## **Regional Economic Development:**

**Regional Economic Development** Robert J. Stimson, Roger R. Stough, Brian H. Roberts, 2013-03-09 Regional economic development has attracted the interest of economists geographers planners and regional scientists for a long time And of course it is a field that has developed a large practitioner cohort in government and business agencies from the national down to the state and local levels In planning for cities and regions both large and small economic development issues now tend to be integrated into strategic planning processes For at least the last 50 years scholars from various disciplines have theorised about the nature of regional economic development developing a range of models seeking to explain the process of regional economic development and why it is that regions vary so much in their economic structure and performance and how these aspects of a region can change dramatically over time Regional scientists in particular have developed a comprehensive tool kit of methodologies to measure and monitor regional economic characteristics such as industry sectors employment income value of production investment and the like using both quantitative and qualitative methods of analysis and focusing on both static and dynamic analysis The father of regional science Walter Isard was the first to put together a comprehensive volume on techniques of regional analysis Isard 1960 and since then a huge literature has emerged including the many titles in the series published by Springer in which this book is published *Introduction to Regional Economic Development* Mustafa Dinc, 2015-12-18 This is a relatively simple and easy to read introduction of major regional and local economic development theories their theoretical evolution and other relevant topics such as governance institutions and local leadership within the globalization context It also discusses some basic analytical tools and provides a template for them in an easy to use MS Excel spreadsheet application It introduces conflict management procedures into regional development process and provides a regional decision support framework

**Regional Economic Development** Gordon C. Cameron, 2015-09-16 First published in 1970 Regional Economic Development The Federal Role examines the economic viability of depressed areas and regions This book questions whether there is adequate justification on national economic grounds for Federal involvement with distressed area revitalisation and looks at the main guidelines for intervention in relation to typology of distressed areas This title is an ideal resource for students interested in politics macroeconomics and federal policies concerning the revitalisation of distressed areas and economies *Environmental Amenities and Regional Economic Development* Todd L. Cherry, Dan Rickman, 2009-12-04 Economic development and the environment are presumed to be in conflict but the latter part of the twentieth century experienced a series of economic changes that increasingly questioned this view Economic activity became more footloose and the ability to attract productive labor became a prominent regional development concern Consequently environmental amenities began to have a larger role in determining the patterns of regional growth and development and subsequently moved to the forefront of current regional economic development thought and practice Environmental amenities provide non pecuniary benefits to area residents and induce in migration flows

to regions that possess high levels of environmental amenities. The attraction is particularly strong for those individuals with higher incomes and wealth. The combined forces of increased demand for environmental amenities and increased spatial flexibility of production has brought environmental amenities to the forefront of current regional economic development thought and practice. Regional economic development policy needs to consider the tradeoffs of attracting firms or people which requires an understanding of the role the environment plays directly or indirectly in attracting firms and households. This book presents key papers that explore the role of the natural environment in regional economic development. The papers contain critical insights and information for both researchers and practitioners interested in the nexus between environmental amenities and regional economic growth and development. The book covers varied dimensions of this issue including the relative importance of amenities in recent variation in regional growth, the role of local infrastructure in promoting amenity led development, socio economic distribution concerns and sustainability of amenity based growth and the effects of local environmentally protected areas on other economic activities. This book will be of most value to practitioners and academics specifically related to the areas of environmental economics, regional economic development, local and regional planning, public administration and public policy.

*Regional Economic Development in the Balkan Region* Teoman Duman, Erkan Ilgün, Merdžana Obralić, 2016-01-14. This edited volume brings together original scientific studies on current economic and developmental issues in the Balkan region and is composed of papers by 25 authors from seven different countries. The Balkan region has gained significant interest in recent years due to its location and strategic position representing a doorway to Europe and the region's stability and progress have direct consequences on various European countries. Because of this strategic position there is currently much debate regarding a potential partnership of the Balkan states with the European Union. This book offers insights into the current economic and developmental status of the countries in this region offering a series of chapters that analyse the area from a variety of perspectives. It begins with a discussion on the recent history of the region especially with reference to the former Yugoslavia and its break up after the turbulence experienced in 1990s. Other sections are complementary to each other in that they offer comparisons of the Balkan states in their economic progress at the micro and macro levels. Topics such as European integration policies and effects, economic transition, regional trade, tax incentive policy, regional capital markets, regional development agencies and systems, remittances and foreign aid contributions, import export policies, fiscal policies, analysis of regional microfinance and the tourism sectors are explored in detail throughout the book.

**Transitions in Regional Economic Development** Ivan Turok, David Bailey, Jennifer Clark, Jun Du, Ugo Fratesi, Michael Fritsch, John Harrison, Tom Kemeny, Dieter Kogler, Arnoud Lagendijk, Tomasz Mickiewicz, Ernest Miguelez, Stefano Usai, Fiona Wishlade, 2018-10-18. At a time of extraordinary challenges confronting the world, this book analyses some of the profound changes occurring in the development of cities and regions. It discusses the uncertainties associated with the stalling of hyper globalization and asks whether this creates opportunities for

resurgent regional economies driven by local capabilities resource efficiencies and domestic production Theory and evidence on socio economic and environmental transitions underway in many regions are brought together Implications of the shifting balance of global power towards emerging economies in the East are explored along with the consequences of urbanization in the global South for politics and democracy Dilemmas surrounding migration are also discussed including whether incomers displace local workers and depress wages or bring benefits in the form of know how new technology and investment More integrative concepts of the region and theories of regional development are analysed recognising the role of human capital knowledge innovation finance infrastructure and institutions This was originally published as a special issue of Regional Studies

**Universities and Regional Economic Development** Paul Benneworth,2020-09-30 In a knowledge based economy universities are vital institutions This volume explores the roles that universities can play in peripheral regions contributing to processes of regional economic development and innovative growth Including a series of case studies drawn from Portugal Norway Finland the Czech Republic Estonia and the Dutch German border region this will be the first book to offer a comprehensive comparative overview of universities in European economically peripheral regions These studies seek to explore the tensions that arise in peripheral regions where there may not be obvious matches between university activities and regional strengths Aimed at academics policy makers and practitioners working on regional innovation strategies this volume brings a much needed sense of realism and ambition for all those concerned with building successful regional societies at the periphery of the knowledge economy

*Technology in the Garden* Michael I. Luger,Harvey A. Goldstein,2000-11-09 More than half of the 116 research parks now operating in the United States were established during the 1980s with the aim of boosting regional economic growth But until now no one has systematically analyzed whether research parks do in fact generate new businesses and jobs Using their own surveys of all existing parks and case studies of three of the most successful Research Triangle Park in North Carolina Stanford Research Park in California and the University of Utah Research Park Michael Luger and Harvey Goldstein examine the economic impact of such facilities As the name suggests a research park is typically meant to provide a spacious setting where basic and applied technological research can be quietly pursued Because of the experience of a few older and prominent research parks new parks are expected to generate economic growth for their regions New or old most parks have close ties to universities which join in such ventures to enhance their capabilities as centers of research provide outlets for entrepreneurial faculty members and increase job opportunities for graduate students Too often the authors say the vision of incubating economic growth in a gardenlike preserve of research and development has failed because of poor planning lack of firm leadership and bad luck Although the longest lasting parks have met their original goals the newer ones have enjoyed at best only slight success Luger and Goldstein conclude that the older facilities have captured much of the market for concentrations of research and development firms and they discuss alternative strategies that could achieve some of the same goals as research parks but in

a less costly way Many of these alternatives continue to include a role for universities and Luger and Goldstein shed fresh light on the linkage between higher education and the use of knowledge for profit      **Universities and Regional**

**Development** Rómulo Pinheiro,Paul Benneworth,Glen Alan Jones,2012 Universities are under increasing pressure to help promote socio economic growth in their local communities However until now no systematic critical attention has been paid to the factors and mechanisms that currently make this process so daunting In Universities and Regional Development scholars from Europe the Americas Africa and Asia critically address this knowledge gap focusing on policy organization and the role of individual actors to uncover the challenges facing higher education institutions as they seek to engage with their regions In a systematic and comparative manner this book shows internal and external audiences why how and when the institutionalization of universities third missions should take place and also challenges conventional wisdom about the role of universities in society and the economy demonstrates how institutions in different nations and regions cope with local engagement combines the latest national regional and local research with international perspectives integrates diverse conceptual and disciplinary frameworks Universities and Regional Development is a key resource for researchers and students of higher education and territorial development educational policy makers and university managers seeking to engage with the world beyond their university      **Regional Economic Development** Benjamin Higgins,2018-12-13 14 4

The Top Books of the Year Regional Economic Development The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
