### **The Changing Postal and Delivery Sector** Michael Crew,Pier Luigi Parcu,Timothy

Brennan,2017-01-20 This book addresses some of the major issues facing postal and delivery services throughout the world

Postal operators worldwide have been slow to address the threats from and opportunities created by electronic competition. The European Commission and member states are wrestling with these issues while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation. The Postal Accountability and Enhancement Act of 2006 in the U S exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery. Comprised of original essays by prominent researchers in the field, this book addresses the new reality of the postal industry and proposes ways in which postal operators might reinvent themselves. Issues discussed include cross border parcel delivery, e commerce, the transformation of postal networks and the effects of postal liberalization. This book will be of interest to postal operators, regulatory commissions, consulting firms, competitors and customers, experts in the postal economics, law and business, and those charged with the responsibility for designing and implementing postal sector policies. Researchers in regulatory economics, transportation technology and industrial organization will also find useful information in this volume.

**Multi-Modal Competition and the Future of Mail** Michael A. Crew, Paul R. Kleindorfer, 2012. This compilation of original papers selected from the 19th Conference on Postal and Delivery Economics and authored by an international cast of economists, lawyers, regulators and industry practitioners addresses perhaps the major problem that has ever faced the postal sector: electronic competition from information and communication technologies (ICT). This has increased significantly over the last few years with a consequent serious drop in mail volume. All postal services have been hard hit by ICT but probably the hardest hit is the United States Postal Service which has lost almost a quarter of its mail volume since 2007. The loss of mail volume has a devastating effect on scale economies which now work against post offices, forcing up their unit costs. Strategies to stem the loss in volume include non linear pricing or volume discounts, increased efficiency and the development of new products. This loss of mail volume from ICT is one of a number of current problems addressed in this volume. The Universal Service Obligation (USO) continues to be a leading issue and concern that ICT undermines postal services' ability to finance the USO is discussed. The importance of measuring and forecasting demand and costs take on even greater importance as ICT undermines the foundations of the postal business. This thought provoking book brings to bear new analyses of the most serious threat post offices have ever faced and raises fundamental questions as to the future of mail. **Multi Modal Competition and the Future of Mail** is an ideal resource for students, researchers in regulation and competition law, postal administrations, policy makers, consulting firms and regulatory bodies.

**Handbook of Worldwide Postal Reform** Michael A. Crew, Paul R. Kleindorfer, James I. Campbell, 2009-01-01. The postal and delivery sector has been the subject of considerable interest in recent years. This book brings together a number of contributions directed at understanding developments in the field of postal reform. The authors review the experience and plans of individual countries to provide some perspective on the problems faced in the area and the varied approaches being taken to address it. They also review key elements of policy and

strategy that are important in this debate

**The Future of the Postal Sector in a Digital World** Michael Crew, Timothy J. Brennan, 2015-11-28 Worldwide postal operators have been slow to address the threats from and opportunities created by electronic competition The European Commission and member states are wrestling with these issues while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation The Postal Accountability and Enhancement Act of 2006 in the U S exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery A major aim of this book is to examine policies to address postal operations in a digital world and ways in which postal operators might reinvent themselves to respond to threats and exploit opportunities Potential opportunities examined include parcels e commerce digital delivery regulatory innovations and pricing This book will be of interest to postal operators regulatory commissions consulting firms competitors and customers experts in the postal economics law and business and those charged with the responsibility for designing and implementing postal sector policies Researchers in regulatory economics transportation technology and industrial organization will also find considerable food for thought in this volume

**The Economics of the Postal and Delivery Sector** Pier Luigi Parcu, Timothy J. Brennan, Victor Glass, 2022-03-24 The book addresses the most recent challenges faced by the postal and delivery sector This book includes original essays by prominent researchers and practitioners in the field of postal and delivery economics originally presented at the 28th Conference on Postal and Delivery Economics held online December 1 5 2020 Chapters discuss topics such as the sustainability of the universal service obligations USO quality of service last mile solutions competition in liberalized markets data protection environmental sustainability and the impact of the COVID 19 pandemic This book will be a useful tool not only for graduate students and professors interested in postal and regulatory economics but also for postal administrations consulting firms and federal government departments

Postal and Delivery Innovation in the Digital Economy Michael A. Crew, Timothy J. Brennan, 2014-12-12 Worldwide postal and delivery economics is the subject of considerable interest The postal industry s business model is in drastic need of change Notably the European Commission and member states are still wrestling with the problems of implementing liberalization of entry into postal markets addressing digital competition and maintaining the universal service obligation In the United States the Postal Accountability and Enhancement Act of 2006 has perhaps exacerbated some of the problems faced by the United States Postal Service USPS Currently the USPS has serious financial problems because of difficulties it faces in making changes and the failure of the Act to address problems that have been long standing Electronic competition is severe and affects post offices POs worldwide which have been slow to address the threat This book addresses this new reality and includes discussion of how POs may attempt to reinvent themselves Parcels and packets will play a major role in developing new business models for postal operators This book is of use not only to students and researchers interested in the field but also to postal operators consulting firms utilities regulatory commissions Federal
