During the past 20 years the field of mechanical engineering has undergone enormous changes These changes have been driven by many factors including the development of computer technology worldwide competition in industry improvements in the flow of information satellite communication real time monitoring increased energy efficiency robotics automatic control increased sensitivity to environmental impacts of human activities advances in design and manufacturing methods These developments have put more stress on mechanical engineering education making it increasingly difficult to cover all the topics that a professional engineer will need in his or her career As a result of these developments there has been a growing need for a handbook that can serve the professional community by providing relevant background and current information in the field of mechanical engineering The CRC Handbook of Mechanical Engineering serves the needs of the professional engineer as a resource of information into the next century

Handbook of Translation Studies Yves Gambier,Luc van Doorslaer,2012-12-17 As a meaningful manifestation of how institutionalized the discipline has become the new Handbook of Translation Studies is most welcome It joins the other signs of maturation such as Summer Schools the development of academic curricula historical surveys journals book series textbooks terminologies bibliographies and encyclopedias The HTS aims at disseminating knowledge about translation and interpreting and providing easy access to a large range of topics traditions and methods to a relatively broad audience not only students who often adamantly prefer such user friendliness researchers and lecturers in Translation Studies Translation but also scholars and experts from other disciplines among which linguistics sociology history psychology In addition the HTS addresses any of those with a professional or personal interest in the problems of translation interpreting localization editing etc such as communication specialists journalists literary critics editors public servants business managers intercultural organization specialists media specialists marketing professionals Moreover The HTS offers added value First of all it is the first Handbook with this scope in Translation Studies that has both a print edition and an online version The advantages of an online version are obvious it is more flexible and accessible and in addition the entries can be regularly revised and updated The Handbook is variously searchable by article by author by subject A second benefit is the interconnection with the selection and organization principles of the online Translation Studies Bibliography TSB The taxonomy of the TSB has been partly applied to the selection of entries for the HTS Moreover many items in the reference lists are hyperlinked to the TSB where the user can find an abstract of a publication All articles between 500 and 6 000 words are written by specialists in the different subfields and are peer reviewed Last but not least the usability accessibility and flexibility of the HTS depend on the commitment of

people who agree that Translation Studies does matter All users are therefore invited to share their feedback Any questions remarks and suggestions for improvement can be sent to the editorial team at hts.lessius.eu
