Russian Social Science Review ,2008 Demography of Russia Tatiana Karabchuk,Kazuhiro Kumo,Ekaterina Selezneva,2016-11-24 This book examines the demographic development of Russia from the late Russian Empire to the contemporary Russian Federation and includes discussions of marriage patterns fertility mortality and inter regional migration In this pioneering study the authors present the first English language overview of demographic data collection in Russia Chapters in the book offer a systematic overview of the legislation regulating fertility and the family sphere a study of the factors determining first and higher order births and an examination of population distribution across Russian regions The book also combines research tools from the social sciences with a medical approach to provide a study of mortality rates By bringing together approaches from several disciplines demography economics and sociology the authors of this book provide a comprehensive and detailed assessment of the historical roots of Russia s demographic development **The Dictator's Dilemma at the Ballot Box** Masaaki Higashijima,2022 Modern dictatorships hold elections Contrary to our stereotypical views of autocratic politics dictators often introduce elections with limited manipulation wherein they refrain from employing blatant electoral fraud and pro regime electoral institutions Why do such electoral reforms happen in autocracies Do these elections destabilize autocratic rule The Dictator s Dilemma at the Ballot Box explores how dictators design elections and what consequences those elections have on political order It argues that strong autocrats who can effectively garner popular support through extensive economic distribution become less dependent on coercive electioneering strategies When autocrats fail to design elections properly elections backfire in the form of coups protests and the opposition s stunning election victories The book s theoretical implications are tested on a battery of cross national analyses with newly collected data on autocratic elections and in depth comparative case studies of the two Central Asian republics Kazakhstan and Kyrgyzstan The book s findings suggest that indicators of free and fair elections in dictatorships may not be enough to achieve full fledged democratization **The New Russia** Lawrence R. Klein,Marshall I. Pomer,2001 This work delivers the unpopular message that the West has played a pivotal role in the Russian economic disaster of the 1990s The 26 contributions to this book examine this topic which is divided into three parts theory evidence and policy

Spaces of the Poor Hans-Christian Petersen,2014-04-15 What do we know about the urban impoverished areas of the world and the living environment of its inhabitants How did the urban poor cope with their surroundings How did they interpret and adopt urban space in order to fight against their position at the periphery of society This volume takes up these questions and investigates how far approaches of cultural sciences can contribute to overcome the exoticization of the ghetto Lo c Wacquant and instead to look at the heterogeneity and individuality behind the facades It opens new perspectives for the research of poverty and inequalities that do not stop at collective categories *Pastoral practices in High Asia* Hermann

Kreutzmann,2012-03-28 In conventional views pastoralism was classified as a stage of civilization that needed to be abolished and transcended in order to reach a higher level of development In this context global approaches to modernize a rural society have been ubiquitous phenomena independent of ideological contexts The 20th century experienced a variety of concepts to settle mobile groups and to transfer their lifestyles to modern perceptions Permanent settlements are the vivid expression of an ideology driven approach Modernization theory captured all walks of life and tried to optimize breeding techniques pasture utilization transport and processing concepts New insights into other aspects of pastoralism such as its role as an adaptive strategy to use marginal resources in remote locations with difficult access could only be understood as a critique of capitalist and communist concepts of modernization In recent years a renaissance of modernization theory led development activities can be observed Higher inputs from external funding fencing of pastures and settlement of pastoralists in new townships are the vivid expression of modern pastoralism in urban contexts The new modernization programme incorporates resettlement and transformation of lifestyles as to be justified by environmental pressure in order to reduce degradation in the age of climate change *The Mortality Crisis in Transitional Economies* Giovanni Andrea Cornia,Renato Paniccià,2000-08-03

In spite of widespread expectations of improvements in living standards and health conditions in most of the countries of the former Soviet bloc the transition to the market economy was accompanied by a sharp increase in already high death rates Such an increase provoked an excess mortality of some three million people over the period 1989 96 alone an unprecedented phenomenon in peacetime Such a crisis remains poorly explained has generated a limited policy response in the countries concerned and international organizations and is bound to generate important political and economic repercussions This book is the first comprehensive assessment of the mortality crisis in transitional economies of its causes and of its remedies on the basis among others of micro data sets and quasi panels on health trends which have never been used before Contributions by demographers economists sociologists epidemiologists and health experts provide a rigorous analysis of the upsurge in mortality rates with the aim of contributing to the launch of vigorous policies to tackle the crisis **Building Market Institutions in Post-communist Agriculture** David A. J. Macey,William Pyle,Stephen K. Wegren,2004-01-01

Eurasia emerged from the former Soviet states failed agrarian program poised to be a great power in the new global economy In the late 1980 s post communist states put forth an agrarian reform plan that promised whirlwind institutional change as its goal However these amendments did not unleash the efficiency and productivity that privatization and destatizing seemed to promise Editors David Macey William Pyle and Stephen Wegren along with a host of world leading agrarian analyst and practitioners discuss the shortcoming of post communist agrarian reform and reveal how and why particular policies were or were not adopted Building Market Institutions in Post Communist Agriculture draws on country level case studies to analyze various initiatives undertaken by agricultural economies Contributors use a comparative analytical framework to shed light on the complex universal processes of agrarian

transformation that continue to change the social economic and political character of the former Soviet Union

Paradiplomacy in Action Francisco Aldecoa, Dr Michael Keating, 2013-10-23 Offering a general view of the development of subnational foreign action around the world this work covers topics such as the repercussions upon subnational autonomy of the progressive constitution of international regimes such as the EU NAFTA and APEC

Welfare Regimes and the Experience of Unemployment in Europe Duncan Gallie, Serge Paugam, 2000-05-25 The book is the first major study to examine the implications of differences in welfare regimes for the experience of unemployment in Europe It is concerned with three central questions about the way such regimes affect the experience of unemployment The first is how far they protect the quality of life of unemployed people with respect to living standards and the experience of financial hardship The second is their role in mediating the impact of unemployment on the individual's longer term position in the labour market addressing the issue of how far they help to prevent progressive marginalization from the employment structure as a result of motivational change skill loss or the growth of discriminatory barriers The third is how far such regimes mediate the impact of unemployment on social integration in the community for instance with respect to the maintenance or rupture of social networks and the degree of psychological distress experienced by the unemployed The book is the product of a major cross cultural research programme funded by the European Union TSER

bringing together teams from eight countries The emphasis has been on rigorous comparison rather than the all too frequent separate country analyses which usually provide data which differs in format from one country to another In addition to a systematic comparison of national data sources it has been able to make use of a new important data source the European Community Household Panel produced by Eurostat which provides directly comparable information for all EU countries The study shows that institutional and cultural differences have vital implications for the experience of unemployment While welfare policies affect in an important way the pervasiveness of poverty it is above all the patterns of family structure and the culture of sociability in a society that affect vulnerability to social isolation The book concludes by developing a new perspective for understanding the risk of social exclusion Lost to the State Elena Khlinovskaya Rockhill,2010-12-01

Childhood held a special place in Soviet society seen as the key to a better future children were imagined as the only privileged class Therefore the rapid emergence in post Soviet Russia of the vast numbers of vulnerable social orphans or children who have living relatives but grow up in residential care institutions caught the public by surprise leading to discussions of the role and place of childhood in the new society Based on an in depth study the author explores dissonance between new post Soviet forms of family and economy and lingering Soviet attitudes revealing social orphans as an embodiment of a long standing power struggle between the state and the family The author uncovers parallels between post Soviet and Western practices in child welfare and attitudes towards bad mothers and proposes a new way of interpreting kinship where the state is an integral member **Indigenous Peoples, Poverty, and Development** Gillette H.

Hall,Gillette Hall,Harry Anthony Patrinos,2012-04-30 This is the first book that documents poverty systematically for the world s indigenous peoples in developing regions in Asia Africa and Latin America The volume compiles results for roughly 85 percent of the world s indigenous peoples It draws on nationally representative data to compare trends in countries poverty rates and other social indicators with those for indigenous sub populations and provides comparable data for a wide range of countries all over the world It estimates global poverty numbers and analyzes other important development indicators such as schooling health and social protection Provocatively the results show a marked difference in results across regions with rapid poverty reduction among indigenous and non indigenous populations in Asia contrasting with relative stagnation and in some cases falling back in Latin America and Africa Two main factors motivate the book First there is a growing concern among poverty analysts worldwide that countries with significant vulnerable populations such as indigenous peoples may not meet the Millennium Development Goals and thus there exists a consequent need for better data tracking conditions among these groups Second there is a growing call by indigenous organizations including the United Nations Permanent Forum on Indigenous Peoples for solid disaggregated data analyzing the size and causes of the development gap

countries which are now independent entered Russia legally they frequently face bureaucratic obstacles to legal employment and Russian citizenship factors which have led to a very large shadow economy This book presents a comprehensive examination of migrant labour in Russia It describes the nature of migrant labour explores the shadow economy and its unfortunate consequences and discusses the rise of popular sentiment against migrants and the likely impact The book also sets the Russian experiences of migrant labour in context comparing the situation in Russia with that in other countries with significant migrant labour workforces The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The End of Peasantry? Grigorii Viktorovich Ioffe, Tat'iāna Grigor'evna Nefedova, Ilya Zaslavsky, 2006 *The End of Peasantry* examines the dramatic recent decline of agriculture in post Soviet Russia Historically Russian farmers have encountered difficulties relating to the sheer abundance of land the vast distances between population centers and harsh environmental conditions More recently the drastic depopulation of rural spaces decreases in sown acreage and overall inefficiency of land usage have resulted in the disruption and spatial fragmentation of the countryside For many decades rural migration has been a selective process resulting in the most enterprising and self motivated people leaving the rural periphery The new agricultural operators representing nascent but aggressive Russian agribusiness have difficulty co-opting traditional rural communities afflicted by profound social dysfunction The contrast between agriculture in proximity to large cities and in their hinterlands is as sharp as ever and some vacant niches are increasingly occupied by ethnically non Russian migrants All of these conditions existed to some degree in pre Soviet times but they have been exacerbated since Russia took steps toward a market economy Understudied and often underestimated in the West the crisis facing Russian agriculture has profound implications for the political and economic stability of Russia The authors see hope in the significant increase in land use intensity on vastly diminished farmland The lessons gathered from this thoroughly researched study are far reaching and relevant to the disciplines of Slavic and European studies agriculture political science economics and human geography

Federalism and International Relations Hans J. Michelmann (red.), Panayotis Soldatos, 1990 *Federalism and International Relations* is the first comparative study of an increasingly important phenomenon the international role and activities of component units of major liberal democratic federal States The first part of the book identifies common concepts and themes and explores the reasons for the proliferation of paradiplomatic activities by these non traditional actors on the international scene The subsequent chapters focus on the international role of

subnational units in individual countries Austria Australia Canada the Federal Republic of Germany Switzerland and the USA the authors also consider the case of Belgium not formally a federation but operating to all intents and purposes like one They examine in detail the nature and history of foreign policy federalism of these units and the scope and variety of their international activities They also explore such topics as the constitutional and institutional contexts in which paradiplomatic activity by component units takes place and the factors which motivate these international activities in each federal State Finally they assess the implications of the paradiplomatic activities for the conduct of foreign policy in each federation

Foreign Relations and Federal States Brian Hocking, 1993 Growing out of an international conference held in London in March 1992 this volume provides a study of the problem of managing foreign policy in federal states during a period of intensifying international interdependence It examines the problem through a comparative study of American Canadian Australian and German experience and at the same time looks at related developments that are taking place within the European Community Annotation copyright by Book News Inc Portland OR
