Institutions, Discourse, and Regional Development Henrik Halkier, 2006 Why are some regional development strategies adopted and others rejected Only limited systematic attention has been paid to the politics of regional policy including the role of institutions discourse and political debate in shaping this major area of public policy The book develops an institutionalist approach to the study of regional policy capable of spanning major European development paradigms and accounting for the dynamic relationship between organisations policies and political discourse This conceptual framework is then applied to the Scottish Development Agency a development body famed across Europe for its innovative policies but surrounded by political controversy in Scotland A detailed study of corporate strategies policy implementation and the wider British environment questions existing interpretations of the organisation which tend to vilify anti interventionist Thatcherites or glorify shrewd development professionals Instead the author proposes an alternative synthesis which highlights the interplay between institutions discourse and regional development in the politics of regional policy

book examines the political economy of devolution in Britain from the postwar period to the present. The author utilizes various explanatory tools to unpack complex social economic spatial and political phenomena across national regional and local scales. The book further contributes to our conceptual understanding of decentralization as a broader comparative phenomenon. Particular emphasis is placed on examining why decentralization and devolution occur at particular points in time which enables the investigation into how political and fiscal powers are re organized at different levels of the state.

The Economic Geography of the IT Industry in the Asia Pacific Region Philip Cooke, Glen Searle, Kevin O'Connor, 2013-07-18. The development of the information technology IT industry in the Asia Pacific region faces two challenges. Firstly, can its established physical technical regional and governance infrastructures be adapted to meet the challenges embedded in the set of products and processes created by the IT industry? Secondly, as this adaptation evolves, which cities and regions will be best suited to connect to or lead global responses to these challenges? The chapters in this book have set out to explore these questions providing details of change in a range of aspects of the IT industry such as mobile phones, software services and flat screen design in regions in Japan, Korea, Taiwan, India, China and Australia. The book also outlines the policy responses of national and regional governments in Singapore, India and China and India. These case studies provide a basis to understand effective strategies which could be formulated for the future. This book's originality emerges from the fine detail provided about firms in particular regions and cities from research carried out by young scholars in the past two years. This makes it very useful for readers keen to understand the recent changes in this dynamic industry in a fast growth part of the world and it will also help to shape thinking by policy makers on policy settings that can be applied.

Dynamics of Economic Spaces in the Global Knowledge-based Economy Sam Park, 2014-09-19. This book addresses how economic spaces dynamically change within the context of the global knowledge based economy. Specifically, it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization, knowledge based economy, information society, service world, climate change and population aging. Focusing on East Asia, especially on Korea, it deals with case studies regarding the processes and patterns of these global dynamics looking at economic spaces of various spatial scales and types of economic actors. This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy. It also emphasizes the analysis of empirical studies at the level of firm, region and state by considering an evolutionary perspective over time. In developing its theoretical framework, this book examines regional resilience, intangible assets, service innovation, path dependence and other notions related to the evolution of economic spaces and incorporates these elements into real world case studies. The integrated theoretical framework examined here contributes a new perspective on spatial disparities in the global economy. An integral model of service innovation, the integration of path

dependence and regional resilience the interaction between firm and region for the accumulation of intangible assets and the roles of governments and global firms these are all essential to understanding the dynamics of economic spaces in East Asia The theoretical model and case studies in this book suggest policy implications for developing countries especially in the Asian and African regions with regard to regional development and innovation policies

Smaller Cities in a World of Competitiveness Peter Karl Kresl,Daniele Ietri,2016-04-28 Much recent research in Urban Studies has concentrated on the notion of the global city but discussion has also covered a larger set of mega cities with populations in excess of 10 million This analysis has begged the question of the optimal size for a city is larger always better Smaller Cities explores the advantages and disadvantages of different sized cities trying to determine their place in the global economy and hierarchy How can smaller cities gain or retain their competitiveness in a world of large cities In a globalized world the nation has perhaps been diminished as an economic actor with fiscal shortcomings and political gridlock leaving cities more or less on their own in the task of enhancing their competitiveness and improving the economic lives of their residents This book argues that smaller cities of varying population can be important actors in competitiveness and aims to bring attention to an area often overlooked by researchers In short are Pittsburgh San Diego and Austin less competitive than London and Mumbai This volume will be of interest to students researchers and city professionals who work in urban economy and urban geography

Rethinking the Region John Allen,with Julie Charlesworth,Allan Cochrane,Gill Court,Nick Henry,Doreen Massey,Phil Sarre,2012-12-06 Rethinking the Region argues that regions are not simply bounded spaces on a map This book uses unique research of England during the 1980s to show how regions are made and unmade by social processes The book examines how new lines of division both social and geographical were laid down as free market growth and reconstructed this are as a neo liberal region The authors argue that a more balanced form of growth is possible within and between regions as well as between social groups This book shows that to grasp the complexities of growth we must rethink the region in time as well as in space

problems In this collection by leading researchers in the field the role of regional policy in the UK is re evaluated against a background of renewed debate on the economic disparities inherent in the north south divide and an assessment of the implications for future policy Housing Policy Paul Balchin, Maureen Rhoden, 2019-01-09 Now in its fourth edition this textbook has been completely revised to examine the current state of housing policy in the UK Exploring developments in housing policy made since Labour's 1997 electoral victory the book addresses current issues including the brownfield versus greenfield debate the phasing out of renovation grants the transfer of local authority housing to registered social landlords boom slump and boom in the owner occupied sector Other topics addressed range from regional policy and housing across the UK to social exclusion community care and homelessness **Housing Policy In The United States** Jean Conway, 2003-08-27 Housing Policy An Introduction has been completely revised for its fourth edition Describing and explaining policies as well as analysing recent changes this book provides an accessible introduction to housing policy
