Beyond Japan Peter J. Katzenstein,Takashi Shiraishi,2018-07-05 Have Japan s relative economic decline and China s rapid ascent altered the dynamics of Asian regionalism Peter Katzenstein and Takashi Shiraishi the editors of Network Power one of the most comprehensive volumes on East Asian regionalism in the 1990s present here an impressive new collection that brings the reader up to date This book argues that East Asia s regional dynamics are no longer the result of a simple extension of any one national model While Japanese institutional structures and political practices remain critically important the new East Asia now under construction is more than and different from the sum of its various national parts At the outset of a new century the interplay of Japanese factors with Chinese American and other national influences is producing a distinctively new East Asian region **The Political Economy of Regionalism in East Asia** H. Yoshimatsu,2008-04-23 An

exploration of the evolution of regionalism and regional economic relations in East Asia since the late 1990s The book analyzes moves towards free trade agreements cooperation in information technology energy and environment and agriculture by highlighting preferences and actions of governmental and business actors **The United States and China**

Narayani Basu,2015-10-05 With its long history of internal divisiveness and its intersecting cultural and linguistic cleavages East Asia is undoubtedly a complex area However the idea of East Asia as a regional entity is one that is relatively recent a concept that gained momentum after the financial crisis that rocked the region in the 1990s In recent years East Asia has become considerably more interdependent connected and cohesive This increased cohesiveness has been driven by a dense network of trade and investments technology sharing and communication among many other variables and has been reflected in the increasing institutionalisation of regional mechanisms like the ASEAN Regionalism is not however entirely about economic interdependence In today s day and age it means not only overarching social networks and a regional identity but also strategic thinking that recognises common security interests This book takes into account the regional

discourses of two of East Asia's biggest players the United States and China. While the former has been a power to reckon with albeit externally deeply entrenched in the region since the end of the Second World War, the rise of China in the 21st century and its emergence as the largest power in East Asia has brought a new perspective to East Asian regionalism. In 2010 the United States began reasserting itself in East Asia bringing into sharp focus the ideological differences between itself and China as each vied to shape the architecture of East Asian security. There is no doubt that heightened American interest comes at a time when China's own views of regionalism have become noticeably less cooperative. While balance of power politics is one way to look at the geopolitical tug of war in East Asia, there are questions that have not yet been answered. How do the two countries look at a region that is so important for them? How has that perception influenced their foreign policy within the same arena? More importantly, how do they define East Asia? This book studies American and Chinese regional discourses from the end of the Cold War to the present day in order to highlight the rationale behind the natural balance of power politics between an established power and a rising one and its subsequent effects on security regionalism in East Asia.

Routledge Handbook of Asian Regionalism Mark Beeson, Richard Stubbs, 2012-03-15. The Routledge Handbook of Asian Regionalism is a definitive introduction to and analysis of the development of regionalism in Asia including coverage of East Asia, Southeast Asia and South Asia. The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world. Significantly, this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of conceptualizing the region, economic issues, political issues, strategic issues, regional organizations. As such, the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic, giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events. This book will be an indispensable resource for students and scholars of Asian politics, international relations and regionalism.

Regionalism and Rivalry Jeffrey A. Frankel, Miles Kahler, 2007-12-01. As Japan's newfound economic power leads to increased political power, there is concern that Japan may be turning East Asia into a regional economic bloc to rival the US and Europe. In *Regionalism and Rivalry*, leading economists and political scientists address this concern by looking at three central questions: Is Japan forming a trading bloc in Pacific Asia? Does Japan use foreign direct investment in Southeast Asia to achieve national goals? Does Japan possess the leadership qualities necessary for a nation assuming greater political responsibility in international affairs? The authors contend that although intraregional trade in East Asia is growing rapidly, a trade bloc is not necessarily forming. They show that the trade increase can be explained entirely by factors independent of discriminatory trading arrangements such as the rapid growth of East Asian economies. Other chapters look in detail at cases of Japanese direct investment in Southeast Asia and find little evidence of attempts by Japan to use the power of its multinational corporations for political purposes. A third group of papers attempt to gauge Japan's leadership characteristics.

They focus on Japan's technology ideology its contributions to international public goods international monetary cooperation and economic liberalization in East Asia

The Evolution of Regionalism in Asia Heribert Dieter, 2007-12-10 This edited volume looks at regional integration processes in Asia Whilst integration in the region defined as Southeast and East Asia is not a new process it has gained momentum in recent years Two developments have acted as catalysts for integration first at the economic level the Asian crisis of 1997 has been the watershed for most countries in the region Ever since there have been continuing search processes for sovereignty enhancing types of economic policies and the region is one location where policy makers look for new avenues to strengthen the position of their countries The second major development is the continuing rise of China in the region Today China is not only the manufacturing powerhouse of the region but it increasingly functions as a benign hegemon in Asia Integration processes in Asia take place at several levels in trade finance and security affairs This book analyses these dimensions of integration and sheds light on the prospects for successful integration It investigates the puzzling sometimes contracting trends of co operation and integration in Asia The contributors to this volume look at a theme that is of growing importance to the discipline of political science as much as it is relevant for policy makers By combining the analysis of the three dimensions of integration *The Evolution of Regionalism in Asia* enables readers to gain a broad understanding of the theory and practice of the integration processes

Regionalism and Globalism in Southeast Asia E. Palmujoki, 2001-10-25 Eero Palmujoki examines the regionalist debate in Southeast Asia from the end of the Cold War up to the beginning of the new millennium He focuses on the organization of the ASEAN Association of Southeast Asian Nations and covers the political economic and security issues characterizing its development The book compares the theoretical debate with political developments in the region from the beginning of the post Cold War period with its rapid economic growth through the Asian economic crisis of 1997 and the resulting restructuring of Southeast Asian regional systems
