Road Transport Before the Railways Dorian Gerhold, 1993-02-26 This 1993 book examines the road haulage trade in England when it depended on horses and wagons chiefly through the letters

and papers of one of the largest firms which operated between the West Country and London in the early nineteenth century. Other documents extend the coverage of the firm's history from the seventeenth century to the mid nineteenth century making it possible to examine how road transport changed during the course of two centuries. The Russell letters are all extraordinary and unique survival showing in detail how the firm managed to convey up to six tons at a time in all weathers how dominated it was by the capabilities and needs of the horse how reliable its services were who it served and how important it was to a variety of users. In sum the book provides a full account of the road haulage industry from the seventeenth century until the coming of the railways. Publisher and Bookseller, 1905 Vols for 1871-76 1913-14 include an extra number. The Christmas bookseller separately paged and not included in the consecutive numbering of the regular series.
