Regional Economic Problems Comparative Experiences Of Some Market Economies Studies In Economics 13:

Regional Economic Problems Alfred John Brown,1977 **Regions in Recession and Resurgence** Michael Chisholm,2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government *Routledge Library Editions: Economic Geography* Various,2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization *The Value of Applied Economics* Kenneth Button,2017-12-29 This biography of the applied English economist Arthur A J Brown an English economist from the late 1930s to the 1980s sets his work in the context of the Great Depression the emergence of Oxford University as a centre of applied economic research the contraction of British colonialism in Africa the enlarging of the UK university system the post war arms race the UK joining the Common Market and significant changes in the industrial structure of Britain *An Introduction to Industrial Economics* P.J.
