Joseph,2013-07-02 Hurricane Sandy was a fierce demonstration of the ecological vulnerability of New York a city of islands

Yet the storm also revealed the resilience of a metropolis that has started during the past decade to reckon with its aqueous topography In *Fluid New York* May Joseph describes the many ways that New York and New Yorkers have begun to incorporate the city's archipelago ecology into plans for a livable and sustainable future For instance by cleaning its tidal marshes the municipality has turned a previously dilapidated waterfront into a space for public leisure and rejuvenation Joseph considers New York's relation to the water that surrounds and defines it Her reflections reach back to the city's heyday as a world class port a past embodied in a Dutch East India Company cannon recently unearthed from the rubble at the World Trade Center site and they encompass the devastation caused by Hurricane Sandy in 2012 They suggest that New York's future lies in the reclamation of its great water resources for artistic creativity civic engagement and ecological sustainability

Unity is Strength Markus Bierkoch, 2024-12-02 Migration has been one of the most pressing societal issues throughout

history Immigrant associations play a crucial role in understanding this phenomenon They channel migration streams influence the assimilation of their members and serve as representatives of the entire immigrant group in society However they remain an understudied subject particularly in historical research To address this gap this study examines German immigrant associations in New York from the 1890s to the 1930s Through an innovative combination of statistical and textual analyses it explores the class composition of these associations their intricate system of mutual aid and their political activities This study offers insights into how specific socio economic motivations influenced immigrant organization and collective action including aspects such as long distance nationalism and cross border ethnic identity Ultimately based on these findings this study demonstrates that immigrant associations played a crucial role in helping their members adapt to a new social and economic environment Additionally it shows why and how immigrant associations significantly shaped the image of German immigrants in American social and political life

Constructing Metropolitan Space Jill Simone Gross, Enrico Gualini, Lin Ye, 2018-12-07 There is little question today that processes of globalization affect national and local economies governance processes and conditions for economic competitiveness in the major urban regions of the world In most liberal democratic countries these processes are occurring according to a rationale which attempts to combine strategies of state supported development with increasing local regional governmental decentralization and autonomy Against this background the issue of metropolitan development is being redefined worldwide along with its institutional frameworks modes of governance policy instruments and spatial planning strategies The overarching assumption of this volume is that metropolitan space far from being consolidated as a policy object is currently being redefined and in some instances constructed and contested as a scale through a variety of policy practices related to spatial economic development objectives Through case studies drawn from across four continents the authors reveal a range of interesting cross national commonalities concerning the power that state actors situated at various spatial scales exert as agents in these processes This volume interrogates key research issues raised by these developments and is intended as a contribution to the establishment of a globally comparative analysis of the construction of metropolitan spaces and scales under conditions of globalization and neoliberalization

Greater New Jersey Dennis E. Gale, 2006 Northern New Jersey is undergoing a gradual transformation to become symbolic of a new kind of suburban area one that borrows culture image and economy from a metropolis but also maintains the day to day living patterns of heartland America in the face of rapid social change
