

1 Standardising Minority Languages

Reinventing Peripheral Languages in the 21st Century

*James Costa, Haley De Korne,
and Pia Lane*

1. Introduction

This book addresses a crucial, yet often overlooked dimension of minority language standardisation, namely, how social actors engage with, support, alter, resist and even reject standardisation processes. We look at standardisation processes as a political domain where social actors use standards as semiotic resources for articulating discourses on society. The chapters in this volume are therefore concerned first and foremost with social actors, their ideologies and practices, rather than with language *per se*. By considering the perspectives and actions of people who participate in or are affected by minority language politics, this volume aims to provide a comparative and nuanced analysis of the complexity and tensions inherent in minority language standardisation processes. Echoing Fasold (1984), this involves a shift in focus from a sociolinguistics of language to a sociolinguistics of people.

Comparatively little work exists on how individuals engage with standardisation and language standards in minority or minoritised contexts. In this introduction, we provide an overview of ongoing debates about standardisation processes, highlighting how social actors involved in these processes often find themselves at odds with conflicting priorities. On the one hand, standardisation remains a potent way of doing or inventing language, of producing languages as bounded, discrete entities and as social institutions and subsequently increasing the social status of those who use them. On the other hand, standardisation is inherently a limitation of diversity (Milroy and Milroy 1999) and a way to harness and act upon linguistic, that is to say, social differences. Promoting language standards is thus both a way for validating groups and for limiting group-internal diversity. Considering that diversity is often the very *raison d'être* for minority language movements based on the claims that all ways of communicating are equally legitimate and that language diversity needs to be protected, this trade-off is at best contentious and at worst a Faustian bargain. Language advocates, and in some cases state or regional authorities, often view standards as emancipatory and empowering, a way to promote education and other forms of

Stevenson *Redefining Liberal Arts Education in the Twenty First Century* delves into the essential nature of the liberal arts in America today During a time when the STEM fields of science technology engineering and math dominate the narrative around the future of higher education the liberal arts remain vital but frequently dismissed academic pursuits While STEAM has emerged as a popular acronym the arts get added to the discussion in a way that is often rhetorical at best Written by scholars from a diversity of fields and institutions the essays in this collection legitimize the liberal arts and offer visions for the role of these disciplines in the modern world From the arts pedagogy and writing to social justice the digital humanities and the African American experience the essays that comprise *Redefining Liberal Arts Education in the Twenty First Century* bring attention to the vast array of ways in which the liberal arts continue to be fundamental parts of any education In an increasingly transactional environment in which students believe a degree must lead to a specific job and set income colleges and universities should take heed of the advice from these scholars The liberal arts do not lend themselves to the capacity to do a single job but to do any job The effective teaching of critical and analytical thinking writing and speaking creates educated citizens In a divisive twenty first century world such a citizenry holds the tools to maintain a free society redefining the liberal arts in a manner that may be key to the American republic

Reinventing Minority Media for the 21st Century America Rodriguez, 2001 This publication reports on a 2000 forum that included media business executives financiers academics and other experts who examined how minority media can leverage their historically strong community base to succeed in the new century how they can overcome financial challenges what measures they might adopt to keep abreast of opportunities posed by new communications media and what the impact is of such issues as training employability and job retention on media sustainability Forum participants developed initiatives that would help maintain the economic viability of these media as businesses and also address the mission of many of these firms to enhance ethnic identity maintain community and provide employment for community members The first section examines the historical and economic contexts the role of ethnic communications in the community media and the Internet creating more diverse media and strategies for growing ethnic community media The second section includes a paper In the Black African American Web Entrepreneurs and Internet Advertising Kofi Asiedu Ofori which analyzes advertising in digital media that target minorities It examines the total

World Wide Web environment including digital divide and economic issues and suggests revenue enhancing solutions other than advertising to help ensure minority Web site sustainability Contains 57 notes SM *Handbook of Media Management and Economics* Alan Albarran, Bozena Mierzejewska, Sylvia M. Chan-Olmsted, Jaemin Jung, Michael O. Wirth, 2006-04-21 This comprehensive Handbook provides a synthesis of current work and research in media management and economics The volume has been developed around two primary objectives assessing the state of knowledge for the key topics in the media management and economics fields and establishing the research agenda in these areas ultimately pushing the field in new directions The Handbook's chapters are organized into parts addressing the theoretical components key issues analytical tools and future directions for research Each chapter offers the current state of theory and scholarship of a specific area of study and the volume contributors all well established in their areas of specialty represent domestic and international scholarship With its unparalleled breadth of content from expert authors the Handbook provides background knowledge of the various theoretical dimensions and historical paradigms and establishes the direction for the next phases of research in this growing arena of study The Handbook of Media Management and Economics will serve to stimulate future thought and research in the media management and economics disciplines As such this volume will be a required reference for students professors and industry practitioners for years to come **The 21st Century Media (r)evolution** Jim Macnamara, 2010

The emergence of new media and social media is widely discussed in contemporary society However media and public communication are mostly analyzed within particular theoretical frameworks and within specific disciplinary fields Such approaches have created polarized views on media and communication and fail to create an understanding of the interdependencies between these fields This book expertly synthesizes competing theories and disciplinary viewpoints integrates scholarly and cutting edge research and examines international data from fast growing markets including China to provide a comprehensive holistic view of the twenty first century r evolution in media and public communication The book identifies how the changes are located in practices rather than technologies and that these practices are emergent in highly significant ways Engaging and accessible the book is essential reading for media scholars and communication professionals and a valuable text for courses in media studies journalism advertising public relations and organisational and political communication Reinventing Professionalism Silvio Waisbord, 2013-08-26 Current anxiety about the future of news makes it opportune to revisit the notion of professionalism in journalism Media expert Silvio Waisbord takes this pressing issue as his theme and argues that professional journalism is both a normative and analytical notion It refers to reporting that observes certain ethical standards as well as to collective efforts by journalists to exercise control over the news Professionalism should not be narrowly associated with the normative ideal as it historically developed in the West during the past century Instead it needs to be approached as a valuable concept to throw into sharp relief how journalists define conditions and rules of work within certain settings Professionalization is about the specialization of labor and control of

occupational practice These issues are important particularly amidst the combination of political technological and economic trends that have profoundly unsettled the foundations of modern journalism By doing so they have stimulated the reinvention of professionalism This engaging and insightful book critically examines the meanings expectations and critiques of professional journalism in a global context

Uncovering Race Amy Alexander, 2015-06-16 From an award winning black journalist a tough minded look at the treatment of ethnic minorities both in newsrooms and in the reporting that comes out of them within the changing media landscape From the Rodney King riots to the racial inequities of the new digital media Amy Alexander has chronicled the biggest race and class stories of the modern era in American journalism Beginning in the bare knuckled newsrooms of 1980s San Francisco her career spans a period of industry wide economic collapse and tremendous national demographic changes Despite reporting in some of the country's most diverse cities including San Francisco Boston and Miami Alexander consistently encountered a stubbornly white male press corps and a surprising lack of news concerning the ethnic communities in these multicultural metropolises Driven to shed light on the race and class struggles taking place in the United States Alexander embarked on a rollercoaster career marked by cultural conflicts within newsrooms Along the way her identity as a black woman journalist changed dramatically an evolution that coincided with sweeping changes in the media industry and the advent of the Internet Armed with census data and news industry demographic research Alexander explains how the so called New Media is reenacting Old Media's biases She argues that the idea of newsroom diversity at best an afterthought in good economic times has all but fallen off the table as the industry fights for its economic life a dynamic that will ultimately speed the demise of venerable news outlets Moreover for the shrinking number of journalists of color who currently work at big news organizations the lingering ethos of having to be twice as good as their white counterparts continues it is a reality that threatens to stifle another generation of practitioners from non traditional backgrounds In this hard hitting account Alexander evaluates her own career in the context of the continually evolving story of America's growing ethnic populations

and the homogenous newsrooms producing our nation's too often monochromatic coverage. This veteran journalist examines the major news stories that were entrenched in the great race debate of the past three decades: stories like those of Eli n Gonz lez, Janet Cooke, Jayson Blair, Tavis Smiley, the tragedy of Hurricane Katrina, and the election of Barack Obama. *Uncovering Race* offers sharp analysis of how race, gender, and class come to bear on newsrooms and takes aim at mainstream media's failure to successfully cover a browner, younger nation, a failure that Alexander argues is speeding news organizations' demise faster than the Internet. **Reinventing Discovery** Michael Nielsen, 2020-04-07

Reinventing Discovery argues that we are in the early days of the most dramatic change in how science is done in more than 300 years. This change is being driven by new online tools which are transforming and radically accelerating scientific discovery.

Pallavi Guha, 2021-02-12 This book examines the role media platforms play in anti-rape and sexual harassment activism in India. Including 75 interviews with feminist activists and journalists working across India, it proposes a framework of agenda building and establishes a theoretical framework to examine media coverage of issues in the digitally emerging Global South.

Redefining Black Power Joanne Griffith, 2012-02-28 *Conversations with black leaders and activists exploring current African American political and cultural life* *Reinvention* Shane Cragun, Kate Sweetman, 2016-07-26 The Age of Disruption Today's disruptive, tumultuous, and ever-changing global business environment shows no signs of slowing. Authors Shane Cragun and Kate Sweetman believe it is time for a wake-up call to those hoping to thrive in the 21st century. *Reinvention* is the first business book to propose a simple algorithm, common principles, and set of tools that apply to both individuals and organizations facing disruptive and radical change. The ability to pivot quickly, profoundly, and effectively might be the most important core competency individuals and organizations must attain in order to prosper in the new economy. And it isn't enough to be able to change when they have to; leaders must change before they have to, in proactive ways that allow their organizations to leverage incoming global shockwaves to accelerate performance. Cragun and Sweetman use contemporary examples to drive important points home. Key strategies are couched in metaphors to create visual maps that will help the reader implement their new learnings at the moment of need. The stories and case studies are compelling, eclectic, and global, and take the reader beyond just the world of business. *Reinvention* includes chapter insights written by six global experts from six different geographical business regions around the globe. **Media in the Age of Marketization** Graham Murdock, Janet Wasko, 2007 This book explores the notion that the push toward marketization is the central force currently restructuring the communications landscape and examines the consequences of this development for the constitution of

public culture The contributors analyze the core institutional processes of marketization and assess their impact on the structure and operations of media and communication systems around the world over the last two decades The chapters are organized over four key themes consolidation incorporation globalization and resistance **Alternative and Activist New Media** Leah A.
