Regime Of Anastasio Somoza 1936 1956:

The Regime of Anastasio Somoza, 1936-1956 Knut Walter, 2000-11-09 To many observers Anastasio Somoza who ruled Nicaragua from 1936 until his assassination in 1956 personified the worst features of a dictator While not dismissing these characteristics Knut Walter argues that the regime was in fact more notable for its achievement of stability economic growth and state building than for its personalistic and dictatorial features Using a wide range of sources in Nicaraguan archives Walter focuses on institutional and structural developments to explain how Somoza gained and consolidated power According to Walter Somoza preferred to resolve conflicts by political means rather than by outright coercion Specifically he built his government on agreements negotiated with the country's principal political actors labor groups and business organizations Nicaragua's two traditional parties one conservative and the other liberal were included in elections thus giving the appearance of political pluralism Partly as a result the opposition was forced to become increasingly radical says Walter eventually in 1979 Nicaragua produced the only successful revolution in Central America and the first in all of Latin America since Cuba's

What Went Wrong? The Nicaraguan Revolution Dan La Botz, 2016-09-07 This volume is a valuable re assessment of the Nicaraguan Revolution by a Marxist historian of Latin American political history It shows that the FSLN the Sandinistas with politics principally shaped by Soviet and Cuban Communism never had a commitment to genuine democracy either within the revolutionary movement or within society at large that the FSLN's lack of commitment to democracy was a key factor in the way that revolution was betrayed from the 1970s to the 1990s and that the FSLN's lack of rank and file democracy left all decision making to the National Directorate and ultimately placed that power in the hands of Daniel Ortega Pursuing his narrative into the present La Botz shows that once their would be bureaucratic ruling class project was defeated Ortega and the FSLN leadership turned to an alliance with the capitalist class

Krenn, 1996 This work examines the development of the ideas behind the theory of interdependent economic political and military relations with the nations of Central America It considers how policy makers defined interdependence and how they went about accomplishing their goals **Peasants in Arms** Lynn

Horton, 2014-08-27 Drawing on testimonies from contra collaborators and ex combatants as well as pro Sandinista peasants this book presents a dynamic account of the growing divisions between peasants from the area of Quilal who took up arms in defense of revolutionary programs and ideals such as land reform and equality and those who opposed the FSLN Peasants in Arms details the role of local elites in organizing the first anti Sandinista uprising in 1980 and their subsequent rise to positions of field command in the contras Lynn Horton explores the internal factors that led a majority of peasants to turn against the revolution and the ways in which the military draft and family and community pressures reinforced conflict and undermined mid decade FSLN policy shifts that attempted to win back peasant support **The Legacies of Liberalism**

James Mahoney, 2003-04-01 Winner of the Barrington Moore Jr Prize for the Best Book in Comparative and Historical Sociology from the American Sociological Association Winner of the Best Book Award in the Comparative Democratization Section from the American Political Science Association Despite their many similarities Central American countries during the twentieth century were characterized by remarkably different political regimes In a comparative analysis of Guatemala El Salvador Costa Rica Honduras and Nicaragua James Mahoney argues that these political differences were legacies of the nineteenth century liberal reform period Presenting a theory of path dependence Mahoney shows how choices made at crucial turning points in Central American history established certain directions of change and foreclosed others to shape long term development By the middle of the twentieth century three types of political regimes characterized the five nations considered in this study military authoritarian Guatemala El Salvador liberal democratic Costa Rica and traditional dictatorial Honduras Nicaragua As Mahoney shows each type is the end point of choices regarding state and agrarian development made by these countries early in the nineteenth century Applying his conclusions to present day attempts at market creation

in a neoliberal era Mahoney warns that overzealous pursuit of market creation can have severely negative long term political consequences The Legacies of Liberalism presents new insight into the role of leadership in political development the place of domestic politics in the analysis of foreign intervention and the role of the state in the creation of early capitalism The book offers a general theoretical framework that will be of broad interest to scholars of comparative politics and political development and its overall argument will stir debate among historians of particular Central American countries

Negotiating Love in Post-revolutionary Nicaragua Turid Hagene,2008 This book explores the issue of love and its place in the reproduction of gender asymmetry in Nicaragua The theme is discussed in the context of specific religious and work practices living arrangements gender values and norms and the gender practices and legislation of the Sandinista revolution The study uses lifeworld phenomenology as its theoretical approach placing people's own experience center stage Therefore a case study of the Esperanza sewing cooperative is presented built on life stories interview materials and participant observation with the cooperative women and their husbands The material and discursive practices and emotional experiences of men and women are examined in this particular socio cultural setting How do we account for the highly unequal bargains the women strike with their husbands accepting large material responsibilities and time share love even if they experience this as emotionally hurtful The study testifies to women's autonomy in family maintenance and religious practices an autonomy which seems to falter in the fields of love and sexuality some of the men and women however negotiate subtle changes in gender norms and values

The Ends of Modernization David Johnson Lee,2021-08-15 The Ends of Modernization studies the relations between Nicaragua and the United States in the crucial years during and after the Cold War David Johnson Lee charts the

transformation of the ideals of modernization national autonomy and planned development as they gave way to human rights protection neoliberalism and sustainability Using archival material newspapers literature and interviews with historical actors in countries across Latin America the United States and Europe Lee demonstrates how conflict between the United States and Nicaragua shaped larger international development policy and transformed the Cold War In Nicaragua the backlash to modernization took the form of the Sandinista Revolution which ousted President Anastasio Somoza Debayle in July 1979 In the wake of the earlier reconstruction of Managua after the devastating 1972 earthquake and instigated by the revolutionary shift of power in the city the Sandinista Revolution incited radical changes that challenged the frankly ideological and economic motivations of modernization In response to threats to its ideological dominance regionally and globally the United States began to promote new paradigms of development built around human rights entrepreneurial internationalism indigenous rights and sustainable development Lee traces the ways Nicaraguans made their country central to the contest over development ideals beginning in the 1960s transforming how political and economic development were imagined worldwide By illustrating how ideas about ecology and sustainable development became linked to geopolitical conflict during and after the Cold War *The Ends of Modernization* provides a history of the late Cold War that connects the contest between the two then prevailing superpowers to trends that shape our present globalized multipolar world

[The New Kremlinology](#) Alexander Baturo, Jos Elkind, 2021-09-27 *The New Kremlinology* is the first in depth examination of the development of regime personalization in Russia In the post Cold War period many previously democratizing countries experienced authoritarian reversals whereby incumbent leaders took over and gravitated towards personalist rule Scholars have predominantly focused on the authoritarian turn as opposed to the type of authoritarian rule emerging from it In a departure from accounts centred on the failure of democratization in Russia this book's argument begins from the assumption that the political regime of Vladimir Putin is a personalist regime in the making Focusing on the politics within the Russian ruling coalition since 1999 *The New Kremlinology* describes the process of regime personalization that is the acquisition of personal power by a leader Drawing from comparative evidence and theories of personalist rule the investigation is based on four components of regime personalization patronage networks deinstitutionalization media personalization and establishing permanency in office The fact that Russia has gradually acquired many but not all of the characteristics associated with a personalist regime underscores the complexity of political change and the need to unpack the concept of personalism The lessons of the book extend beyond Russia and illuminate how other personalist and personalizing regimes emerge and develop Furthermore the title of the book *The New Kremlinology* is chosen to emphasize not only the subject matter the what but also the how the battery of innovative methods employed to study the black box of non democratic politics *Comparative Politics* is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative

analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Susan Scarrow John and Rebecca Moores Professor of Political Science at the University of Houston and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich

Coffee and Power Jeffery M. Paige, 1997 In the revolutionary decade between 1979 and 1992 it would have been difficult to find three political systems as different as death squad dominated El Salvador peaceful social democratic Costa Rica and revolutionary Sandinista Nicaragua Yet when the fighting was finally ended by a peace plan initiated by Costa Rica's President Oscar Arias all three had found a common destination in democracy and free markets To explain this extraordinary turn of events is the task of this landmark book which fuses political economy and cultural analysis Both the divergent political histories and their convergent outcome were shaped by a single commodity that has dominated these export economies from the nineteenth century to the present coffee Jeffery Paige shows that the crises of the 1980s had their roots in the economic and political crises of the 1930s when the revolutionary left challenged the ruling coffee elites of all three countries He interweaves and compares the history economics and class structures of the three countries thus clarifying the course of recent struggles The heart of the book is his conversations with sixty two leaders of fifty eight elite dynasties who for the first time tell their own stories of the experience of Central American revolution Paige's analysis challenges not only Barrington Moore's influential theory of dictatorship and democracy but also contemporary approaches to transitions to democracy It also shows that a focus on either political economy or culture alone cannot account for the transformation of elite ideology and that revolution in Central America is deeply rooted in the personal familial and class histories of the coffee elites

Before the Revolution Victoria González-Rivera, 2015-06-17 Those who survived the brutal dictatorship of the Somoza family have tended to portray the rise of the women's movement and feminist activism as part of the overall story of the anti Somoza resistance But this depiction of heroic struggle obscures a much more complicated history As Victoria González-Rivera reveals in this book some Nicaraguan women expressed early interest in eliminating the tyranny of male domination and this interest grew into full fledged campaigns for female suffrage and access to education by the 1880s By the 1920s a feminist movement had emerged among urban middle class women and it lasted for two more decades until it was eclipsed in the 1950s by a nonfeminist movement of mainly Catholic urban middle class and working class women who supported the liberal populist patron clientelistic regime of the Somozas in return for the right to vote and various economic educational and political opportunities Counterintuitively it was actually the Somozas who encouraged women's participation in the public sphere as long as they remained loyal Somocistas Their opponents the Sandinistas and

Conservatives often appealed to women through their maternal identity What emerges from this fine grained analysis is a picture of a much more complex political landscape than that portrayed by the simplifying myths of current Nicaraguan historiography and we can now see why and how the Somoza dictatorship did not endure by dint of fear and compulsion alone *Latin America and the Origins of Its Twenty-First Century* Michael Monteón,2009-12-30 Latin American societies were created as pre industrial colonies that is peoples whose cultures and racial makeup were largely determined by having been conquered by Spain or Portugal In all these societies a colonial heritage created political and social attitudes that were not conducive to the construction of democratic civil societies And yet Latin America has a public life not merely governments but citizens who are actively involved in trying to improve the lives and welfare of their populations Monteón focuses on the relation of people s lifestyles to the evolving pattern of power relations in the region Much more than a basic description of how people lived this book melds social history politics and economics into one creating a full picture of Latin American life There are two poles or markers in the narrative about people s lives the cities and the countryside Cities have usually been the political and cultural centers of life from the conquest to the present Monteón concentrates on cities in each chronological period allowing the narrative to explain the change from a religiously centered life to the secular customs of today from an urban form organized about a central plaza and based on walking to one dominated by the automobile and its traffic Each chapter relates the connections between the city and its countryside and explains the realities of rural life Also discussed are customs diets games and sports courting and marriage and how people work In the Shadow of the United States Giancarlo Soler Torrijos,Giancarlo Soler,2008 How is the process of democratization different in those countries influenced by the United States Being so close to this world power the Latin Caribbean should have been one of the first regions and not one of the last to become democratic An intersection between Comparative Politics and International Relations the book portrays democratization not as a purely domestic process but as a regional one It also shows the limits of US influence US power distorted regime trajectories without being sufficient to determine their outcomes This book is central to understanding the impact of US efforts to promote democracy and the international dimension of regime transitions It is also useful to grasp the configuration of the Latin Caribbean as a distinct sub region Crucible of Power Howard Jones,2008 In this updated edition of *Crucible of Power* Howard Jones draws on his remarkable breadth as a historian of U S foreign relations to produce a distinguished survey of America s growth from an emerging power in the 1890s to its present day position of global preeminence Comprehensive tempered and highly accessible Jones demonstrates the complexities facing U S policy makers and the limitations on their actions
