Teaching Psychological Skills Dale Larson, 1984

Casebook of the Brief Psychotherapies Richard A. Wells, Vincent J. Giannetti, 2013-11-11 Following the publication of the Handbook of the Brief Psychotherapies Wells Giannetti 1990 the editors began to conceptualize the idea of a collection of

case studies encompassing a number of the commonly encountered clinical problems that have been treated with such approaches. The Casebook of the Brief Psychotherapies is the result. The Casebook details clinical interventions with client populations as diverse as substance abusers, torture victims, the physically handicapped, and other exceptional groups, and the economically disadvantaged, with emotional and behavioral problems as well as individuals experiencing sexual dysfunction or eating disorders. In addition, topics such as bereavement, depression, anger, and many crucial aspects of marital and family therapy are discussed by eminent clinical practitioners. Although the cases draw heavily upon cognitive-behavioral and strategic structural formulations, psychodynamic, interpersonal, and experiential approaches are also included. The Casebook is clinically oriented, with a minimum of theory. Ample case material and commentary allow the reader to experience directly the application of brief therapy to specific client problems. What emerges from this compendium of approaches and problems is a tapestry of action-oriented problem-solving, skill-building, rational approaches to therapy that balance the client's ability to change with the demands and limits of time.
