Regulation Deregulation Casebook 2nd:

Responsive Regulation Ian Ayres, John Braithwaite, 1995-02-16 This book transcends current debate on government regulation by lucidly outlining how regulations can be a fruitful combination of persuasion and sanctions The regulation of business by the United States government is often ineffective despite being more adversarial in tone than in other nations The authors draw on both empirical studies of regulation from around the world and modern game theory to illustrate innovative solutions to this problem Their ideas include an argument for the empowerment of private and public interest groups in the regulatory process and a provocative discussion of how the government can support and encourage industry self regulation

Reinsurance Regulation: A Contemporary and Comparative Study Wallace Wang, 2003-01-01 We seem to be living at a time when insurance is strained to the breaking point From hurricanes and earthquakes to terrorist attacks and threats of nuclear devastation enormous risks to life and property and accompanying liabilities proliferate on an unprecedented scale Insurer insolvency is not yet common but it is not unusual either And at the root of such failures often lies the compound failure of uncollectable reinsurance This important book proposes that a significant part of the emerging insurance crisis results from inadequate regulation of reinsurance In a detailed and cogent analysis of what an effective regulatory regime for reinsurance must entail the author examines such factors as the following direct supervision of reinsurers versus supervision of reinsurance policies models from developed countries US UK EU and international organisations Organization for Economic Cooperation and Development International Association of Insurance Supervisors the importance of taking legal and economic differences into account while applying models the problem of local protectionism especially in developing countries the dismantling of trade barriers in the reinsurance industry global harmonization of reinsurance regulation the role of reinsurance intermediaries finite risk reinsurance insurance linked securities The author's concluding chapter presents an essential legal infrastructure that allows for efficiency security and individual market characteristics Professor Wang then applies this framework to the Taiwanese insurance market demonstrating convincingly how his proposed regime can solve specific problems while respecting Taiwan's distinct market environment As a meticulously considered appraisal of and solution to a world problem that is growing quickly and uncontrollably Reinsurance Regulation will be of immense value to lawyers professors academics and officials who deal with any facet of economic law

problematización permanente de la materia que visita entregando a los abogados alumnos jueces y legisladores un análisis pormenorizado y de frontera de la totalidad de las normas y principios del llamado Orden Público Económico o Constitución Económica

A Casebook on Labour Law Ewan McGaughey, 2018-11-29 A Casebook on Labour Law supports every university labour or employment law course in the UK set within European Union and international law It covers history and theory contract and rights participation equality and job security It also has chapters on essential topics for modern labour policy the right to vote for company boards in work councils and pension funds and laws to achieve full employment by ending underpaid underemployment Each chapter summarises further reading from noteworthy books and journals and follows a unified conceptual structure This aims to transcend historic divisions between common law or statute private or public and national or international law The book invites the reader to engage in the economic and social evidence about labour law's empirical consequences and political principles

Law and Administration Carol Harlow, Richard Rawlings, 2009-08-20 A contextualised study setting out the foundations of administrative law with discussion of case law and legislation to show practical application

Subject Guide to Books in Print, 2001 *Emissions Trading Schemes* Sanja Bogojevic, 2013-07-04 Over the last four decades emissions trading has enjoyed a high profile in environmental law scholarship and in environmental law and policy Much of the discussion is promotional preferring emissions trading above other regulatory strategies without however engaging with legal complexities embedded in conceptualising scrutinising and managing emissions trading regimes The combined effect of these debates is to create a perception that emissions trading is a straightforward regulatory strategy imposable across various jurisdictions and environmental settings This book shows that this view is problematic for at least two reasons First emissions trading responds to distinct environmental and non environmental goals including creating profit centres substituting bureaucratic control of resources and ensuring regulatory compliance This is important as the particular purpose entrusted to a given emissions trading regime has as its corollary a particular governance structure according to which the regime may be constructed and managed and which trusts the emissions market the state and rights in emissions allowances with distinct roles Second the governance structures of emissions trading regimes are culture specific which is a significant reminder of the importance of law in understanding not only how emissions trading schemes function but also what meaning is given to them as regulatory strategies This is shown by deconstructing emissions trading discourses that is by inquiring into the assumptions about emissions trading as featuring in emissions trading scholarship and in debates involving law and policymakers and the judiciary at the EU level Ultimately this book makes a strong argument for reconfiguring the common understanding of emissions trading schemes as regulatory strategies and sets out a framework for analysis to sustain that reconfiguration

Strategic Financial Management Casebook Rajesh Kumar, 2017-01-05 Strategic Financial Management Casebook strategically uses integrative case studies cases that do not emphasize specific subjects such as capital budgeting or value based management to provide a framework

Regulation and Deregulation Jeffrey L. Harrison, Thomas D. Morgan, Paul R. Verkuil, 2004 Cases and materials are new with heavy emphasis on developments in the 1990s Constitutional cases in areas such as takings commercial speech and affirmative action are collected in a chapter designed to put the economic issues in a broader context Designed for use in a traditional two or three credit classroom format or in a seminar that provides an opportunity for students to write papers in specific

substantive areas Global Business, Local Law Amanda Perry-Kessaris, 2016-04-22 This volume establishes a theoretical framework for exploring the role of host state legal systems courts and bureaucracies in mediating relations between foreign investment civil society and government actors It then demonstrates the application of that framework in the context of the south Indian city of Bengaluru formerly Bangalore Drawing on the law and community approach of Roger Cotterrell the volume identifies three mechanisms through which law might in theory ensure that social relations are productive by expressing any mutual trust which may hold actors together by ensuring that actors participate fully in social life and by coordinating the differences that hold actors apart Empirical data reveals that each of these legal mechanisms is at work in Bengaluru However their operation is limited and skewed by the extent to which actors use abuse and or avoid them Furthermore these legal mechanisms are being eroded as a direct result of the World Bank s investment climate discourse which privileges the interests and values of foreign investors over those of other actors **The AALS Directory of Law Teachers** ,1999 **Modern Project Finance** Benjamin C. Esty, 2003-10-17 This cutting edge financial casebook is divided into four modules Structuring Projects Valuing Projects Managing Project Risk and Financing Projects The cases have been carefully selected to reflect actual use of project finance over the past five years in terms of geographic location the cases come from 15 different countries and industrial sectors Benjamin Esty of the Harvard Business School is one of the leading scholars in project finance Project finance is becoming the financing mechanism of choice for many private firms Cases require the reader to integrate knowledge from multiple disciplines when making a single managerial decision This integration of functional areas such as strategy operations ethics and human resource management encourages the reader to adopt a more integrative perspective and understanding of the interconnectedness of managerial decision making
