Governing Religious Diversity in Global Comparative Perspective Tariq Modood, Thomas Sealy, 2023-09-06 This book presents comparative analyses of different modes of the governance of religious diversity and state religion connections and relations in twenty three countries in five world regions Western Europe Southern and South Eastern Europe Central and Eastern Europe the MENA region and South and Southeast Asia Debates and controversies around the governance of religious diversity have become important features of the social and political landscape in different regions and countries across the world The historical influences and legacies and the contemporary circumstances provoking these debates vary between contexts and there have been a range of state and scholarly responses to how and why particular understandings and arrangements of state religion relations should be preferred over others The analyses of country cases and regions presented in this volume are based on extensive reviews of secondary literature of legal and policy landscapes and in some cases on interviews This book will be a great resource for academics researchers and advanced students interested in in the sociology of religion religious studies politics and migration studies The contributions in this volume arise out of the Horizon2020 funded GREASE project It was originally published as a special issue of Religion State and Society

Emerging Geographies of Belief Catherine Brace, 2010-10-12 This interdisciplinary book presents new research from international scholars that explores questions of belief faith and religion Focusing on theoretically informed cultural geographical and historical analyses of faith belief religion society and space the book presents new and revised theoretical approaches and methodologies grounded in rigorous empirical research both contemporary and historical The volume takes a deliberately eclectic approach reflecting the complex interactions of the political and poetic dimensions of sacredness in contemporary societies Taking this research agenda forward this book explores how religious beliefs inform and construct social identities public knowledge and modes of governance In particular the book meets an urgent need for a critical understanding of how terms such as religion faith fundamentalism and secularism for example inform public debates and foster constructive engagements both between faith groups and between

people of faith and people of no faith The essays in *Emerging Geographies of Belief* also show that religion cannot be mapped neatly onto faith or belief We attempt to tease out the different circumstances in which for example belief can operate without religious adherence or faith can inspire social action in geographies of hope The geography of the title relates to an overarching concern with space and spatiality rather than describing a single disciplinary approach Our concern with belief faith and religion operates at different temporal and spatial scales in different localities from the contemporary appeal to a more global sense of responsibility to a historically situated account of faith led educational practices This reflects more generally the so called spatial turn in the social sciences and humanities But despite this wide historical and geographical sweep the authors share some key concerns This collection is unique in combining theoretical conceptual and discursive approaches to the emerging geographies of belief with substantive examples of the intersection of belief faith and religion with aspects of everyday life Discussions of the potential subversive and prophetic capacities of faith belief and religion sit alongside consideration of how these have become implicated in the spaces and performances of hope It provides a critique of the situationist and substantive approaches to religion along with insights into the role of faith in education community and social work It considers the practices of remembrance representation and pilgrimage and the place of religion in contemporary identity politics In sum the book problematises the seemingly simple categories of faith religion and belief calling attention to how these are mobilised and implicated differently in different circumstances In addressing these themes the book provides a key theoretical resource but crucially goes on to show how multiple perspectives on belief however defined can be applied in practice Whilst there has been much contemporary work on the individual areas covered by the book they have not been brought together before to provide a dynamic insight into issues of the most pressing relevance
