Regionalism Multilateralism And Deeper Integration:

Regionalism, Multilateralism, and Deeper Integration Robert Z. Lawrence, 2000-07-26 Over the past decade international economic liberalization has been pursued through both multilateral and regional arrangements In the Uruguay Round more than one hundred governments pledged their commitment to greater open trade in goods and services and established new rules under the enforcement of the World Trade Organization At the same time however many regional arrangements have been negotiated including the European Union and the North American Free Trade Agreement Nonetheless controversy still rages about these arrangements Are regional arrangements stumbling blocks or in fact building blocks for a more integrated and successful international economy In this book Robert A Lawrence addresses this question and explains both sides of the debate A volume of Brookings Integrating National Economies Series **Multilateralizing Regionalism** Patrick Low, Richard Baldwin, 2009-02-19 A collection of revised papers from the Multilateralizing Regionalism conference held at the WTO in September 2007 **Regionalism, Multilateralism, and Economic Integration** Gary P. Sampson, Stephen Woolcock, 2003 This publication considers whether regional trade agreements have led to a new form of economic co operation by promoting deeper integration in the regulatory structures of participating countries An examination of recent experiences are found to show that although there is no single model for deeper integration regional trade agreements have generally more effective than more remote WTO procedures in facilitating trade and improving transparency Regional processes and rules are found to have been consistent with the multilateral obligations of each party with additional commitments in the regional agreements complementing WTO rules *Multilateralism Or Regionalism?* Guido Glania, Jürgen Matthes, 2005 This new book highlights the multifaceted effects of regional trade agreements and outlines the strategic options for EU trade policy It points out what is new about this most recent phase of regionalism and analyzes the effects on economic welfare and trade transaction costs The authors draw upon elements of game theory to explore a self reinforcing mechanism that is resulting in a potentially damaging race for markets They focus in particular on the multiple impacts of regionalism on the WTO and the multilateral trading order The book arrives at an opportune time as the Doha Round is reaching a critical phase **Regionalism In Trade Policy: Essays On Preferential Trading** Arvind Panagariya, 1999-10-18 The signing of the North American Free Trade Agreement NAFTA and recent expansions of the European Union have led to renewed efforts to create preferential trade areas PTAs around the world including Asia Africa and Latin America Because PTAs liberalize trade with union members but not the rest of the world they are not necessarily a healthy development By dividing the world into trade blocs they also threaten to undermine the multilateral trading system This collection of recently published essays by a leading critic of regionalism offers an assessment of the economic impact of PTAs on member countries and the world The first set of essays present a theoretical analysis of the issues using simple economic models and study the relationship between regionalism and multilateralism Subsequent essays evaluate the role of

PTAs in Asia North America and Latin America The general theme of the book is that on balance trade liberalization through PTAs is a mistake Trade diversion and the creation of complicated and discriminatory tariff regimes with increased tariffs for non member countries the consequences of PTAs are likely to undermine the multilateral trading system The book will be useful to academics as well as policy makers and policy analysts Many of the essays have been featured in newspapers and journals such as the Financial Times Economist Journal of Commerce and International Herald Tribune Some of these essays are already on many reading lists in the United States

Regionalism versus Multilateralism L. Alan Winters, 1999

November 1996 Do the forces that regional integration arrangements set up encourage or discourage a trend toward globally freer trade We don't know yet The literature on regionalism versus multilateralism is growing as economists and political scientists grapple with the question of whether regional integration arrangements are good or bad for the multilateral system Are regional integration arrangements building blocks or stumbling blocks in Jagdish Bhagwati's phrase or stepping stones toward multilateralism As economists worry about the ability of the World Trade Organization to maintain the GATT's unsteady yet distinct momentum toward liberalism and as they contemplate the emergence of world scale regional integration arrangements the EU NAFTA FTAA APEC and possibly TAFTA the question has never been more pressing Winters switches the focus from the immediate consequences of regionalism for the economic welfare of the integrating partners to the question of whether it sets up forces that encourage or discourage evolution toward globally freer trade The answer is We don't know yet One can build models that suggest either conclusion but these models are still so abstract that they should be viewed as parables rather than sources of testable predictions Winters offers conclusions about research strategy as well as about the world we live in Among the conclusions he reaches Since we value multilateralism we had better work out what it means and if it means different things to different people make sure to identify the sense in which we are using the term Sector specific lobbies are a danger if regionalism is permitted because they tend to stop blocs from moving all the way to global free trade In the presence of lobbies trade diversion is good politics even if it is bad economics Regionalism's direct effect on multilateralism is important but possibly more so is the indirect effect it has by changing the ways in which groups of countries interact and respond to shocks in the world economy Regionalism by allowing stronger internalization of the gains from trade liberalization seems likely to facilitate freer trade when it is initially highly restricted The possibility of regionalism probably increases the risks of catastrophe in the trading system The insurance incentives for joining regional arrangements and the existence of shiftable externalities both lead to such a conclusion So too does the view that regionalism is a means to bring trade partners to the multilateral negotiating table because it is essentially coercive Using regionalism for this purpose may have been an effective strategy but it is also risky This paper a product of the International Trade Division International Economics Department was prepared for a conference on regional integration sponsored by the Centre for Economic Policy Research La Coruña Spain April 26-27 1996 and will appear in the conference

communication and interaction is more responsive to the realities of interdependent economies in the twenty first century. Nowhere is this more salient than in the area of dispute resolution especially as labour intellectual property and the environment can no longer be evaded in trade negotiations. This ground breaking book suggests that it is this shift in perspective that has given rise to the proliferation of Regional Trade Agreements RTAs and the inevitable overlaps and tensions between their provisions and those of the World Trade Organization WTO. The author examines this phenomenon in great detail and offers viable recommendations to restore coherence in the global trading system without upsetting the rights and obligations of WTO Member States. Because the WTO and RTAs must be viewed as layers of one system and must therefore have a relationship that extends to dispute settlement such principles of subsidiarity as autonomy mutual assistance and flexibility are key to a successful institutional relationship between the WTO and RTAs. From this theoretical springboard the author proceeds to analyse the following issues and more the relationship between WTO and RTAs based on Article XXIV of GATT the extent to which WTO panels can apply RTA law the extent to which the WTO panels can hear RTA claims opportunity for RTA Members to secure preliminary rulings and advisory opinions from the WTO recognition by WTO panels of the results of litigation or arbitration that took place at the RTA level opportunity for RTA Members to appeal RTA dispute settlement decisions to the WTO and clarification of WTO rules designed to enable RTA activities or intervene if necessary. Major cases decided at the WTO and RTA levels that manifest conflict between RTAs and the WTO are fully analysed. Confronting directly the stagnation in negotiating and concluding new trade agreements at the multilateral level and the fragmentation of the international trade law system this important book shows clearly how the institutional relationship between the WTO and RTAs can be restructured with a view to establishing mutual recognition of the judgments of both. In a nutshell the book calls for reconfiguration of WTO Dispute Settlement Body to perform functions of World Trade Court that is capable of hearing disputes arising between WTO Members RTA Members and Non WTO Members. It will prove invaluable to all involved in the negotiation and implementation of trade agreements at every level.
