**Administration** Aimee L. Franklin, Jos C.N. Raadschelders, 2023-07-26 This undergraduate textbook introduces students to the subjects of public administration government and governance It provides an accessible and informative overview of the various substantive areas that comprise the study of public administration drawing on examples and case studies from around the world The opening chapters outline some of the basics of the political administrative institutional arrangements for governing The following chapters introduce students to the fundamentals of public administration Study questions supplemental guidance for instructors and a glossary of terms will be useful for both students and teachers *International Contracts and National Economic Regulation: Dispute Resolution Through International Commercial Arbitration* Mahmood Bagheri, 2000-12-06 The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law conflict of laws contract law and economic regulations are functionally united to resolve international and multifaceted regulatory disputes He identifies the normative foundation of contract law as an important determinant in this process contending that contract law is essentially neutral and underpinned by the concept of corrective justice while economic regulations are mainly prompted by distributive justice Applying this corrective distributive justice dichotomy to international contracts the author critically assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total failure of the contract *Taking Stock of Environmental Assessment* Jane Holder, Donald McGillivray, 2007-11-13 Examining the relationship between law environmental governance and the regulation of decision making this volume both reflective and contextual in approach uses a wide range of theories to explore the key features of modern environmental assessment
