in Somalia Bosnia and Herzegovina and Rwanda has thrown into stark relief the difficulty of peacekeepers operating in situations where consent to their presence and activities is fragile or incomplete and where there is little peace to keep. Complex questions arise in these circumstances: When and how should peacekeepers use force to protect themselves to protect their mission or most troublingly to ensure compliance by recalcitrant parties with peace accords? Is a peace enforcement role for peacekeepers possible or is this simply war by another name? Is there a grey zone between peacekeeping and peace enforcement? Trevor Findlay reveals the history of the use of force by UN peacekeepers from Sinai in the 1950s to Haiti in the 1990s. He untangles the arguments about the use of force in peace operations and sets these within the broader context of military doctrine and practice. Drawing on these insights the author examines proposals for future conduct of UN operations including the formulation of UN peacekeeping doctrine and the establishment of a UN rapid reaction force.

Creech Blue James C. Slife, 2004 Colonel Slife chronicles the influence of the late Gen Wilbur L. Bill Creech, a leader, visionary, warrior, and mentor in the areas of equipment and tactics training, organization, and leader development. His study serves both to explain the context of a turbulent time in our Air Force's history and to reveal where tomorrow's airmen may find answers to some of the difficult challenges facing them today. Colonel Slife, who addresses such controversial topics as the development of the Army's AirLand Battle doctrine and what it meant to airmen, is among the first to describe what historians will surely see in years to come as the revolutionary developments of the late 1970s/early 1980s and General Creech's central role. Creech Blue enlightens the Air Force on its strongly held convictions during that period and challenges the idea that by 1990, when Iraq invaded Kuwait, the Air Force had forgotten how to wage a strategic air campaign and was dangerously close to plunging into a costly and lengthy war of attrition had it not been for the vision of a small cadre of thinkers on the Air Staff. In exploring the doctrine and language of the decade leading up to Operation Desert Storm, Colonel Slife reveals that the Air Force was not as shortsighted as many people have argued.

Fast Food Nation Eric Schlosser, 2012 An exploration of the fast food industry in the United States from its roots to its long-term consequences.

The Cigarette Century Allan M. Brandt, 2009-01-06 The invention of mass marketing led to cigarettes being emblazoned in advertising and film, deeply tied to modern notions of glamour and sex appeal. It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. And no product has received such sustained scientific scrutiny. The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence-based medicine. In response, the tobacco industry engineered a campaign of scientific disinformation seeking to delay, disrupt, and suppress these studies. Using a massive archive of previously secret documents, historian Allan Brandt shows how the industry pioneered these campaigns, particularly using special interest lobbying and largesse to elude regulation. But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically, in the U.S. Big Tobacco remains securely positioned to

expand into new global markets The implications for the future are vast 100 million people died of smoking related diseases in the 20th century in the next 100 years we expect 1 billion deaths worldwide **Shaba II** Thomas Paul Odom,1993

Getting MAD Henry D. Sokolski,2004 Getting MAD Nuclear Mutual Assured Destruction Its Origins and Practice is the first critical history of the intellectual roots and actual application of the strategic doctrine of nuclear mutual assured destruction or MAD Written by the world s leading French British and American military policy planners and analysts this volume examines how MAD and its emphasis on the military targeting of population centers influenced the operational plans of the major nuclear powers and states such as Pakistan India and Israel Given America s efforts to move away from MAD and the continued reliance on MAD thinking by smaller nations to help justify further nuclear proliferation Getting MAD is a timely must read for anyone eager to understand our nuclear past and future **Salt Sugar Fat** Michael Moss,2013-02-26

From a Pulitzer Prize winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry and how it used salt sugar and fat to addict us Salt Sugar Fat is a journey into the highly secretive world of the processed food giants and the story of how they have deployed these three essential ingredients over the past five decades to dominate the North American diet This is an eye opening book that demonstrates how the makers of these foods have chosen time and again to double down on their efforts to increase consumption and profits gambling that consumers and regulators would never figure them out With meticulous original reporting access to confidential files and memos and numerous sources from deep inside the industry it shows how these companies have pushed ahead despite their own misgivings never aired publicly Salt Sugar Fat is the story of how we got here and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry s own say Enough already
