Reinventing The Steel:

A Vulgar Display of Pantera Joe Giron, 2016 The first ever authorized visual history of one of the world's most legendary metal bands Reinventing Fire Amory Lovins, 2013-10 Oil and coal have built our civilisation created our wealth and enriched the lives of billions Yet their rising costs to our security economy health and environment are starting to outweigh their benefits Moreover the tipping point where alternatives work better and compete purely on cost is not decades in the future it is here and now And that tipping point has become the fulcrum of economic transformation In Reinventing Fire Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race not forced by public policy but led by business for long term advantage This independent and rigorous account offers market based solutions integrating transportation buildings industry and electricity It maps pathways for running a 158% bigger US economy in 2050 but needing no oil no coal no nuclear energy one third less natural gas and no new inventions This transition would cost 5 trillion less than business as usual without counting fossil fuels huge hidden costs Whether you care most about profits and jobs or national security or environmental stewardship climate and health Reinventing Fire makes sense It's a story of astounding opportunities for creating the new energy era Publisher description
