## **Regions Of The World:**

*A World of Regions* Peter J. Katzenstein, 2015-05-01 Observing the dramatic shift in world politics since the end of the Cold War Peter J. Katzenstein argues that regions have become critical to contemporary world politics. This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization. In detailed studies of technology and foreign investment, domestic and international security, and cultural diplomacy and popular culture, Katzenstein examines the changing regional dynamics of Europe and Asia, which are linked to the United States through Germany and Japan. Regions, Katzenstein contends, are interacting closely with an American imperium that combines territorial and non-territorial powers. Katzenstein argues that globalization and internationalization create open or porous regions. Regions may provide solutions to the contradictions between states and markets, security and insecurity, nationalism and cosmopolitanism. Embedded in the American imperium, regions are now central to world politics.

*WORLD REGIONAL GEOGRAPHY. (PRODUCT ID 23958336).* CAITLIN. FINLAYSON, 2019 **World Regions in Global Context** Sallie A. Marston, Paul L. Knox, Diana M. Liverman, Vincent Del Casino, Paul F. Robbins, 2013-01-14 This edition features the exact same content as the traditional text in a convenient three-hole punched loose-leaf version. Books a la Carte also offer a great value for your students; this format costs 35% less than a new textbook. *World Regions in Global Context* presents a strong global sensibility and an emphasis on current concerns with models of interdependent development, spatial and social inequality, and questions of spatial justice. The authors maintain that regions are the outcomes of a set of twin forces of globalization and regionalization. Therefore, each regional chapter stresses the global systems of connection that drive unique regional processes, making regions different. By studying regions, students not only learn the critical elements of different places but also come to understand the fundamental processes that drive change. The Fifth Edition discusses geographies of emerging regions, incorporates cutting-edge data visualizations and infographics, including Quick Response codes linking to online media, features a completely modernized cartography program, and much more. Package consists of Books a la Carte for *World Regions in Global Context*, *Peoples, Places, and Environments*, 5e **Building Regions** Dr. Luk Van Langenhove, 2013-03-28 Regions: How they emerge and how they are dramatically changing the appearance of the present world of states and its related forms of governance from local to global levels is analysed in this monograph. But what are regions? Regions can be small or huge. They can be part of a single state, be composed out of different states, or stretched out across borders. They can be important, recognized economic, social, or cultural entities, or they can be largely ignored by the people who live on a region's territory. They can be well defined with clear-cut boundaries, as is the case in so-called constitutional regions, or they can be fuzzy, as for instance in cross-border regions. In sum, they are not a natural kind, and defining regions is not a simple task. Luk Van Langenhove advances the concept of region building as an alternative to the construction of regions, with three issues of region building being explored: Why are regions built in a world of states? How do

region building processes take place How are regions transforming the present world order Crossing disciplinary boundaries this book is an exercise in theorizing regions and brings together under one conceptual framework different processes and concepts such as regional integration devolution federalism and separatism and refines the social constructionist view on regions *The Multidimensionality of Regions in World Politics* Paul J. Kohlenberg, Nadine Godehardt, 2020-09-02 This book examines what counts regarding the role and conceptualization of regions in world politics It presents a fresh look at which narratives awake persist fall dormant or re emerge amidst diverse interlocking processes of environmental technological and global political changes It puts forward a thorough and multidimensional conceptualization of regions as embedded in changing overlapping environments and requires more attention to regions shifting materiality temporality and technological underpinnings Combining the approaches questions and analyses of Critical IR and Political Geography it calls for a renewed emphasis on the puzzle of how the contextual environment of regions may become more or less multidimensional or how some aspects of a region's contextual environment may be mutually constitutive in non intuitive ways Ultimately it sheds light on the politics of regions and the regional scale in international politics in order to overcome the often underlying territorial fixity of territory and space within IR approaches This book will be of key interest to scholars and students of international relations international political sociology political geography regionalism geopolitics and area studies **A**
