Post-Cowboy Economics Thomas Michael Power, Richard Barrett, 2001-07

A great deal of reactionary political fire in the Mountain West has been aimed at environmental protection measures that are perceived to have destroyed or diminished the livelihoods of long time residents. Conventional wisdom sees the economic woes afflicting the region declining pay growing inequality persistent poverty as a direct result of increasingly strict environmental regulations that have crippled natural resource industries such as mining and logging. In *Post Cowboy Economics* economists Thomas Michael Power and Richard Barrett provide a new interpretation of the economy of the Mountain West. Based on evidence from a wide variety of sources including data on individual employment and income histories of more than 300 000 residents they clearly demonstrate that the region's economic misfortunes are not the result of changes in regional industrial structure but rather are local manifestations of pervasive national and international trends. The authors discuss and critique entrenched conventional wisdom and its policy implications present an empirical analysis of changes in the region offer a new interpretation of events affecting the regional economy set forth public policies that will work to protect and enhance the economic well being of its residents and communities. The authors analysis and interpretation make a compelling case that despite incomes that are low compared to the rest of the country the region is not suffering from general impoverishment and that environmental protection rather than threatening economic well being enhances welfare and protects the very source of the economic vitality that the Mountain West enjoys. Throughout they argue that fearful crisis driven environmental and economic development policies are unnecessary and inappropriate and often counterproductive. *Post Cowboy Economics* is an important work for professionals and scholars involved with environmental policy economic development and resource management as well as anyone interested in the future of the American West.
