Pollution Is Colonialism Max Liboiron,2021-03-29 In *Pollution Is Colonialism* Max Liboiron presents a framework for understanding scientific research methods as practices that can align with or against colonialism They point out that even when researchers are working toward benevolent goals environmental science and activism are often premised on a colonial worldview and access to land Focusing on plastic pollution the book models an anticolonial scientific practice aligned with Indigenous particularly M tis concepts of land ethics and relations Liboiron draws on their work in the Civic Laboratory for Environmental Action Research CLEAR an anticolonial science laboratory in Newfoundland Canada to illuminate how pollution is not a symptom of capitalism but a violent enactment of colonial land relations that claim access to Indigenous land Liboiron s creative lively and passionate text refuses theories of pollution that make Indigenous land available for settler and colonial goals In this way their methodology demonstrates that anticolonial science is not only possible but is currently

being practiced in ways that enact more ethical modes of being in the world **Max Found Two Sticks** J.
