Regulation of Desire Gary William Kinsman, 1987 Mortal Subjects Christina Howells, 2011-12-12 This wide ranging and challenging book explores the relationship between subjectivity and mortality as it is understood by a number of twentieth century French philosophers including Sartre Lacan Levinas and Derrida Making intricate and sometimes unexpected connections Christina Howells draws together the work of prominent thinkers from the fields of phenomenology and existentialism religious thought psychoanalysis and deconstruction focussing in particular on the relations between body and soul love and death desire and passion From Aristotle through to contemporary analytic philosophy and neuroscience the relationship between mind and body psyche and soma consciousness and brain has been persistently recalcitrant to analysis and emotion or passion is the locus where the explanatory gap is most keenly identified This problematic forms the broad backdrop to the work's primary focus on contemporary French philosophy and its attempts to understand the intimate relationship between subjectivity and mortality in the light not only of the death

of the classical subject but also of the very real frailty of the subject as it lives on finite desiring embodied open to alterity and always incomplete Ultimately Howells identifies this vulnerability and finitude as the paradoxical strength of the mortal subject and as what permits its transcendence Subtle beautifully written and cogently argued this book will be invaluable for students and scholars interested in contemporary theories of subjectivity as well as for readers intrigued by the perennial connections between love and death

Risk Regulation at Risk Sidney Shapiro, Robert Glicksman, 2002-09-25 In the 1960s and 1970s Congress enacted a vast body of legislation to protect the environment and individual health and safety Collectively this legislation is known as risk regulation because it addresses the risk of harm that technology creates for individuals and the environment In the last two decades this legislation has come under increasing attack by critics who employ utilitarian philosophy and cost benefit analysis The defenders of this body of risk regulation by contrast have lacked a similar unifying theory In this book the authors propose that the American tradition of philosophical pragmatism fills this vacuum They argue that pragmatism offers a better method for conceiving of and implementing risk regulation than the economic paradigm favored by its critics While pragmatism offers a methodology in support of risk regulation as it was originally conceived it also offers a perspective from which this legislation can be held up to critical appraisal The authors employ pragmatism to support risk regulation but pragmatism also leads them to agree with some of the criticisms against it and even to level new criticisms of their own In the end the authors reject the picture painted by risk regulation's critics of widely excessive and irrational regulation but the pragmatic perspective also leads them to propose a number of recommendations for useful reforms to risk regulation

The Radicality of Love Srećko Horvat, 2016-01-11 What would happen if we could stroll through the revolutionary history of the 20th century and without any fear of the possible responses ask the main protagonists from Lenin to Che Guevara from Alexandra Kollontai to Ulrike Meinhof seemingly naïve questions about love Although all important political and social changes of the 20th century included heated debates on the role of love it seems that in the 21st century of new technologies of the self Grindr Tinder online dating etc we are faced with a hyperinflation of sex not love By going back to the sexual revolution of the October Revolution and its subsequent repression to Che's dilemma between love and revolutionary commitment and to the period of 68 from communes to terrorism and its commodification in late capitalism the Croatian philosopher Srećko Horvat gives a possible answer to the question of why it is that the most radical revolutionaries like Lenin or Che were scared of the radicality of love What is so radical about a seemingly conservative notion of love and why is it anything but conservative This short book is a modest contribution to the current upheavals around the world from Tahrir to Taksim from Occupy Wall Street to Hong Kong from Athens to Sarajevo in which the question of love is curiously surprisingly absent

Christianity and Sexuality in the Early Modern World Merry E. Wiesner, 2000 In this global survey of Christianity and sexuality in the early modern period Merry Wiesner Hanks assesses the role of personal faith and the Church itself in the control and expression of all aspects of sexuality

Aberrations in Black Roderick A. Ferguson, 2004 The sociology of race relations in America typically describes an intersection of poverty race and economic discrimination But what is missing from the picture sexual difference can be as instructive as what is present In this ambitious work Roderick A Ferguson reveals how the discourses of sexuality are used to articulate theories of racial difference in the field of sociology He shows how canonical sociology Gunnar Myrdal Ernest Burgess Robert Park Daniel Patrick Moynihan and William Julius Wilson has measured African Americans unsuitability for a liberal capitalist order in terms of their adherence to the norms of a heterosexual and patriarchal nuclear family model In short to the extent that African Americans culture and behavior deviated from those norms they would not achieve economic and racial equality *Aberrations in Black* tells the story of canonical sociology's regulation of sexual difference as part of its general regulation of African American culture Ferguson places this story within other stories the narrative of capital's emergence and development the histories of Marxism and revolutionary nationalism and the novels that depict the gendered and sexual idiosyncrasies of African American culture works by Richard Wright Ralph Ellison James Baldwin Audre Lorde and Toni Morrison In turn this book tries to present another story one in which people who presumably manifest the dysfunctions of capitalism are reconsidered as indictments of the norms of state capital and social science Ferguson includes the first ever discussion of a new archival discovery a never published chapter of *Invisible Man* that deals with a gay character in a way that complicates and illuminates Ellison's project Unique in the way it situates critiques of race gender and sexuality within analyses of cultural economic and epistemological formations Ferguson's work introduces a new mode of discourse which Ferguson calls queer of color analysis that helps to lay bare the mutual distortions of racial economic and sexual portrayals within sociology A hard hitting look at the regulation of sexual difference and its role in circumscribing African American culture
