The Bulletin of the Hegel Society of Great Britain ,1990 Zweckbegriff und Organismus Georg Toepfer,2004 Welche Rolle spielen die Begriffe des Zwecks und der Funktion für die Biologie und die Bestimmung ihres Grundbegriffs des Organismus Offensichtlich sind diese Begriffe fest in der Sprache der Biologie verankert So sprechen Biologen davon dass einem Herzen der Zweck des Antriebs des Blutkreislaufs zukommt oder dass ein Verhalten die Funktion der Ernährung hat Warum ist diese Begrifflichkeit innerhalb der Naturwissenschaften aber allein in der Biologie etabliert und wie kann sie begründet und gerechtfertigt werden ohne zu einer berholten Naturteleologie im Sinne einer gütlichen Zwecksetzung zurückzuführen Diese weit in die Philosophiegeschichte zurückreichenden Fragen werden in der vorliegenden Studie in Auseinandersetzung mit der klassischen Tradition und der modernen Diskussion untersucht Das Ergebnis der Arbeit führt auf den Zusammenhang von teleologischer Beurteilung und der Auszeichnung organisierter Systeme in der Natur Im Anschluss an die Position Kants wird ein eigener Standpunkt entwickelt der die These enthaltet dass die Beurteilung von Naturgegenständen nach Zwecken der Biologie erst ihren spezifischen Gegenstand verschafft Es geht

damit um den Zweckbegriff in seiner methodischen Rolle für die Konstituierung der Biologie als eigenständige Wissenschaft

Dialektik und Reflexion Andreas Arndt, 1994-01-01 Unter den Begriffen mit denen die Philosophie es zu tun hat sind wenige derart vielgestaltig und umstritten wie Dialektik Reflexion und Vernunft Hier wird nun ein ganzlich neuer Ansatz zur historischen Klärung und systematischen Neubestimmung der Tragweite dieser drei Begriffe vorgestellt und ihr Verhältnis zueinander anders als in nur kritischer Fortschreibung der Tradition gefaßt

Brockmeier, Mühlhäuser, 1998-11-12 In this interdisciplinary examination of the discourse of environmentalism the authors explore the linguistic philosophical psychological and cultural historical aspects of environmental discourse rather than environmental phenomena themselves This volume is not advocacy on environmentalism rather it is an analysis of the means of persuasion and the techniques of advocacy used by both sides of the environmental debate between conservationists and conservatives The book includes an analysis of the concepts of time and space in their linguistic manifestations Another theme is the interdependencies of the natural world with political and economic institutions

Barbara Arizti Martin **The Mind As a Scientific Object** Christina E. Erneling, David M. Johnson, 2005-01-13 What holds

together the various fields that are supposed to constitute the general intellectual discipline that people now call cognitive science In this book Erneling and Johnson identify two problems with defining this discipline First some theorists identify the common subject matter as the mind but scientists and philosophers have not been able to agree on any single satisfactory answer to the question of what the mind is Second those who speculate about the general characteristics that belong to cognitive science tend to assume that all the particular fields falling under the rubric psychology linguistics biology and so on

on are of roughly equal value in their ability to shed light on the nature of mind This book argues that all the cognitive science disciplines are not equally able to provide answers to ontological questions about the mind but rather that only neurophysiology and cultural psychology are suited to answer these questions However since the cultural account of mind has long been ignored in favor of the neurophysiological account Erneling and Johnson bring together contributions that focus especially on different versions of the cultural account of the mind **Literacy, Narrative and Culture** Jens Brockmeier,David R Olson,Min Wang,2013-12-16 An important contribution to the multi disciplinary study of literacy narrative and culture this work argues that literacy is perhaps best described as an ensemble of socially and historically embedded activities of cultural practices It suggests viewing written language producing and distributing deciphering and interpreting signs are closely related to other cultural practices such as narrative and painting The papers of the first and second parts illustrate this view in contexts that range from the pre historical beginnings of tracking signs in hunter gatherer cultures and the emergence of modern literate traditions in Europe in the 17th to 19th century to the future of electronically mediated writing in times of the post Gutenberg galaxy The chapters of the third present results of recent research in developmental and educational psychology Contributions by leading experts in the field make the point that there is no theory and history of writing that does not presuppose a theory of culture and social development At the same time it demonstrates that every theory and history of culture must unavoidably entail a theory and history of writing and written culture This book brings together perspectives on literacy from psychology linguistics history and sociology of literature philosophy anthropology and history of art It addresses these issues in plain language not coded in specialized jargon and addresses a multi disciplinary forum of scholars and students of literacy narrative and culture *The Travelling Concepts of Narrative* Mari Hatavara,Lars-Christer Hydén,Matti Hyvärinen,2013-06-15 Narrative is a pioneer concept in our trans disciplinary age For decades it has been one of the most successful catchwords in literature history cultural studies philosophy and health studies While the expansion of narrative studies has led to significant advances across a number of fields the travels for the concept itself have been a somewhat more complex Has the concept of narrative passed intact from literature to sociology from structuralism to therapeutic practice or to the study of everyday storytelling In this volume philosophers psychologists literary theorists sociolinguists and sociologists use methodologically challenging test cases to scrutinize the types transformations and trajectories of the concept and theory of narrative The book powerfully argues that narrative concepts are profoundly relevant in the understanding of life experience and literary texts Nonetheless it emphasizes the vast contextual differences and contradictions in the use of the concept **The Varieties of Religious Experience** Michel Ferrari,2002 William James published his classic work on the psychology of religion The Varieties of Religious Experience in 1902 To mark the centenary leading contemporary scholars reflect on changes in our understanding of the questions James addressed 03-03-2024,中国科学院,中国科学院语言研究所 会议
