Regional Security And Anti Tactical Ballistic Missiles Political And Technical Issues:

Regional Security and Anti-tactical Ballistic Missiles William A. Davis, 1986 *Regional Security and Anti-tactical Ballistic Missiles* William A. Davis, 1986 **Threat of Ballistic Missiles in the Middle East** Arie Stav, 2004-06-01 This addresses the complex issue of defence against ballistic missiles by intercepting them at various stages of their trajectory The book poses both technical and conceptual questions regarding the issue of missile to missile interception and other options Missile Defences and Asian-Pacific Security Michael J. Mazarr, 1989-06-18 An in depth study of the military economic and political implications of the strategic and tactical missile defences for the Asian Pacific region It offers recent research on the status of SDI and Asian Pacific countries and offers an introduction to the SDI debate and Europe Energy Abstracts for Policy Analysis , 1988 START and the Future of Deterrence Michael J. Mazarr, 1990-06-18 Examining the future of nuclear deterrence in the 1990s and beyond this book outlines aspects of the evolving strategic environment It also projects the likely future of deterrence strategies and strategic force postures Other topics such as the Soviet nuclear doctrine are also covered **Britain and Ballistic Missile Defence, 1942-2002** Jeremy Stocker, 2004 Defence against ballistic missiles has been a subject of UK political policy and technical investigation since World War II this book analyses that long history **Security and Environment in the Mediterranean** Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century *Strategic Review* , 1987 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States *The INF Controversy* Jacquelyn K. Davis, Charles M. Perry, Robert L. Pfaltzgraff (Jr.), 1989 Missile Defenses and Western European Security Robert M. Soofer, 1988-11-22 Missile Defenses and Western European Security is an important contribution to the current debate on how new weapons initiatives will affect prospects for world peace Soofer generously sprinkles the book with relevant quotes from high ranking NATO officials respected academicians and military policy experts thus enhancing the readers understanding of the subject Friday Review of Defense Literature The NATO alliance has come under increasing

strain since President Reagan's announcement of plans for the strategic defense initiative SDI in March 1983. This study examines the logic underlying Western European reactions to SDI and assesses the validity of European anxieties about missile defenses. Systematically analyzing the positions of France, Britain, and West Germany on the full spectrum of NATO defense issues, the author attempts to determine whether strategic and tactical missile defenses can in fact contribute to U.S. and Western security. In his introduction, the author traces the history of NATO's doubts concerning the strategic nuclear guarantee, which were frequently expressed after the Soviets' first successful missile launches in the late 1950s. He next looks at Western European reactions to the SDI announcement and NATO's strategic thinking on deterrence and escalation. He discusses the relation between arms control considerations and the strategic defense initiative, focusing on NATO fears that SDI would lead to the abrogation of the 1972 ABM Treaty and with it the end of the arms control process. Turning to antitactical missile defense, Soifer argues that despite political opposition, there exists a substantial strategic rationale for missile defenses deployed in Western Europe. Offering clarification and new perspectives on many complex defense issues, *Missile Defenses and Western European Security* will be an important contribution to the current debate on how new weapons initiatives will affect prospects for world peace. This timely book is for specialists, students, and academics in the fields of strategic studies, peace studies, arms control, diplomacy, and international relations.

Strategic Challenges Schear James A. Flanagan, Stephen J. Flanagan, 2008-02-27. Since 2001, the United States has endured a tumultuous period, one dominated by the 9/11 attacks and all that has followed: the war on terrorism, the Afghan and Iraqi campaigns, looming confrontations with known or suspected proliferators of weapons of mass destruction, and episodic explosions of mass violence in chronically unstable regions. In this second half of the decade, these and related strategic challenges will test the skill, tenacity, and imagination of the current and the next U.S. administration and the American public. How well these challenges are managed, then or mastered, will greatly influence whether future historians look back upon this decade as a dangerous passage toward a more peaceful, globally connected order or as a descending path into an ever more fragmented, violent world. This volume explores seven looming, as yet unmastered strategic challenges facing the United States. Each chapter tackles one of the following challenges: tackling global terrorism, stopping WMD proliferation, undertaking defense transformation, protecting the homeland, strengthening relations with allies and partners, engaging other major powers, and defusing conflicts in unstable regions. Each chapter takes a similar approach: defining the problem at hand, i.e., a short discussion of relevant trends, explicating current U.S. efforts to master the challenge, i.e., U.S. objectives, methods, degree of success or setbacks, and analyzing looming choices that U.S. policymakers will face in the next decade and, as appropriate, the consequences of alternative courses of action. *Strategic Challenges* capitalizes on the great regional and topical expertise of the INSS professional research staff to present an authoritative overview of the global strategic environment facing the United States.
