Regional Integration Theory And Research:

Regional Integration Leon N. Lindberg, Stuart A. Scheingold, 1971 Regional Integration in the Global South Sebastian Krapohl, 2016-11-23 This book presents a theory of economic integration in developing regions where the level of intraregional economic interdependence is low and the dependence on extra regional economic relations is high It argues that the success or failure of regional integration in the Global South is to a large degree dependent on the reaction of extra regional actors in Europe North America and Northeast Asia In doing so it demonstrates that longstanding European integration theories cannot be successfully applied to other world regions where economic conditions are fundamentally different By providing detailed empirical analyses that are systematic in their use of a common theoretical and methodological framework the authors fill a significant lacuna in our understanding of these issues This edited volume will appeal to students and scholars of comparative regionalism area studies and global governance **Regional Integration,**

Trade and Industry in Africa Helmut Asche, 2021-06-14 This book examines the past present and prospects of regional economic integration in Africa The empirical analysis ranges from unions formed during the years following independence to the proposed African Continental Free Trade Area AfCFTA which aims to remove trade barriers between all 55 African states In addition the book explores to what extent Africa s Regional Economic Communities RECs have advanced in accordance with a linear integration model of goods labor and capital markets The book subsequently evaluates the suitability of the European model of deep integration with costly institutions for the conditions specific to Africa considering for example the role of informal and non recorded trade Stylized cases of regional division of labour with increasing returns and imperfect competition are introduced to support the economic integration logic Past and current economic policies in Africa are scrutinized to answer the question how can African regions best foster new manufacturing industries and value chains across the continent In conclusion the book outlines content and processes of Common Industrial Policy in the African regions The book also addresses the controversial issue of international trade agreements between developing countries and the European Union or the USA and investigates whether these agreements impede or promote economic development in Africa The book includes a detailed roadmap describing how to improve key clauses of agreements for economic partnership in the interest of African countries In closing it outlines a new vision of joint sustainable development for Africa and Europe
