**Reinhabiting a Separate Country** Peter Berg,1978      **The Bioregional Imagination** Tom Lynch,Cheryll

Glotfelty,Karla Armbruster,2012 Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective Although bioregional ideas occur regularly in ecocritical writing until now no systematic effort has been made to outline the principles of bioregional literary criticism and to use it as a way to read write understand and teach literature The twenty four original essays here are written by an outstanding selection of international scholars The range of bioregions covered is global and includes such diverse places as British Columbia s Meldrum Creek and Italy s Po River Valley the Arctic and the Outback There are even forays into cyberspace and outer space In their comprehensive introduction the editors map the terrain of the bioregional movement including its history and potential to inspire and invigorate place based and environmental literary criticism Responding to bioregional tenets this volume is divided into four sections The essays in the Reinhabiting section narrate experiments in living in place and restoring damaged environments The Rereading essays practice bioregional literary criticism both by examining texts with strong ties to bioregional paradigms and by opening other less obvious texts to bioregional analysis In Reimagining the essays push bioregionalism to evolve by expanding its corpus of texts coupling its perspectives with other approaches or challenging its core constructs Essays in the Renewal section address bioregional pedagogy beginning with local habitat studies and concluding with musings about the Internet In response to the environmental crisis we must reimagine our relationship to the places we inhabit This volume shows how literature and literary studies are fundamental tools to such a reimagining      **Bioregionalism** Michael Vincent

McGinnis,2005-07-28 Bioregionalism is the first book to explain the theoretical and practical dimensions of bioregionalism from an interdisciplinary standpoint focusing on the place of bioregional identity within global politics Leading contributors from a broad range of disciplines introduce this exciting new concept as a framework for thinking about indigenous peoples local knowledge globalization science global environmental issues modern society conservation history education and restoration Bioregionalism s emphasis on place and community radically changes the way we confront human and ecological issues      **Bioregion and Indigeneity in Literary Imagination** Aleena Manoharan,2023-06-16 This book highlights the

representation of the interface between nature and culture in literary texts and argues that bioregional exegesis of indigenous literatures sensitizes us to place based cultural nuances and can contribute to alleviating the eco cultural apartheid of the modern era Though the bioregional concept has been in vogue since 1970s it has not been adequately adopted into the field of literary criticism This book is a comprehensive study on the concept of the bioregion and is distinctive in three ways Firstly it argues that the bioregional concept hitherto used as a socio political tool can be theorized as an ecocritical tool to employ when reading literary works Secondly it provides a detailed analysis of the concept of bioregion marking out its characteristic features Thirdly in choosing to deal with Aboriginal plays the book again exhibits its

distinctiveness in demonstrating how ecocritical concepts which hitherto have focused primarily on prose fictional works can be extended to magnify the scope of plays and performances Mexican Americans and the Environment Devon G.

Peña, 2022-09-13 Mexican Americans have traditionally had a strong land ethic believing that humans must respect la tierra because it is the source of la vida As modern market forces exploit the earth communities struggle to control their own ecological futures and several studies have recorded that Mexican Americans are more impacted by environmental injustices than are other national origin groups In our countryside agricultural workers are poisoned by pesticides while farmers have lost ancestral lands to expropriation And in our polluted inner cities toxic wastes sicken children in their very playgrounds and homes This book addresses the struggle for environmental justice grassroots democracy and a sustainable society from a variety of Mexican American perspectives It draws on the ideas and experiences of people from all walks of life activists farmworkers union organizers land managers educators and many others who provide a clear overview of the most critical ecological issues facing Mexican origin people today The text is organized to first provide a general introduction to ecology from both scientific and political perspectives It then presents an environmental history for Mexican origin people on both sides of the border showing that the ecologically sustainable Norte o land use practices were eroded by the conquest of El Norte by the United States It finally offers a critique of the principal schools of American environmentalism and introduces the organizations and struggles of Mexican Americans in contemporary ecological politics Devon Pe a contrasts tenets of radical environmentalism with the ecological beliefs and grassroots struggles of Mexican origin people then shows how contemporary environmental justice struggles in Mexican American communities have challenged dominant concepts of environmentalism Mexican Americans and the Environment is a didactically sound text that introduces students to the conceptual vocabularies of ecology culture history and politics as it tells how competing ideas about nature have helped shape land use and environmental policies By demonstrating that any consideration of environmental ethics is incomplete without taking into account the experiences of Mexican Americans it clearly shows students that ecology is more than nature study but embraces social issues of critical importance to their own lives Going Local Michael Shuman, 2013-06-17

National drug chains squeeze local pharmacies out of business while corporate downsizing ships jobs overseas All across America communities large and small are losing control of their economies to outside interests Going Local shows how some cities and towns are fighting back Refusing to be overcome by Wal Marts and layoffs they are taking over abandoned factories switching to local produce and manufactured goods and pushing banks to loan money to local citizens Shuman details how dozens of communities are recapturing their own economies with these new strategies investing not in outsiders but in locally owned businesses **In Service of The Wild** Stephanie Mills, 1996-10-31 In Service of the Wild begins and ends on the author's home ground thirty five acres of farmed out land now planted in Scotch pine monoculture Mills imagines her northern Michigan landscape from its barren glaciated past to its climax as maplebeech hardwood forest to the

ways in which logging slash fires and agriculture transformed the Northwoods ecology With her trademark humor and humility Mills invites the reader along as she learns to dig up plant anew and generally to assist the regenerative processes of time and nature

*Shakespeare and Ecology* Randall Martin, 2015 Shakespeare and Ecology is the first book to explore the topical contexts that shaped the environmental knowledge and politics of Shakespeare and his audiences Early modern England experienced unprecedented environmental challenges including climate change population growth resource shortfalls and habitat destruction which anticipate today's globally magnified crises Shakespeare wove these events into the poetic textures and embodied action of his drama contributing to the formation of a public ecological consciousness while opening creative pathways for reimagining future human relationships with the natural world and non human life This book begins with an overview of ecological modernity across Shakespeare's work before focusing on three major environmental controversies in particular plays deforestation in *The Merry Wives of Windsor* and *The Tempest* profit driven agriculture in *As You Like It* and gunpowder warfare and remedial cultivation in *Henry IV Parts One and Two* *Henry V* and *Macbeth* A fourth chapter examines the interdependency of local and global eco relations in *Cymbeline* and the final chapter explores Darwinian micro ecologies in *Hamlet* and *Antony and Cleopatra* An epilogue suggests that Shakespeare's greatest potential for mobilizing modern ecological ideas and practices lies in contemporary performance *Shakespeare and Ecology* illuminates the historical antecedents of modern ecological knowledge and activism and explores Shakespeare's capacity for generating imaginative and performative responses to today's environmental challenges

**Tree Cultures** Paul Cloke, Owain Jones, 2020-07-12 The relationship between nature and culture has become a popular focus in social science but there have been few grounded accounts of trees Providing shelter fuel food and tools trees have played a vital role in human life from the earliest times but their role in symbolic expression has been largely overlooked For example trees are often used to express nationalistic feelings Germans drew heavily on tree and forest imagery in nation building and the idea of hearts of oak has been central to concepts of English identity Classic scenes of ghoulish trees coming to life and forests closing in on unsuspecting passers by commonly feature in the media In other instances trees are used to represent paradisiacal landscapes and symbolize the ideologies of conservation and concern for nature Offering new theoretical ideas this book looks at trees as agents that co constitute places and cultures in relationship with human agency What happens when trees connect with human labour technology retail and consumption systems What are the ethical dimensions of these connections The authors discuss how

trees can affect and even define notions of place and the ways that particular places are recognized culturally Working trees companion trees wild trees and collected or conserved trees are considered in relation to the dynamic politics of conservation and development that affect the values given to trees in the contemporary world Building on the growing field of landscape study this book offers rich insights into the symbolic and practical roles of trees It will be vital reading for anyone interested in the anthropology of landscape forestry conservation and development and for those concerned with the social science of nature **This Sacred Earth** Roger S. **Environmental Anthropology Engaging Ecotopia** Joshua Lockyer,James R. Veteto,2013-04-01 In order to move global society towards a sustainable ecotopia solutions must be engaged in specific places and communities and the authors here argue for re orienting environmental anthropology from a problem oriented towards a solutions focused endeavor Using case studies from around the world the contributors scholar activists and activist practitioners examine the interrelationships between three prominent environmental social movements bioregionalism a worldview and political ecology that grounds environmental action and experience permaculture a design science for putting the bioregional vision into action and ecovillages the ever dynamic settings for creating sustainable local cultures *Environmentalism* David Pepper, Frank Webster, George Revill,2003 **Totem Salmon** Freeman House,2000-05-12 Part lyrical natural history part social and philosophical manifesto Totem Salmon tells the story of a determined band of locals who ve worked for over two decades to save one of the last purely native species of salmon in California The book call it the zen of salmon restoration traces the evolution of the Mattole River Valley community in northern California as it learns to undo the results of rapacious logging practices to invent ways to trap wild salmon for propagation and to forge alliances between people who sometimes agree on only one thing that there is nothing on earth like a Mattole king salmon House writes from streamside I think I can hear through the cascades of sound a systematic plop plop plop as if pieces of fruit are being dropped into the water Sometimes this is the sound of a fish searching for the opening upstream sometimes it is not I breathe quietly and wait Freeman House s writing about fish and fishing is erotic deeply observed and simply some of the best writing on the subject in recent literature House tells the story of the annual fishing rituals of the indigenous peoples of the Klamath River in northern California one

that relies on little known early ethnographic studies and on indigenous voices a remarkable story of self regulation that unites people and place And his riffs on the colorful early history of American hatcheries on property rights and on the happiness of the state show precisely why he s considered a West Coast visionary Petitions to list a dozen West Coast salmon runs under the provisions of the Endangered Species Act make saving salmon an issue poised to consume the Pacific West Never before said Federal officials has so much land or so many people been given notice that they will have to alter their lives to restore a wild species New York Times 2 27 98 Totem Salmon is set to become the essential read for this newest chapter in our relations with other wild things

provide resources and practical guidance for all seeking to promote and engage in education for a sustainable future Rabindranath Tagore encouraged each learner to make their actions demonstrate a harmonious union between education and environment David Orr argued that the world needs people who live well in their places to make the world both habitable and humane and that the main challenge for education is to help learners make their minds fit for life on Earth This book tries to chart a practical route towards these objectives This book was previously published as special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication **The Cambridge**
