Regionalism Change In The Econom:

The Regionalization of the World Economy Jeffrey A. Frankel, 2007-12-01 Regional economic arrangements such as free trade areas FTAs customs unions and currency blocs have become increasingly prevalent in the world economy Both pervasive and controversial regionalization has some economists optimistic about the opportunities it creates and others fearful that it may corrupt fragile efforts to encourage global free trade Including both empirical and theoretical studies this volume addresses several important questions Why do countries adopt FTAs and other regional trading arrangements To what extent have existing regional arrangements actually affected patterns of trade What are the welfare effects of such arrangements Several chapters explore the economic effects of regional arrangements on patterns of trade either on price differentials or via the gravity model on bilateral trade flows In addition this book examines the theoretical foundation of the gravity model Making extensive use of the gravity model of bilateral trade several chapters explore the economic effects of regional arrangements In addition this book examines the theoretical foundation of the gravity model Social Regionalism in the Global Economy Adelle Blackett, Christian Lévesque, 2010-12-20 Regional trade agreements have expanded exponentially over the past decade and have become a significant if controversial factor in the expanse of economic globalization Social Regionalism in the Global Economy attempts to take a fresh interdisciplinary approach to addressing labour regulation by drawing upon insights from industrial relations comparative capitalism and new governance schools of thought It stands for the proposition that an interdisciplinary study of regional regulation holds the potential to offer a fuller account of social regionalism Its focus is to consider how institutions and labour market actors reconstruct and renegotiate regulatory space in a changing economic environment characterized by regional impulses It argues that there is a dynamic interplay between institutions and actors of social regulation This interplay occurs at many levels The book therefore maps both how actors shape institutions as well as how institutions shape social actors ability to affect regulatory processes The editors bring together leading international specialists willing to move beyond textual analyses of regional agreements to offer alternative accounts of regional integration The work emphasizes that institutional context and social actors at multiple governance levels are integral to the progressive construction and regulation of regional space It further contributes to the literature by combining insights from overlooked regional entities in transition and developing countries with original analyses from the European Union and the NAFTA These aims will be achieved by combining original research that is empirically grounded with theoretically informed analysis **Regionalism and Change in the Economy of Independent Delos, 314-167 B.C.** Gary Reger, 1994 Meticulous methodologically sophisticated and innovative There is nothing like it in its field Andrew Stewart University of California at Berkeley This will be the definitive work on the subject for many decades to come Donald Engels University of Arkansas A gripping and provocative book that challenges traditional views of Hellenistic economy Leopold Migeotte Universite Laval Quebec Regionalism in a Changing World Lorenzo

Fioramonti,2014 A comprehensive look at regional integration in Europe Africa Asia and South America The first comparative analysis of the challenges and prospects faced by regional integration against the backdrop of a new global order influenced by emerging powers **Asian Regionalism in the World Economy** Masahiro Kawai,Jong-Wha Lee,Peter A.

Petri,2010-01-01 The structure and policy architecture of the world economy as it emerges from the historic challenges now underway will be affected by the dramatic rise of Asian economies and deepening connections among them This important book examines the dramatic transformation of the Asian economy the challenges it faces emerging regional solutions and how Asia can play a more constructive role in the global economy Asia is becoming not just the world s factory but also its leading creditor and one of its key sources of dynamism and stability Key questions are identified and addressed in three areas Asia s growth and productivity financial stability and regional economic integration In each of these areas the contributing authors evaluate current trends and the forces shaping the future They consider whether the regions progress is sustainable and what it will take to make it so How is Asia reshaping its economy in response to the changing global landscape More urgently how can Asia weather the severe global financial and economic stormoriginating from the global credit crisis How will it extend its gains to people left behind And how can it contribute to better governance and greater prosperity in the world economy This book covers new ground by connecting theory assembling detailed evidence on trends and challenges and offering forwardlooking policy prescriptions This timely book will appeal to Asian economic policymakers as well as postgraduate students interested in Asian economics international economics and regional integration Staff of international and regional organizations interested in Asian economics will also find this book invaluable **The Political Economy of Regionalism** Michael Keating,John Loughlin,2013-07-04 Examining the effects of economic and political restructuring on regions in Europe and North America the main themes here are international economic restructuring political realignments questions of territorial identity and policy choices and policy conflicts in regional development

Regionalism versus Multilateral Trade Arrangements Takatoshi Ito,Anne O. Krueger,2007-12-01 There is no doubt that the open multilateral trading system after World War II was a key ingredient in the rapid economic development of the entire world Especially in Hong Kong Korea Singapore and Taiwan exports increased dramatically both in absolute terms and as a percentage of GNP In the 1980s however preferential trading arrangements PTAs began to emerge as significant factors affecting world trade This volume contains thirteen papers that analyze the tensions between multilateral trading systems and preferential trade arrangements and the impact of these tensions on East Asia The first four chapters introduce PTAs conceptually and focus on the unique political issues that these agreements involve The next five essays present more direct empirical analyses of existing PTAs and their economic effects primarily in East Asia The last four papers concentrate on the outcomes of individual East Asian nations trading policies in specific instances of preferential agreements New Regionalism in the Global Political Economy Shaun Breslin,Christopher W. Hughes,Nicola Phillips,Ben Rosamond,2002-08-22

Following the financial crisis at the end of the twentieth century regionalisms in the global political economy have evolved in a number of ways This informative book brings together the leading scholars in the field to provide cutting edge analyses of contemporary regions and regionalist projects Providing an innovative integration of theoretical *Globalisation, Regionalism and Economic Interdependence* Filippo di Mauro, Stéphane Dees, Warwick J. McKibbin, 2008 An assessment of the extent to which increased global and regional integration has changed the functioning of the world economy With contributions from both academics and professionals it analyses the implications for global trade relocation of production structural changes and the international transmission of shocks **Remaking Regional Economies** Susan

Christopherson, Jennifer Clark, 2020-08-18 Winner of the 2009 Regional Studies Association Best Book Award Since the early 1980s the region has been central to thinking about the emerging character of the global economy In fields as diverse as business management industrial relations economic geography sociology and planning the regional scale has emerged as an organizing concept for interpretations of economic change This book is both a critique of the new regionalism and a return to the regional question including all of its concerns with equity and uneven development It will challenge researchers and students to consider the region as a central scale of action in the global economy and at the core of the book are case studies of two industries that rely on skilled innovative and flexible workers the optics and imaging industry and the film and television industry Combined with this is a discussion of the regions that constitute their production centers The authors intensive research on photonics and entertainment media firms both large and small leads them to question some basic assumptions behind the new regionalism and to develop an alternative framework for understanding regional economic development policy Finally there is a re examination of what the regional question means for the concept of the learning region This book draws on the rich contemporary literature on the region but also addresses theoretical questions that preceded the new regionalism It will contribute to teaching and research in a range of social science disciplines and this new paperback edition will also make the book more accessible to students and researchers in those disciplines those individuals who will influence the re structuring economies of the 21st century **Comparative Regionalism** Etel

Solingen, 2014-07-11 This book comprises key essays on comparative regionalism and more broadly on regional conflict and cooperation by Professor Etel Solingen The study of regionalism a subject pioneered by Solingen in the 1990s is now an established field of inquiry with a large community of scholars and practitioners around the world This book provides a window into an evolving conceptual framework for comparing regional arrangements with a special emphasis on non European regions Framed by a comprehensive previously unpublished introduction the chapters provide a broad spectrum of analysis on domestic political economy democracy regional institutions and global forces as they shape different regional outcomes and trajectories in economics and security Themes as different as the regional effects of democratization in the Middle East and East Asia the rise of China Euro Mediterranean relations and regional nuclear trajectories are traced back

Regionalism and Rivalry Jeffrey A. Frankel, Miles Kahler, 2007-12-01 As Japan's newfound economic power leads to increased political power there is concern that Japan may be turning East Asia into a regional economic bloc to rival the U S and Europe In *Regionalism and Rivalry* leading economists and political scientists address this concern by looking at three central questions Is Japan forming a trading bloc in Pacific Asia Does Japan use foreign direct investment in Southeast Asia to achieve national goals Does Japan possess the leadership qualities necessary for a nation assuming greater political responsibility in international affairs The authors contend that although intraregional trade in East Asia is growing rapidly a trade bloc is not necessarily forming They show that the trade increase can be explained entirely by factors independent of discriminatory trading arrangements such as the rapid growth of East Asian economies Other chapters look in detail at cases of Japanese direct investment in Southeast Asia and find little evidence of attempts by Japan to use the power of its multinational corporations for political purposes A third group of papers attempt to gauge Japan's leadership characteristics They focus on Japan's technology ideology its contributions to international public goods international monetary cooperation and economic liberalization in East Asia

Market Integration, Regionalism and the Global Economy Richard Baldwin, 1999-08-26 Demonstrates how new techniques of economic analysis can be used to study the process of regional integration

The New Regionalism in Western Europe Michael Keating, 1998 This text traces the historical origins of regionalism showing that theoretical politics has always been a feature of the West European state The book then analyzes the post war model of territorial management in the Keynesian welfare state and shows how the current trends are re shaping the meaning of political space and encouraging new forms of political mobilization and action

Hsieh, 2021-12-16 Provides the first systematic analysis of new Asian regionalism as a paradigm shift in international economic law **The Evolution of Regionalism in Asia** Heribert Dieter, 2007-12-10 This edited volume looks at regional integration processes in Asia Whilst integration in the region defined as Southeast and East Asia is not a new process it has gained momentum in recent years Two developments have acted as catalysts for integration first at the economic level the Asian crisis of 1997 has been the watershed for most countries in the region Ever since there have been continuing search processes for sovereignty enhancing types of economic policies and the region is one location where policy makers look for new avenues to strengthen the position of their countries The second major development is the continuing rise of China in the region Today China is not only the manufacturing powerhouse of the region but it increasingly functions as a benign hegemon in Asia Integration processes in Asia take place at several levels in trade finance and security affairs This book analyses these dimensions of integration and sheds light on the prospects for successful integration It investigates the puzzling sometimes contracting trends of co operation and integration in Asia The contributors to this volume look at a theme that is of growing importance to the discipline of political science as much as it is relevant for policy makers By combing the analysis of the three dimensions of integration The Evolution of Regionalism in Asia enables readers to gain a broad understanding of the theory and practice of the integration processes **The Oxford Handbook of Comparative Regionalism** Tanja A. Börzel, Thomas Risse, 2016-02-04 The Oxford Handbook of Comparative Regionalism the first of its kind offers a systematic and wide ranging survey of the scholarship on regionalism regionalization and regional governance Unpacking the major debates leading authors of the field synthesize the state of the art provide a guide to the comparative study of regionalism and identify future avenues of research Twenty seven chapters review the theoretical and empirical scholarship with regard to the emergence of regionalism the institutional design of regional organizations and issue specific governance as well as the effects of regionalism and its relationship with processes of regionalization The authors explore theories of cooperation integration and diffusion explaining the rise and the different forms of regionalism The handbook also discusses the state of the art on the world regions North America Latin America Europe Eurasia Asia North Africa and the Middle East and Sub Saharan Africa Various chapters survey the literature on regional governance in major issue areas such as security and peace trade and finance environment migration social and gender policies as well as democracy and human rights Finally the handbook engages in cross regional comparisons with regard to institutional design dispute settlement identities and communities legitimacy and democracy as well as inter and transregionalism *Revisiting Regionalism and the Contemporary World Order* Élise Féron, Jyrki Kknen, Gabriel Rached, 2019-11 The book critically analyzes the ongoing changes in the regional intra regional and global dynamics of cooperation from a multi disciplinary and pluralist perspective It is based on the insight that in a post hegemonic world the formation of regions and the process of globalization can be largely disconnected from the orbit of the US and that

a plurality of power and worldviews has replaced US hegemony In spite of these changes most existing analyses of current changes in the world order still rely upon Western centered approaches and Westphalian thinking Against this backdrop the book proposes to advance a truly global IR understanding of the post hegemonic world and weaves together the pluralist and multi disciplinary perspectives of scholars located all around the world
