Mediatization outlines how this can be done critically In so doing it offers a new way of thinking about our present day media saturated world   Deep Mediatization Andreas Hepp,2019-12-06 Andreas Hepp takes an integrative look at one of the biggest questions in media and communications research how digital media is changing society Often such questions are discussed in isolation losing sight of the overarching context in which they are situated Hepp has developed a theory of the re figuration of society by digital media and their infrastructures and provides an understanding of how profound today s media related changes are not only for institutions organizations and communities but for the individual as well Rooted in the latest research this book does not stop at a description of media related change instead it raises the normative challenge of what deep mediatization should look like so that it might just stimulate a good life for all Providing original and critical research the book introduces deep mediatization to students of media and cultural studies as well as neighboring disciplines like sociology political science and other cognate disciplines   Paralympics R.    Communicative Figurations Andreas Hepp,Andreas Breiter,Uwe Hasebrink,2017-11-27 This open access volume assesses the influence of our changing media environment Today there is not one single medium that is the driving force of change With the spread of various technical communication media such as mobile phones and internet platforms we are confronted with a media manifold of deep mediatization But how can we investigate its transformative capability This book answers this question by taking a non media centric perspective researching the various figurations of collectivities and organizations humans are involved in The first part of the book outlines a fundamental understanding of the changing media environment of deep mediatization and its transformative capacity The second part focuses on collectivities and movements communities in the city critical social movements maker online gaming groups and networked groups of young people The third part moves institutions and organizations into the foreground discussing the transformation of journalism religion politics and education whilst the fourth and final part is dedicated to methodologies and perspectives   *The Routledge Companion to Transmedia Studies* Matthew Freeman,Renira Rampazzo Gambarato,2018-10-09 Around the globe people now engage with media content across multiple platforms following stories characters worlds brands and other information across a spectrum of media channels This transmedia phenomenon has led to the burgeoning of transmedia studies in media cultural studies and communication departments across the academy The Routledge Companion to Transmedia Studies is the definitive volume for scholars and students interested in comprehending all the various aspects of transmediality This collection which gathers together original articles by a global roster of contributors from a variety of disciplines sets out to contextualize problematize and scrutinize the current status and future directions of transmediality exploring the industries arts practices cultures and methodologies of studying convergent media across multiple platforms   *The General Biographical Dictionary* Alexander Chalmers,1816   Neither Good Nor Bad Gerhard Besier,Katarzyna Stokłosa,2014-06-19 When confronted by a range of violent actions perpetrated by lone individuals contemporary society exhibits a constant tendency to react in terms

of helpless even perplexed horror Seeking explanations for the apparently inexplicable commentators often hurry to declare the perpetrators as evil This question is not restricted to individuals history has repeatedly demonstrated how groups and even entire nations can embark on a criminal plan united by the conviction that they were fighting for a good and just cause Which circumstances occasioned such actions What was their motivation Applying a number of historical scientific and social scientific approaches to this question this study produces an integrative portrait of the reasons for human behavior and advances a number of different interpretations for their genesis The book makes clear the extent to which we live in socially constructed realities in which we cling for dear life to a range of conceptions and beliefs which can all too easily fall apart in situations of crisis **Advances in Visual Computing** George Bebis,Richard Boyle,Bahram Parvin,Darko Koracin,Fowlkes Charless,Wang Sen,Choi Min-Hyung,Stephan Mantler,Jurgen Schulze,Daniel Acevedo,Klaus Mueller,Michael Papka,2012-08-22 The two volume set LNCS 7431 and 7432 constitutes the refereed proceedings of the 8th International Symposium on Visual Computing ISVC 2012 held in Rethymnon Crete Greece in July 2012 The 68 revised full papers and 35 poster papers presented together with 45 special track papers were carefully reviewed and selected from more than 200 submissions The papers are organized in topical sections Part I LNCS 7431 comprises computational bioimaging computer graphics calibration and 3D vision object recognition illumination modeling and segmentation visualization 3D mapping modeling and surface reconstruction motion and tracking optimization for vision graphics and medical imaging HCI and recognition Part II LNCS 7432 comprises topics such as unconstrained biometrics advances and trends intelligent environments algorithms and applications applications virtual reality face processing and recognition *Mediatized Worlds* A. Hepp,F. Krotz,2014-03-06 How does the media influence our everyday lives In which ways do our social worlds change when they interact with media And what are the consequences for theorizing media and communication Starting with questions like these Mediatized Worlds discusses the transformation of our lives by their increasing mediatization The chapters cover topics such as rethinking mediatization mediatized communities the mediatization of private lives and of organizational contexts and the future perspective for mediatization research The empirical studies offer new access to questions of mediatization an access that grounds mediatization in life world and social world perspectives The Cambridge History of the Second World War: Volume 3, Total War: Economy, Society and Culture Michael Geyer,Adam Tooze,2015-04-23 The conflict that ended in 1945 is often described as a total war unprecedented in both scale and character Volume 3 of The Cambridge History of the Second World War adopts a transnational approach to offer a comprehensive and global analysis of the war as an economic social and cultural event Across twenty eight chapters and four key parts the volume addresses complex themes such as the political economy of industrial war the social practices of war the moral economy of war and peace and the repercussions of catastrophic destruction A team of nearly thirty leading historians together show how entire nations mobilized their economies and populations in the face of unimaginable violence and how

they dealt with the subsequent losses that followed The volume concludes by considering the lasting impact of the conflict and the memory of war across different cultures of commemoration   **Internment during the First World War** Stefan Manz,Panikos Panayi,Matthew Stibbe,2018-10-10 Although civilian internment has become associated with the Second World War in popular memory it has a longer history The turning point in this history occurred during the First World War when in the interests of security in a situation of total war the internment of enemy aliens became part of state policy for the belligerent states resulting in the incarceration displacement and in more extreme cases the death by neglect or deliberate killing of hundreds of thousands of people throughout the world This pioneering book on internment during the First World War brings together international experts to investigate the importance of the conflict for the history of civilian incarceration

<u>Hitler's People</u> Richard J Evans,2024-08-13 A fascinating and instructive book elegantly written and perceptive Wall Street Journal Kaleidoscopic A fascinating exploration of individual agency that never loses sight of the larger context Just the kind of probing nuanced and unsparing study to help us think things through The New York Times Through a connected set of biographical portraits of key Nazi figures that follows power as it radiated out from Hitler to the inner and outer circles of the regime s leadership one of our greatest historians answers the enduring question how does a society come to carry out a program of unspeakable evil Richard Evans author of the acclaimed The Third Reich Trilogy and over two dozen other volumes on modern Europe is our preeminent scholar of Nazi Germany Having spent half a century searching for the truths behind one of the most horrifying episodes in human history in Hitler s People he brings us back to the original site of the Nazi movement namely the lives of its most important members Working in concentric circles out from Hitler and his closest allies Evans forms a typological framework of Germany society under Nazi rule from the top down With a novelist s eye for detail Evans explains the Third Reich through the personal failings and professional ambitions of its members from its most notorious deputies like Goebbels the regime s propagandist and Himmler the Holocaust s chief architect to the crucial enforcers and instruments of the Nazi agenda that history has largely forgotten like the schoolteacher Julius Streicher and the actress Leni Riefenstahl Drawing on a wealth of recently unearthed historical sources Hitler s People lays bare the inner and outer lives of the characters whose choices led to the deaths of millions Nearly a century after Hitler s rise the leading nations of the West are once again being torn apart by a will to power By telling the stories of these infamous lives as human lives Evans asks us to grapple with the complicated nature of complicity showing us that the distinctions between individual and collective responsibility and even between pathological evil and rational choice are never easily drawn   *Transborder Media Spaces* Ingrid Kummels,2017-07-01 Transborder Media Spaces offers a new perspective on how media forms like photography video radio television and the Internet have been appropriated by Mexican indigenous people in the light of transnational migration and ethnopolitical movements In producing and consuming self determined media genres actors in Tamazulapam Mixe and its diaspora community in Los Angeles open up media spaces and seek to forge more equal relations

both within Mexico and beyond its borders It is within these spaces that Ayuujk people carve out their own at times conflicting visions of development modernity gender and what it means to be indigenous in the twenty first century
