Regions That Work How Cities And Suburbs Can Grow Together:

Regions That Work Manuel Pastor,2000 *Demolition Means Progress* Andrew R. Highsmith,2016-12-30 Flint Michigan is widely seen as Detroit's Detroit the perfect embodiment of a ruined industrial economy and a shattered American dream In this deeply researched book Andrew Highsmith gives us the first full scale history of Flint showing that the Vehicle City has always seen demolition as a tool of progress During the 1930s officials hoped to renew the city by remaking its public schools into racially segregated community centers After the war federal officials and developers sought to strengthen the region by building subdivisions in Flint's segregated suburbs while GM executives and municipal officials demolished urban factories and rebuilt them outside the city City leaders later launched a plan to replace black neighborhoods with a freeway and new factories Each of these campaigns Highsmith argues yielded an ever more impoverished city and a more racially divided metropolis By intertwining histories of racial segregation mass suburbanization and industrial decline Highsmith gives us a deeply unsettling look at urban industrial America **Remaking New York** William Sites,2003 **Up Against the Sprawl** Jennifer R. Wolch,Manuel Pastor,Peter Dreier,2004 Economists political scientists geographers and urban planners explore how government policy has shaped the development of greater Los Angeles They challenge the myth of market choice and point to the key roles of government policy often driven by business priorities In addition they show how residents are developing innovative approaches to *Urban Growth Management and Its Discontents* Y. Dierwechter,2008-06-23 This book introduces synthesizes and evaluates spatial planning for growth management in the contemporary USA It discusses the neglected relationship between the actual environmental results of various state growth management systems and the geographically diverse politics of discontent with these various systems **Listening to Harlem** David Maurrasse,2014-05-01 Harlem is flourishing Many say a second Renaissance is happening above 120th Street Magic Johnson opened a major theater Bill Clinton has centered his post presidential offices there countless homes have been restored to their former glory and not without controversy many whites are flocking to the neighborhood But what will this gentrification do to Harlem and how will it change life for Harlem's longtime residents As communities and businesses struggle with differing motivations and needs David Maurrasse looks at ways they can work together to form partnerships Listening to Harlem offers an exciting portrait of the struggles confronting one of America's most important neighborhoods This engaging read will appeal to anyone with an interest in how the neighborhood is faring today as well as those involved professionally and socially in urban development **Urban and Regional Policy and its Effects** Margaret Weir,Nancy Pindus,Howard Wial,2012-02-02 The mission of the Urban and Regional Policy and Its Effects series is to inform policymakers practitioners and scholars about the effectiveness of select policy approaches reforms and experiments in addressing the key social and economic problems facing today's cities suburbs and metropolitan areas Volume four of the series introduces and examines thoroughly the concept of regional resilience explaining how resilience can be promoted or impeded by regional

characteristics and public policies The authors illuminate how the walls that now segment metropolitan regions across political jurisdictions and across institutions and the gaps that separate federal laws from regional realities have to be bridged in order for regions to cultivate resilience Contributors Patricia Atkins George Washington University Pamela Blumenthal U S Department of Housing and Urban Development Sarah Ficenec George Washington University Alec Friedhoff Brookings Institution Kathryn Foster University at Buffalo SUNY Juliet Gainsborough Bentley University Edward Hill Cleveland State University Kate Lowe Cornell University John Mollenkopf Graduate Center City University of New York Mai Nguyen University of North Carolina Chapel Hill Manuel Pastor University of Southern California Rolf Pendall Urban Institute Nancy Pindus Urban Institute Sarah Reckhow Michigan State University Travis St Clair George Washington University Todd Swanstrom University of Missouri St Louis Margaret Weir University of California Berkeley Howard Wial Brookings Institution Harold Wolman George Washington University

Planning World Cities Peter Newman, Andy Thornley, 2011-06-21 This major comparative text on urban planning and the global and regional context in which it takes place examines what have been traditionally regarded as world cities New York London Tokyo and also a range of other important cities in America Europe and Asia The authors show the role planning has played in the way cities have responded to the forces of globalization and argue for the importance of diverse rather than one size fits all planning practices This fully revised second edition systematically brings the debates on the impact of globalization right up to date and provides integrated coverage of the latest planning theory and practice It also contains extended analysis of the implications of the rapid growth of Chinese cities such as Shanghai Hong Kong and Beijing New material is included on the impact of globalization on poorer mega cities like Mumbai and Johannesburg

Radical Possibilities Jean Anyon, 2014-03-14 The core argument of Jean Anyon's classic *Radical Possibilities* is deceptively simple if we do not direct our attention to the ways in which federal and metropolitan policies maintain the poverty that plagues communities in American cities urban school reform as currently conceived is doomed to fail With every chapter thoroughly revised and updated this edition picks up where the 2005 publication left off including a completely new chapter detailing how three decades of political decisions leading up to the Great Recession produced an economic crisis of epic proportions By tracing the root causes of the financial crisis Anyon effectively demonstrates the concrete effects of economic decision making on the education sector revealing in particular the disastrous impacts of these policies on black and Latino communities Going beyond lament *Radical Possibilities* offers those interested in a better future for the millions of America's poor families a set of practical and theoretical insights Expanding on her paradigm for combating educational injustice Anyon discusses the Occupy Wall Street movement as a recent example of popular resistance in this new edition set against a larger framework of civil rights history A ringing call to action *Radical Possibilities* reminds readers that throughout U S history equitable public policies have typically been created as a result of the political pressure brought to bear by social movements Ultimately Anyon's revelations teach us that the

current moment contains its own very real radical possibilities

Growing Smarter Robert D. Bullard, 2007-01-12 The smart growth movement aims to combat urban and suburban sprawl by promoting livable communities based on pedestrian scale diverse populations and mixed land use But as this book documents smart growth has largely failed to address issues of social equity and environmental justice Smart growth sometimes results in gentrification and displacement of low and moderate income families in existing neighborhoods or transportation policies that isolate low income populations *Growing Smarter* is one of the few books to view smart growth from an environmental justice perspective examining the effect of the built environment on access to economic opportunity and quality of life in American cities and metropolitan regions The contributors to *Growing Smarter* urban planners sociologists economists educators lawyers health professionals and environmentalists all place equity at the center of their analyses of place space and race They consider such topics as the social and environmental effects of sprawl the relationship between sprawl and concentrated poverty and community based regionalism that can link cities and suburbs They examine specific cases that illustrate opportunities for integrating environmental justice concerns into smart growth efforts including the dynamics of sprawl in a South Carolina county the debate over the rebuilding of New Orleans after Hurricane Katrina and transportation related pollution in Northern Manhattan *Growing Smarter* illuminates the growing racial and class divisions in metropolitan areas today and suggests workable strategies to address them

Urban and Regional Technology Planning Kenneth E. Corey, Mark Wilson, 2006-08-21 Part of the popular *Networked Cities* series *Urban and Regional Technology Planning* focuses on the practice of relational planning and the stimulation of local city regional scale development planning in the context of the global knowledge economy and network society Designed to offer scholars practitioners and decision makers studies on the ways of cities technologies and multiple forms of urban movement intersect and create the contemporary urban environment Kenneth Corey and Mark Wilson explore the dynamics of technology induced change that is taking place within the context of the global knowledge economy and network society Examining first the knowledge economy itself Wilson and Corey go on to discuss its implications before proposing ways to strategize for future intelligent development with particular emphasis on the ALERT model for regional and local planning An important read for those practicing or studying planning in this network society

Governing Urban Regions Through Collaboration Joël Thibert, 2016-04-22 With the demise of the Old Regionalist project of achieving good regional governance through amalgamation voluntary collaboration has become the modus operandi of a large number of North American metropolitan regions Although many researchers have become interested in regional collaboration and its determinants few have specifically studied its outcomes This book contributes to filling this gap by critically re evaluating the fundamental premise of the New Regionalism which is that regional problems can be solved without regional higher government In particular this research asks to what extent does regional collaboration have a significant independent influence on the determinants of regional resilience Using a comparative Canada U S mixed method

approach with detailed case studies of the San Francisco Bay Area the Greater Montreal and trans national Niagara Buffalo regions the book examines the direct and indirect impacts of inter local collaboration on policy and policy outcomes at the regional and State Provincial levels The book research concentrates on the effects of bottom up state mandated and functional collaboration and the moderating role of regional awareness higher governmental initiative and civic capital on three outcomes environmental preservation socio economic integration and economic competitiveness In short the book seeks to highlight those conditions that favor collaboration and might help avoid the collaborative trap of collaboration for its own sake More specifically this research concentrates on the effect of bottom up state mandated and functional collaboration the moderating role of regional awareness governmental initiative and civic capital on environmental preservation socio economic integration and economic competitiveness In short the book seeks to understand whether and how urban regional collaboration contributes to regional resilience

Urban Sprawl Gregory D. Squires, 2002 Urban Sprawl is not simply a development that undercuts the quality of life for suburbanites It has raised alarms across the nation as fair housing advocates environmentalists land use planners and even many suburban employers who cannot find the workers they need have recognized that the costs go far beyond aesthetics Despite the agreement that something needs to be done there is no consensus on what works Urban Sprawl Causes Consequences and Policy Responses assembles leading scholars who analyze the major causes and consequences of urban sprawl and the policy initiatives that are being explored in response to these developments

Neighborhood Decline Ronald van Kempen, Gideon Bolt, Maarten van Ham, 2018-10-18 The global financial and economic crisis that hit the world since 2008 has affected the lives of many people all over the world and resulted in declining incomes rising unemployment foreclosures forced residential moves and cut backs in government expenditure The extent to which the crisis has affected urban neighborhoods and has led to rising intra urban inequalities has not yet received much attention The implemented budget cuts and austerity programs of national and local governments are likely to have hit some neighborhoods more than others The authors of this this book which come from a variety of countries and disciplines show that the economic crisis has affected poor neighborhoods more severely than more affluent ones The tendency of the state to retreat from these neighborhoods has negative consequences for their residents and may even nullify the investments that have been made in many poor neighborhoods in the recent past This book was originally published as a special issue of Urban Geography

Race and Economic Opportunity in the Twenty-First Century Marlene Kim, 2007-06-19 Examining the crucial topic of race relations this book contains contributions from a range of international contributors The authors explore the economic and social environments that play a significant role in determining economic outcomes and why racial disparities persist

The Routledge International Handbook of the Sociology of Education Michael W. Apple, Stephen J. Ball, Luis Armando Gandin, 2009-12-16 This collection brings together the work of a group of the world s leading sociologists of education to explore and address key issues and concerns within the discipline The chapters draw

upon theory and research to provide state of the art accounts of contemporary educational processes global trends and changing and enduring forms of social conflict and social inequality The topics which are addressed are of international relevance and significance **Life in Poverty Neighbourhoods** Jürgen Friedrichs,George Galster,Sako

Musterd,2013-09-13 In contemporary European and American urban policy and politics and in academic research it is typically assumed that spatial concentrations of poor households and or ethnic minority households will have negative effects upon the opportunities to improve the social conditions of those who are living in these concentrations Since the level of concentration tends to be correlated with the level of spatial segregation the debate on segregation is also linked to the social opportunity discussion This book explores the central questions in urban and housing studies Do poor neighbourhoods make their residents poorer Does the neighbourhood structure exert an effect on the residents behavioural attitudinal or psychological even when controlling for individual characteristics of the residents This issue has offered a locus for multi disciplinary investigations on both sides of the Atlantic and this volume demonstrates the rich geographical sociological economic and psychological dimensions of this issue This book was previously published as a special issue of the journal Housing Studies *Remaking American Communities* David C. Soule,2007-11-01 Urban sprawl has gained much national

attention in recent years Sprawl involves not only land use issues but also legal political and social concerns It affects our schools the environment and race relations Comprehensive enough for high school students and also appropriate for college undergraduates *Remaking American Communities* delves into the challenges of urban sprawl by turning to some of America s top thinkers on the problem including Robert Yaro president of the Regional Plan Association Other cutting edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce views about race and class by former mayor of Albuquerque David Rusk and a discussion of transportation dynamics by Curtis Johnson president of the Citistates Group The essays in this collection explore the core issues of sprawl and the agenda for dealing with it Complete with a glossary resources and contact information for smart growth alliances this book is extremely user friendly David C Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue **Governing Urban Economies** Neil Bradford,Allison Bramwell,2014-04-30 Today more

than ever cities matter to the economic and social well being of the vast majority of Canadians Canada s urban centers are simultaneously the engines of the national economy and the places where the risks of social exclusion are most concentrated making innovative and inclusive urban governance an urgent national priority *Governing Urban Economies* is the first detailed scholarly examination of relations among governmental and community based actors in Canadian city regions Comparing patterns of municipal community relations and federal provincial interactions across city regions this volume tracks the ways in which urban coalitions tackle complex economic and social challenges Featuring an inter disciplinary group of established and up and coming scholars this collection breaks new ground in the Canadian urban politics literature

and will appeal to urbanists working in a range of national contexts Governing Metropolitan Areas David K. Hamilton, 2014-04-24 Interest and research on regionalism has soared in the last decade Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance Governing Metropolitan Areas describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance
