Regimes Of Description In The Archive Of The Eighteenth:

Regimes of Description John B. Bender, Michael Marrinan, 2005 *Regimes of Description* responds to the perception however imprecise that forms of knowledge in every sector of contemporary culture are being fundamentally reshaped by the digital revolution music speech engineering diagrams weather reports works of visual art even the words most of us write are now subject as Lyotard points out in *The Inhuman* to a logic of the bit the elemental unit of electronic information It is now possible to slice graft and splice this knowledge in ways never before imagined using technologies that treat vast bodies of information as a stream of data bits Programs and technical algorithms specify the criteria for discriminating between the data stream of a Mozart string quartet and the CAT scan of a diseased organ But are these machine instructions and design parameters descriptions or merely mechanical filters And if the latter what constitutes a description of digitally encoded knowledge As a group the essays in this volume pose that question as a first attempt to write the archaeology of the nature and history of description in the digital age

The Unfinished Enlightenment Joanna Stalnaker, 2011-05-02 In *The Unfinished Enlightenment* Joanna Stalnaker offers a fresh look at the French Enlightenment by focusing on the era's vast collective attempt to compile an ongoing and provisional description of the world Through a series of readings of natural histories encyclopedias scientific poetry and urban topographies the book uncovers the deep epistemological and literary tensions that made description a central preoccupation for authors such as Buffon Bernardin de Saint Pierre Diderot Delille and Mercier Stalnaker argues that Enlightenment description was the site of competing truth claims that would eventually resolve themselves in the modern polarity between literature and science By the mid nineteenth century the now habitual association between description and the novel was already firmly anchored in French culture but just a century earlier in the diverse network of articles on description in Diderot and d'Alembert's *Encyclopédie* and in the works derived from it there was not a single mention of the novel Instead we find articles on description in natural history geometry belles lettres and poetry Stalnaker builds on the premise that the tendency to view description as the inevitable and subservient partner of narration rather than as a universal tool for making sense of knowledge in all fields has obscured the central place of description in Enlightenment discourse As a result we have neglected some of the most original and experimental works of the eighteenth century

Domesticating Empire Karen Stolley, 2013-12-15 Why has the work of writers in eighteenth century Latin America been forgotten During the eighteenth century enlightened thinkers in Spanish territories in the Americas engaged in lively exchanges with their counterparts in Europe and Anglo America about a wide range of topics of mutual interest responding in the context of increasing racial and economic diversification Yet despite recent efforts to broaden our understanding of the global Enlightenment the Ibero American eighteenth century has often been overlooked Through the work of five authors Jose de Oviedo y Baños Juan Ignacio Molina Felix de Azara Catalina de Jesus Herrera and Felix de Arrate *Domesticating Empire* explores the Ibero American Enlightenment as a project that reflects both key

Enlightenment concerns and the particular preoccupations of Bourbon Spain and its territories in the Americas At a crucial moment in Spain's imperial trajectory these authors domesticate topics central to empire conquest Indians nature God and gold by making them familiar and utilitarian As a result their works later proved resistant to overarching schemes of Latin American literary history and have been largely forgotten Nevertheless eighteenth century Ibero American writing complicates narratives about both the Enlightenment and Latin American cultural identity *Archive Style* Robin Kelsey, 2007-06-05 This imaginative study of American visual culture reveals how the political predicaments of a few small bureaucracies once fostered pictures of an extraordinary style U S geographical and geological surveys of the late nineteenth century produced photographs and drawings of topography American Indians geologic features botanical specimens and specialists at work in the field Some of these pictures have long been celebrated for their anticipation of a modernist aesthetic but Robin Kelsey in this abundantly illustrated volume traces their modernistic qualities to archival ingenuity The technical and promotional needs of surveys Kelsey argues fostered the emergence of a taut graphic pictorial style that imitated the informational clarity of diagrams and maps As this book demonstrates these pictures became sites of struggle as well as innovation when three brilliant survey artists and photographers subtly resisted the programs they were hired to serve Discovering a politics of style behind the modernist look of survey pictures Kelsey offers a fresh interpretation of canonical western expedition photographs by Timothy H O Sullivan and introduces two exceptional but largely forgotten sets of pictures views of the U S Mexico boundary from the 1850s by Arthur Schott and photographs of the Charleston earthquake of 1886 by C C Jones Jewish High Society in Old Regime Berlin Deborah Hertz, 2005-06-28 During the quarter century between 1780 and 1806 Berlin's courtly and intellectual elites gathered in the homes of a few wealthy cultivated Jewish women to discuss the events of the day Princes nobles upwardly mobile writers actors and beautiful Jewish women flocked to the salons of Rahel Varnhagen Henriette Herz and Dorothea von Courland creating both a new cultural institution and an example of social mixing unprecedented in the German past *Science in the Archives* Lorraine Daston, 2017-04-04 Science in the Archives reveals affinities and continuities among the sciences of the archives across many disciplines and centuries in order to present a better picture of essential archival practices and thereby the meaning of science For in both the natural and human sciences archives of the most diverse forms make cumulative collective knowledge possible Yet in contrast to laboratories observatories or the field archives have yet to be studied across the board as central sites of science The volume covers episodes in the history of astronomy geology genetics classical philology climatology history medicine and ancient natural philosophy as well as fundamental practices such as collecting retrieval strategies and data mining The time frame spans doxology in Greco Roman antiquity to NSA surveillance techniques and the quantified self movement Each chapter explores the practices politics economics and open ended potential of the sciences of the archives making this the first book devoted to the role of archives in the natural and human sciences Narrating from the Archive Marco Codebò, 2010

Narrating from the Archive describes the historical development of the archival novel a fictional genre in which the narrative stores records bureaucratic writing informs language and the archive frames the readers apprehension of the text Archival novels have been written in two distinct paradigms legitimation and challenge While in the former paradigm the archive guarantees the novel s verisimilitude in the latter the archive is questioned as a hierarchized and politically biased system for establishing truth In this book Alessandro Manzoni s I promessi sposi Honore de Balzac s Ursule Mirouet and Le Colonel Chabert are examples of novels written within the paradigm of legitimation while Gustave Flaubert s Bouvard et Pecuchet permits the transition between the two paradigms George Perece s La vie mode d emploi and Don DeLillo s Libra represent cases of archival fiction written within the paradigm of challenge

Law, Magistracy, and Crime in Old Regime Paris, 1735-1789: Volume 1, The System of Criminal Justice Richard Mowery Andrews, 1994-04-29 Law Magistracy and Crime in Old Regime Paris 1735 1789 is the first of two volumes centred around the two great courts of Paris the Ch telet and Parlement and their criminal defendants in the eighteenth century Richard Andrews seeks to refute the black legend of revolutionary propaganda and its modern historical successors which hold that the Old Regime courts were cruel and arbitrary These courts are shown rather to be thoroughly rule bound and consisting of strict judicial procedure derived from royal statutes Rule of and by the law is shown to be the most substantial legacy of the Old Regime This volume places the courts of Old Regime Paris in the context of French society and the state The practices and doctrines of punishment are examined along with the jurisprudence of moral and criminal behaviour

Experts in the World Heritage Regime Luke James, 2024-04-06 Addressing the topic of expertise in international cultural conservation this book argues that the UNESCO World Heritage regime emerged as a Faustian pact between protection and prestige and a productive tension between these elements remains at its core embodied by the heritage expert Tracing experts practices in the World Heritage regime this book shows how they burnish broker and themselves benefit from World Heritage prestige As World Heritage prestige also contributes to states international status claims the stakes are raised with both the denouement of the pact and the future for World Heritage poised between condemnation and redemption

The Legal Regime of Straits Hugo Caminos, Vincent P. Cogliati-Bantz, 2014-12-22 An account of the legal regime of straits and the allocation of rights and duties relating to transit passage

The Fourth of August Regime and Greek Jewry, 1936-1941 Katerina Lagos, 2023-02-03 Delving into a traditionally underexplored period this book focuses on the treatment of Greek Jews under the dictatorship of Ioannis Metaxas in the years leading up to the Second World War Almost 86% of Greek Jews died in the Holocaust leading many to think this was because of Metaxas and his fascist ideology However the situation in Greece was much more complicated in fact Metaxas in his policies often attempted to quash anti Semitism The Fourth of August Regime and Greek Jewry 1936 1941 explores how the Jews fit and did not fit into Metaxas s vision for Greece Drawing on unpublished archival sources and Holocaust survivor testimonies this book presents a ground breaking contribution to Greek history the history of Greek anti

Semitism and sheds light on attitudes towards Jews during the interwar period **Displaced Archives** James Lowry, 2017-02-17 Displaced archives have long been a problem and their existence continues to trouble archivists historians and government officials Displaced Archives brings together leading international experts to comprehensively explore the current state of affairs for the first time Drawing on case studies from around the world the authors examine displaced archives as a consequence of conflict and colonialism analysing their impact on government administration nation building human rights and justice Renewed action is advocated through considerations of the legal approaches to repatriation the role of the international archival community shared heritage approaches and other solutions The volume offers new theoretical technical and political insights and will be essential reading for practitioners academics and students in the field of archives cultural property and heritage management as well as history politics and international relations **Archival Outlook**, 2002 The Governance Report 2019 Hertie School of Governance, The Hertie School of Governance, 2019 The Governance Report 2019 focuses on health governance and the models and strategies used to make health policy an integral part of modern social policy and meet growing challenges Intellectual History and the Problem of Conceptual Change Elías J. Palti, 2024-05-09 This study reassesses the main concepts of Intellectual History offering a new framework for understanding past systems of knowledge **Proposed Cotterel Wind Power Project and Resource Management Plan**, 2006 *The Rise of English* Rosemary Salomone, Rosemary C. Salomone, 2022 A sweeping account of the global rise of English and the high stakes politics of language Spoken by a quarter of the world's population English is today's lingua franca its common tongue The language of business popular media and international politics English has become commodified for its economic value and increasingly detached from any particular nation This meteoric rise of English has many obvious benefits to communication Tourists can travel abroad with greater ease Political leaders can directly engage their counterparts Researchers can collaborate with foreign colleagues Business interests can flourish in the global economy But the rise of English has very real downsides as well In Europe imperatives of political integration and job mobility compete with pride in national language and heritage In the United States and England English isolates us from the cultural and economic benefits of speaking other languages And in countries like India South Africa Morocco and Rwanda it has stratified society along lines of English proficiency In *The Rise of English* Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far reaching effects it has on global and local politics economics media education and business From the inner workings of the European Union to linguistic battles over influence in Africa Salomone draws on a wealth of research to tell the complex story of English and ultimately to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders **The US Defense Economy** Jomana Amara, Raymond E. Franck, 2022-01-27 The United States defence economy is remarkable for a number of reasons including sheer size It receives a significant albeit decreasing share of GDP and has a significant international footprint Its purpose is

to provide the resources for national defence against a set of complex and capable adversaries The main players in the defence economy are households and the Federal Government The associated interactions determine the resources provided for national defence and their allocation among various defence needs This Element focuses primarily on interactions between government and industrial suppliers within the institutional peculiarities of the defence marketplace This includes the developments that have determined the course of defence industry consolidation post Cold War The authors also highlight the persistent gap between resources available for defence and the means to execute the National Security Strategy Finally they offer some tentative thoughts regarding developments likely to shape the defence economy's future

Donatello Among the Blackshirts Claudia Lazzaro, Roger J. Crum, 2005 Focuses on the appropriation of visual elements of the classical medieval and Renaissance past in Mussolini's Italy

The Archive in Motion Eivind Røssaak, Nasjonalbiblioteket (Norway), 2010 The Archive in Motion explores the current proliferation of the concept of the archive The concept has expanded into areas beyond the classical archive to art philosophy and new textual and media practices Simultaneously these new practices both resist and transform the archival impulse perhaps creating what one could call a new anarchival condition Archival concepts and practices have been transformed under the impact of the radical changes in writing and recording technologies that have taken place over the last 150 years and particularly with the introduction of digital technologies Film video television sound recording computers the Internet and new mobile media seem to have instigated a general storage mania and a proliferation of both public and private archival practices These technologies not only challenge traditional notions of the permanence and stability of the archival document but they also introduce a wide range of new questions concerning exactly what it means to store information for future use This collection of essays by the acclaimed international scholars and curators Alexander Galloway New York University Wolfgang Ernst Humboldt University Knut Ove Eliassen Norwegian University of Science and Technology Susanne Stby Sther Fotogalleriet Oslo Trond Lundemo University of Stockholm Terje Rasmussen and Kjetil Jakobsen both University of Oslo is essential reading for anyone interested in the future of archives and the diversity of archival practices and reflections today The preface is written by the National Librarian of Norway Vigdis Moe Skarstein and the introduction by the editor Eivind Røssaak The National Library of Norway
