Gottfredson, Travis Hirschi, 2020 *Modern Control Theory and the Limits of the Criminal Justice* develops and extends the theory of self control advanced in Gottfredson and Hirschi's classic work *A General Theory of Crime* Since it was first published their general theory has been among the most discussed and researched perspectives in criminology This book critically reviews the evidence about the theory contrasting it with alternative perspectives and argues in favor of prevention efforts during early childhood to deal with the many problems facing the criminal justice system in America *Bad Girls at Samarcand* Karin Lorene Zipf, 2016-04-04 Of the many consequences advanced by the rise of the eugenics movement in the early twentieth century North Carolina forcibly sterilized more than 2 000 women and girls in between 1929 and 1950 This extreme measure reflects how pseudoscience justified widespread gender race and class discrimination in the Jim Crow South In *Bad Girls at Samarcand* Karin L Zipf dissects a dark episode in North Carolina's eugenics campaign through a detailed study of the State Home and Industrial School in Eagle Springs referred to as Samarcand Manor and the school's infamous 1931 arson case The people and events surrounding both the institution and the court case sparked a public debate about the expectations of white womanhood the nature of contemporary science and medicine and the role of the juvenile justice system that resonated throughout the succeeding decades Designed to reform and educate unwed poor white girls who were suspected of deviant behavior or victims of sexual abuse Samarcand Manor allowed for strict disciplinary measures including corporal punishment in an attempt to instill Victorian ideals of female purity The harsh treatment fostered a hostile environment and tensions boiled over when several girls set Samarcand on fire destroying two residence halls Zipf argues that the subsequent arson trial which carried the possibility of the death penalty represented an important turning point in the public characterizations of poor white women aided by the lobbying efforts of eugenics advocates the trial helped usher in dramatic policy changes including the forced sterilization of female juvenile delinquents In addition to the interplay between gender ideals and the eugenics movement Zipf also investigates the girls who were housed at Samarcand and those specifically charged in the 1931 trial She explores their negotiation of Jazz Age stereotypes their strategies of resistance and their relationship with defense attorney Nell Battle Lewis during the trial The resultant policy changes intelligence testing sterilization and parole are also explored providing further insight into why these young women preferred prison to reformatories A fascinating story that grapples with gender bias sexuality science and the justice system all within the context of the Great Depression era South *Bad Girls at Samarcand* makes a compelling contribution to multiple fields of study

Correctional Boot Camps: Doris L. MacKenzie, Gaylene S. Armstrong, 2004-02-20 Boot camps have developed over the

past two decades into a program that incorporates a military regimen to create a structured environment While some critics of this method of corrections suggest that the confrontational nature of the program is antithetical to treatment authors Doris Layton MacKenzie and Gaylene Styve Armstrong present research knowledge and personal discussions with community leaders that offer insight into both the strengths and weaknesses of this controversial form of corrections Correctional Boot Camps Military Basic Training or a Model for Corrections provides the most up to date assessment of the major perspectives and issues related to the current state of boot camps The book goes beyond cursory examinations of the effectiveness of boot camps presenting an in depth view of a greater variety of issues Correctional Boot Camps examines empirical evidence on boot camps drawn from diverse sources including male female juvenile and adult programs from across the nation The book explores empirical research on both the punitive and rehabilitative components of the boot camp model and the effectiveness of the tough on crime aspects of the programs that are often thought of as punishment or retribution in lieu of a longer sentence in a traditional facility Thus offenders earn their way back to the general public more quickly because they have paid their debt to society by being punished in a short term but strict boot camp Correctional Boot Camps is a comprehensive textbook for undergraduate and graduate students studying corrections and juvenile justice The book is also a valuable resource for correctional professionals interacting with offenders

The Child Savers Anthony M. Platt, 1977-06-15 Anthony Platt's study a chronicle of the child saving movement and the juvenile court explodes myth after myth about the benign character of both The movement is described not as an effort to liberate and dignify youth but as a punitive romantic and intrusive effort to control the lives of lower class urban adolescents and to maintain their dependent status In so doing Platt analyzes early views of criminal behavior the origins of the reformatory system the social values of middle class reformers and the handling of youthful offenders before and after the creation of separate juvenile jurisdictions In this second enlarged edition of The Child Savers the author has added a new introduction and postscript in which he critically reflects upon his original analysis suggests new ways of thinking about the child saving movement and summarizes recent developments in the juvenile justice system
