Rehabilitation And Maintenance Of Drains And Sewers:

The Rehabilitation and Maintenance of Drains and Sewers Dietrich Stein, 2001-09-19 This is the shortened English language version of the German volume published in 1989 and omits those contributions and passages that refer only to German laws or which have little relevance outside Germany It includes additional texts especially on the relevant European norms and the canon of the Abwassertechnische Vereinigung German Waste Water Technology Association as well as the latest research and development reports The result is a comprehensive overview of the technology currently available for wastewater management and systems plus the relevant norms with special emphasis on maintenance cleaning inspection and reconstruction A number of European systems are used to describe in detail pipe materials and connections pipework specific framework conditions and their changes since the development of modern drains and sewers in the 19th century The book also lists causes and effects of various types of damage and their assessment in terms of hydraulics environmental relevance and construction since this is a basic prerequisite for the choice of suitable rehabilitation measures and their implementation Readers are thus not only provided with a comprehensive presentation of all internationally practised rehabilitation processes and their fields of application but are also given advice on their selection on the formulation of tenders cost and cost efficiency

Geotechnical Engineering Handbook, Procedures Ulrich Smolczyk, 2003-03-14 Volume 2 of the Handbook covers the geotechnical procedures used in manufacturing anchors and piles as well as for improving or underpinning foundations securing existing constructions controlling ground water excavating rocks and earth works It also treats such specialist areas as the use of geotextiles and seeding

Sewer System Infrastructure Analysis and Rehabilitation, 1991 Recommendations on Excavations Deutsche Gesellschaft für Geotechnik, 2003-11-14 The aim of these recommendations is to harmonize and further develop the methods according to which excavations are prepared calculated and carried out Since 1980 these have been drawn up by the working group for excavations at the German Society for Geotechnics Deutsche Gesellschaft für Geotechnik under the name EAB and are similar to a set of standards All the main software programs in Germany are based on these recommendations The recommendations help in designing and calculating excavation constructions unifying approaches to loads and methods of calculation Since they are based on an approved global safety concept following these recommendations ensures the stability and usability of excavations and their individual components Furthermore they help to improve the profitability of excavation constructions The result is a work of major importance for all experts concerned with the planning and calculation of excavations

Water Services Management David Stephenson, 2005-03-01 Water services include water supply sewerage and stormwater drainage The facilities needed for these services are pipelines reservoirs and treatment works but the service goes beyond the infrastructure It includes economics billing and business management Although these services exist in every city being advanced by the growing use of automation and information technology costs are also increasing without many consumers seeing increased benefits

Customer service is therefore becoming important to the industry Water Services Management is intended to educate engineers to manage and improve water services rather than simply designing and constructing treatment works and distribution systems The text covers water supply and drainage from the hydraulic and economic points of view and while design and construction practices are reviewed the focus of the book is on improving existing systems to turn the emerging industry into an attractive business Topics covered include Potable water supply sewerage and stormwater drainage Hydraulic management storage peak flow attenuation and pumping Water quality standards pollution control and treatment Infrastructure management rehabilitation reconstruction upgrading and maintenance Economic efficiency asset management privatization and risk analysis Improving economic viability via efficient use of energy and construction project management Characteristics encountered in developing countries are also considered including Low cost sanitation water supply standards and off grid energy sources Capacity building and appropriate technologies Financing operation and benchmarking
