Religion A Secular Theory:

Political Secularism, Religion, and the State Jonathan Fox, 2015-04-27 This book examines how the competition between religious and secular forces influenced state religion policy between 1990 and 2008 While both sides were active the religious side had considerably more success The book examines how states supported religion as well as how they restricted it

Religion and International Relations Theory Jack Snyder, 2011-03-31 Religious concerns stand at the center of international politics yet key paradigms in international relations namely realism liberalism and constructivism barely consider religion in their analysis of political subjects The essays in this collection rectify this Authored by leading scholars they introduce models that integrate religion into the study of international politics and connect religion to a rising form of populist politics in the developing world Contributors identify religion as pervasive and distinctive forcing a reframing of international relations theory that reinterprets traditional paradigms One essay draws on both realism and constructivism in the examination of religious discourse and transnational networks Another positions secularism not as the opposite of religion but as a comparable type of worldview drawing on and competing with religious ideas With the secular state's perceived failure to address popular needs religion has become a banner for movements that demand a more responsive government The contributors to this volume recognize this trend and propose structural and theoretical innovations for future advances in the discipline

Secularism and Cosmopolitanism Étienne Balibar, 2018-06-19 What is the relationship between cosmopolitanism and secularism the worldwide and the worldly While cosmopolitan politics may seem inherently secular existing forms of secularism risk undermining the universality of cosmopolitanism because they privilege the European tradition over all others and transform particular historical norms into enunciations of truth valid for all cultures and all epochs In this book the noted philosopher Étienne Balibar explores the

tensions lurking at this troubled nexus in order to advance a truly democratic and emancipatory cosmopolitanism which requires a secularization of secularism itself Balibar argues for the idea of the universal against its particular dominant institutions He questions the assumptions that underlie popular ideas of secularism and religion and outlines the importance of a new critique for the contemporary world Balibar holds that conflicts between religious and secular discourses need to be reframed from a point of view that takes into account the cultural hybridization migration and mobility and transformation of borders that have reshaped the postcolonial age Among the topics discussed are the uses and misuses of the category of religion and the religious the paradoxical genealogy of monotheism French la cit s identitarian turn and the implications of the responses to the Charlie Hebdo attacks for an extended definition of free speech Going beyond circumscribed notions of religion and the public sphere Secularism and Cosmopolitanism is a profound rethinking of identity and difference that seeks to make room for a renewed political imagination

Secular Theories on Religion Tim Jensen, Mikael Rothstein, 2000 Scholars of religious studies from Europe and North America explore what a secular or scientific study of religion should be like what methods it should apply what aims and what kind of scientific thinking should be pursued They also consider scholars as public intellectuals operating within and influenced by general societal developments The 18 essays provide a survey of current thinking in the field Distributed in the US by ISBS c Book News Inc

Religion, the Secular, and the Politics of Sexual Difference Linell E. Cady, Tracy Fessenden, 2013-11-12 Global struggles over women s roles rights and dress have taken center stage in a drama that casts the secular and the religious in tense if not violent opposition Advocates for equality speak of the issue in terms of rights and modern progress while reactionaries ground their authority in religious and scriptural appeals Both sides presume women s emancipation is tied to secularization This volume upsets these certainties by blending diverse voices and traditions both secular and religious in studies historicizing questioning and testing the implicit links between secularism and expanded freedoms for women Rather than treat secularism as the answer to conflicts over gender and sexuality these essays show how it structures the conditions generating them

Secularism and State Policies Toward Religion Ahmet T. Kuru, 2009-04-27 Comparing policy in America France and Turkey this book analyzes the impact of ideological struggles on public policies toward religion

Deep History, Secular Theory Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987 The contents of this collected volume represent Martin s shift from comparative studies to socio political studies to scientific studies of religion and especially to the cognitive science of religion He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university The twenty five contributions collected in this volume are selected from over one

hundred essays articles and book chapters published over a long and industrious career and are representative of Martin's work over the past two decades

Religion, Secularism, and Constitutional Democracy Jean L. Cohen, Cécile Laborde, 2015-12-22 Polarization between political religionists and militant secularists on both sides of the Atlantic is on the rise. Critically engaging with traditional secularism and religious accommodationism, this collection introduces a constitutional secularism that robustly meets contemporary challenges. It identifies which connections between religion and the state are compatible with the liberal republican and democratic principles of constitutional democracy and assesses the success of their implementation in the birthplace of political secularism, the United States and Western Europe. Approaching this issue from philosophical, legal, historical, political, and sociological perspectives, the contributors wage a thorough defense of their project's theoretical and institutional legitimacy. Their work brings fresh insight to debates over the balance of human rights and religious freedom, the proper definition of a nonestablishment norm, and the relationship between sovereignty and legal pluralism. They discuss the genealogy of and tensions involving international legal rights to religious freedom, religious symbols in public spaces, religious arguments in public debates, the jurisdiction of religious authorities in personal law, and the dilemmas of religious accommodation in national constitutions and public policy when it violates international human rights agreements or liberal democratic principles. If we profoundly rethink the concepts of religion and secularism, these thinkers argue, a principled adjudication of competing claims becomes possible.

Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security. It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century, but also that the world as a whole now has more people with traditional religious views than ever before. This second edition expands the theory and provides new and updated evidence from a broad perspective and in a wide range of countries. This confirms that religiosity persists most strongly among vulnerable populations, especially in poorer nations and in failed states. Conversely, a systematic erosion of religious practices, values, and beliefs has occurred among the more prosperous strata in rich nations.

Religion in Secular Society Bryan R. Wilson, 2016-09-22 Fifty years after its publication, Bryan Wilson's *Religion in Secular Society* (1966) remains a seminal work. It is one of the clearest articulations of the secularization thesis, the claim that modernization brings with it fundamental changes in the nature and status of religion. For Wilson, secularization refers to the fact that religion has lost influence at the societal, the institutional, and the individual level. Individual secularization is about the loss of authority of the Churches to define what people should believe, practise, and accept as moral principles guiding their lives. In other words, individual piety may still persist, however, if it develops independently of religious authorities, then it is an indication of individual secularization. Wilson stresses that the consequences of the process of societalization in modern societies, and on this basis, he formulated his thesis that secularization is linked to the decline of community and is a concomitant of societalization. Revised and updated, Steve Bruce builds on Wilson's work by noting the changes in religious

culture of the UK and US in an appendix on major changes since the 1960s Bruce also provides a critical response to the core ideas of Religion in Secular Society *Blogging My Religion* Giulia Evolvi, 2018-10-09 Religion in Europe is currently undergoing changes that are reconfiguring physical and virtual spaces of practice and belief and these changes need to be understood with regards to the proliferation of digital media discourses This book explores religious change in Europe through a comparative approach that analyzes Atheist Catholic and Muslim blogs as spaces for articulating narratives about religion that symbolically challenge the power of religious institutions The book adds theoretical complexity to the study of religion and digital media with the concept of hypermediated religious spaces The theory of hypermediation helps to critically discuss the theory of secularization and to contextualize religious change as the result of multiple entangled phenomena It considers religion as being connected with secular and post secular spaces and media as embedding material forms institutions and technologies A spatial perspective contextualizes hypermediated religious spaces as existing at the interstice of alternative and mainstream private and public imaginary and real venues By offering the innovative perspective of hypermediated religious spaces this book will be of significant interest to scholars of religious studies the sociology of religion and digital media *Religion and Nationalism in Global Perspective* J. Christopher Soper, Joel S. Fetzer, 2018-10-11 Offers a new framework for understanding how religion and nationalism interact across diverse countries and religious traditions **Revisiting Secularism in Theory and Practice** Seda Ünsar, Özgür Ünal Eriş, 2020-02-21 This book offers a philosophical and macro historical analysis of secularism supported by an investigation of various contemporary cases Starting with an in depth theoretical discussion of the meaning of secularism it subsequently presents a historical study on the secularization of norms and identities in Europe The respective case studies cover topics such as the epistemologies of secularism liberalization and embedded secularism the relationship between modernity and secularism the socio anthropology of secularism Turkish modernization as a cultural revolution the political economy of secularism in Turkey and the secular rationale of the EU neighborhood policy *Religion* Andrew M. Greeley, 1982 **The Power of Religion in the Public Sphere** Judith Butler, 2011 Eduardo Mendieta is professor of philosophy at the State University of New York Stony Brook *Darwinism as Religion* Michael Ruse, 2017 Darwinism as Religion argues that the theory of evolution given by Charles Darwin in the 19th century has always functioned as much as a secular form of religion as anything purely scientific Through the words of novelists and poets Michael Ruse argues that Darwin took us from the secure world of Christian faith into a darker less friendly world of chance and lack of meaning Formations of the Secular Talal Asad, 2003-02-03 Opening with the provocative query what might an anthropology of the secular look like this book explores the concepts practices and political formations of secularism with emphasis on the major historical shifts that have shaped secular sensibilities and attitudes in the modern West and the Middle East Talal Asad proceeds to dismantle commonly held assumptions about the secular and the terrain it allegedly covers He argues that while anthropologists have oriented

themselves to the study of the strangeness of the non European world and to what are seen as non rational dimensions of social life things like myth taboo and religion the modern and the secular have not been adequately examined The conclusion is that the secular cannot be viewed as a successor to religion or be seen as on the side of the rational It is a category with a multi layered history related to major premises of modernity democracy and the concept of human rights This book will appeal to anthropologists historians religious studies scholars as well as scholars working on modernity *Freedom of Religion and the Secular State* Russell Blackford, 2012-01-17 Exploring the relationship between religion and the state Focusing on the intersection of religion law and politics in contemporary liberal democracies Blackford considers the concept of the secular state revising and updating enlightenment views for the present day *Freedom of Religion and the Secular State* offers a comprehensive analysis with a global focus of the subject of religious freedom from a legal as well as historical and philosophical viewpoint It makes an original contribution to current debates about freedom of religion and addresses a whole range of hot button issues that involve the relationship between religion and the state including the teaching of evolution in schools what to do about the burqa and so on **The Oxford Handbook of Secularism** Phil Zuckerman, John R. Shook, 2017 The Oxford Handbook of Secularism offers a wide ranging examination of secularism on a global scale bringing together an international collection of views from prominent experts in a variety of fields This volume reflects the impressive level of academic attention now given to secularism across the humanities social sciences law and public policy and international relations Long reigning theories about the pace of secularization and ideal church state relations are here scrutinized by a new generation of scholars studying secularism with new questions better data and fresh perspectives
