Regional Growth United States. Advisory Commission on Intergovernmental Relations, 1980 **Regional Disparities, Growth, and Inclusiveness** Mr. Holger Floerkemeier, Mr. Nikola Spatafora, Anthony Venables, 2021-02-12 We discuss regional disparities in economic performance and living standards We first set out some key facts and provide a conceptual framework to help analyze whether such disparities are efficient or instead reflect market and or policy failures We examine whether policy attempts to reduce regional disparities necessarily involve a trade off between equity and efficiency We then investigate whether policymakers should focus on boosting the economic performance of lagging regions or conversely accept the presence of regional disparities and instead assist households in lagging regions through transfer payments investments in education health and other basic services and by facilitating out migration *Regional and Metropolitan Growth and Decline in the US* William H. Frey, Alden, Jr. Speare, 1988-10-18 During the 1970s several striking population shifts attracted widespread attention and colorful journalistic labels Urban gentrification the rural renaissance the rise of the Sunbelt these phenomena signaled major reversals in long term patterns of population distribution In *Regional and Metropolitan Growth and Decline in the United States* authors Frey and Speare place such reversals in context by examining a rich array of census data This comprehensive study describes new population distribution patterns explores their consequences and evaluates competing explanations of current trends The authors also provide an in depth look at the

changing race status and household demographics of the nation's largest cities and discuss the broad societal forces precipitating such changes Frey and Speare conclude that the 1970s represented a transition decade in the history of population distribution and that patterns now emerging do not suggest a return to the past With impressive scope and detail this volume offers an unmatched picture of regional growth and decline across the United States A Volume in the Russell Sage Foundation Census Series Federalism and Regional Development George W. three major components economic specialization human capital formation and institutional factors to determine how well a regional economy will cope with new opportunities and challenges Drawing on economics sociology political science and geography they argue that the economic development of metropolitan regions hinges on previously underexplored capacities for organizational change in firms networks of people and networks of leaders By studying San Francisco and Los Angeles in unprecedented levels of depth this book extracts lessons for the field of economic development studies and urban regions around the world
