Rejuvenation And The Prolongation Of Human Efficiency:

Rejuvenation and the Prolongation of Human Efficiency Paul Kammerer, 1923 *Rejuvenation* Norman Haire, 1925
The Animal-human Boundary Angela N. H. Creager, William C. Jordan, 2002 An examination of the difficulties in fundamentally differentiating humans from all other animals *Rejuvenation; how Steinach Makes People Young* George F. Corners, 1923 **The Endocrine Survey**, 1925 **Wisconsin Library Bulletin**, 1923 *Sexing the Body* Anne Fausto-Sterling, 2020-06-30 Now updated with groundbreaking research this award winning classic examines the construction of sexual identity in biology society and history Why do some people prefer heterosexual love while others fancy the same sex Is sexual identity biologically determined or a product of convention In this brilliant and provocative book the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced Drawing on astonishing real life cases and a probing analysis of centuries of scientific research Fausto Sterling demonstrates how scientists have historically politicized the body In lively and impassioned prose she breaks down three key dualisms sex gender nature nurture and real constructed and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and as such should not be forced to compromise their differences to fit a flawed societal definition of normality **The Adelphi** John Middleton Murry, 1924 **Hormones, Heredity, and Race** Cheryl A. Logan, 2013-03-20 Early in the twentieth century arguments about nature and nurture pitted a rigid genetic determinism against the idea that genes were flexible and open to environmental change This book tells the story of three Viennese biologists Paul Kammerer Julius Tandler and Eugen Steinach who sought to show how the environment could shape heredity through the impact of hormones It also explores the dynamic of failure through both scientific and social lenses During World War I the three men were well respected scientists by 1934 one was dead by his own hand another was in exile and the third was subject to ridicule Paul Kammerer had spent years gathering zoological evidence on whether environmental change could alter heredity using his research as the scientific foundation for a new kind of eugenics one that challenged the racism growing in mainstream eugenics By 1918 he drew on the pioneering research of two colleagues who studied how secretions shaped sexual attributes to argue that hormones could alter genes After 1920 Julius Tandler employed a similar concept to restore the health and well being of Vienna's war weary citizens Both men rejected the rigidly acting genes of the new genetics and instead crafted a biology of flexible heredity to justify eugenic reforms that respected human rights But the interplay of science and personality with the social and political rise of fascism and with antisemitism undermined their ideas leading to their spectacular failure **The Nation**, 1926 **Wondrous Transformations** Alison Li, 2023-09-14 Harry Benjamin 1885-1986 a German born endocrinologist was a pivotal figure in the development of transgender medicine He was physician to transgender pioneers such as Christine Jorgensen the 1950s Ex GI turned Blonde Beauty media sensation and in turn she and other collaborators helped to shape Benjamin's influential 1966

book *The Transsexual Phenomenon* Alison Li's much needed biography of Benjamin chronicles his passion for hormones and his lifelong interest in sexology Drawing from extensive research in archival documents secondary sources and interviews Li tells the story of Benjamin's early ventures in gerontology and his later work with over a thousand transgender patients Benjamin's contributions to treatment education research and networking helped to create the institutional foundations of transgender medicine Moreover they set the stage for a radical reconsideration of gender identity challenging us to reflect upon what it is to be male or female and to envision moving beyond these long held categories *The Riddle of Gender*

Deborah Rudacille,2009-07-29 When Deborah Rudacille learned that a close friend had decided to transition from female to male she felt compelled to understand why Coming at the controversial subject of transsexualism from several angles historical sociological psychological medical Rudacille discovered that gender variance is anything but new that changing one's gender has been met with both acceptance and hostility through the years and that gender identity like sexual orientation appears to be inborn not learned though in some people the sex of the body does not match the sex of the brain Informed not only by meticulous research but also by the author's interviews with prominent members of the transgender community *The Riddle of Gender* is a sympathetic and wise look at a sexual revolution that calls into question many of our most deeply held assumptions about what it means to be a man a woman and a human being **The American Mercury**

George Jean Nathan, Henry Louis Mencken,1924 *The American Mercury* Henry Louis Mencken,1924 *A History of the Future* Peter J. Bowler,2017-11-02 In this wide ranging survey Peter J Bowler explores the phenomenon of futurology predictions about the future development and impact of science and technology on society and culture in the twentieth century Utilising science fiction popular science literature and the novels of the literary elite Bowler highlights contested responses to the potential for revolutionary social change brought about by real and imagined scientific innovations Charting the effect of social and military developments on attitudes towards innovation in Europe and America Bowler shows how conflict between the enthusiasm of technocrats and the pessimism of their critics was presented to the public in books magazines and exhibitions and on the radio and television A series of case studies reveals the impact of technologies such as radio aviation space exploration and genetics exploring rivalries between innovators and the often unexpected outcome of their efforts to produce mechanisms and machines that could change the world **Catalog of Copyright Entries. been a recurrent topic since the dawn of human culture Drawing on a dazzling range of sources from across centuries McLaren demonstrates how male sexuality was constructed around the idea of potency from times past when it was essential for the purpose of siring children to today when successful sex is viewed as a component of a healthy emotional life Along the way Impotence enlightens and fascinates with tales of sexual failure and its remedies for example had Ditka lived in ancient Mesopotamia he might have recited spells while eating roots and plants rather than pills and explanations which over the years have included witchcraft shell shock masturbation feminism and the Oedipal complex McLaren also explores the surprising political and social effects of impotence from the revolutionary unrest fueled by Louis XVI s failure to consummate his marriage to the boost given the fledgling American republic by George Washington s failure to found a dynasty Each age McLaren shows turns impotence to its own purposes using it to help define what is normal and healthy for men their relationships and society From marriage manuals to metrosexuals from Renaissance Italy to Hollywood movies Impotence is a serious but highly entertaining examination of a problem that humanity has simultaneously regarded as life s greatest tragedy and its greatest joke *The Literary Digest International Book Review* Clifford Smyth,1923 *Journal of Nervous and Mental Disease* ,1925 July 1918 1943 include reports of various neurological and psychiatric societies
