Max Hartwell:

Freedom for Capital, Not People Matthias Schmelzer, 2025-06-24 The definitive history of neoliberal monetary thought Based on new archival sources *Freedom for Capital Not People* tells the story of how the Mont Pelerin Society transformed the world economy Founded in 1947 by economist Friedrich von Hayek by the turn of the 1970s the society commanded influence at the highest levels of international monetary policy with debates sparked by Hayek Milton Friedman and Ludwig von Mises emigrating from the seminar room to the halls of power The group's collective agenda the result of years of fierce argument and shrewd political strategising would dominate the next half century of global capitalism *The Nobel Factor* Avner Offer, Gabriel Söderberg, 2019-11-19 Economic theory may be speculative but its impact is powerful and real Since the 1970s it has been closely associated with a sweeping change around the world the market turn This is what Avner Offer and Gabriel Soderberg call the rise of market liberalism a movement that seeking to replace social democracy holds up buying and selling as the norm for human relations and society Our confidence in markets comes from economics and our confidence in economics is underpinned by the Nobel Prize in Economics which was first awarded in 1969 Was it a coincidence that the market turn and the prize began at the same time *The Nobel Factor* the first book to describe the origins and power of the most important prize in economics explores this and related questions by examining the history of the prize the history of economics since the prize began and the simultaneous struggle between market liberals and social democrats in Sweden Europe and the United States *The Nobel Factor* tells how the prize created by the Swedish central bank emerged from a conflict between central bank orthodoxy and social democracy The aim was to use the halo of the Nobel brand to enhance central bank authority and the prestige of market friendly economics in order to influence the future of Sweden and the rest of the developed world And this strategy has worked with sometimes disastrous results for societies striving to cope with the requirements of economic theory and deregulated markets **The Industrial Revolution and British Society** Patrick O'Brien, Roland Quinault, 1993-01-29 This text is a wide ranging survey of the principal economic and social aspects of the first Industrial Revolution **Essays on Hayek** Fritz Machlup, 2013-10-16 Varying according to the scope of Hayek's contributions the papers in this volume include among others An affirmation of the relevance of Hayek's work A survey of his contribution to knowledge An appraisal of Hayek's innovative work on the methodology of the social sciences A discussion of Hayek's achievements as scholar and mentor The contributors are Fritz Machlup Geroge Roche Arthur Shenfield Max Hartwell William Buckley Gottfried Dietze Shirley Letwin **Business in the Age of Depression and War** R.P.T. Davenport-Hines, 2013-11-26 First Published in 1990 This is the companion title to R P T Davenport Hines *Capital Entrepreneurs and Profits* This title responds to the little discussion surrounding the subject of business history The editor recognised that although the interpretation of business history has been wide the only distinguishing features was a dependence on often British business records which is reflected in the selection of volumes within this collection This title

intends to present a list of searching and analytical and therefore more satisfying and instructive histories of British companies from which lessons can be learned

History Wars Stuart Macintyre, Anna Clark, 2013-05-31 The nation's history has probably never been more politicised than it is today Politicians journalists columnists academics and Australians from all walks of life argue passionately and often ideologically about the significance of the national story the cherished ideal of the fair go the much contested facts of Indigenous dispossession the Anzac legend and the nation's strategic alliance with the United States Historians have become both combatants and casualties in this war of words In *The History Wars* Stuart Macintyre and Anna Clark explore how this intense public debate has polarised the nation and paralysed history departments This edition includes a new afterword by Stuart Macintyre which recounts with rueful irony the outbreak of controversy that followed the book's original publication and the further light it shed on the uses and abuses of Australian history

Essays on a Mature Economy: Britain After 1840 Deirdre McCloskey, 2013-11-05 These unique papers were originally read at a conference on the new economic history of Britain at Harvard in 1970 and each is accompanied by a summary of the discussion that followed it The participants of the conference represented a broad range of scholars from both sides of the Atlantic The first eleven papers deal with a variety of topics covering a period from 1840 to the 1920s They focus on the performance of the British economy and especially its businessmen during the time of Britain's industrial maturity and relative decline The papers and discussions reached a novel conclusion that contrary to commonly held opinion the British economy performed well and that British businessmen were not lacking in entrepreneurial vigour compared with their German or American counterparts But even more important for British historiography than this finding was the demonstration that economic and statistical methods can be applied successfully to the study of economic history The papers in the concluding section discuss the origins and development of the new economic history and show that as a substantial supplement to work along more traditional lines its methods and application are both desirable and possible This collection serves as an interesting report of research into a key period in British history and also as a useful introductory account of the new economic history in the United Kingdom This book was first published in 1971

An Economic History of Nineteenth-Century Europe Ivan Berend, 2013 A transnational survey of the economic development of Europe exploring why some regions advanced and some stayed behind

Nine Lives of Neoliberalism Dieter Plehwe, Quinn Slobodian, Philip Mirowski, 2020-05-12 Untangling the long history of neoliberalism Neoliberalism is dead Again Yet the philosophy of the free market and the strong state has an uncanny capacity to survive and even thrive in times of crisis Understanding neoliberalism's longevity and its latest permutation requires a more detailed understanding of its origins and development This volume breaks with the caricature of neoliberalism as a simple unvariegated belief in market fundamentalism and homo economicus It shows how neoliberal thinkers perceived institutions from the family to the university disagreed over issues from intellectual property rights and human behavior to social complexity and monetary

order and sought to win consent for their project through the creation of new honors disciples and networks Far from a monolith neoliberal thought is fractured and occasionally even at war with itself We can begin to make sense of neoliberalism's nine lives only by understanding its own tangled and complex history [The Ideas That Rule Us](#) Chris Grocott,2024-10-07

It may seem surprising that the economic choices we make in society are often determined by ideas rather than scientific evidence or financial resources The consequences of such choices are often stark such as the austerity policies which eroded our ability to withstand crises like the Covid 19 pandemic This book explores the ideas that rule how our economy works how government operates and how workers organise A small number of historical economic ideas remain stubbornly prevalent and powerful today However they are largely based on questionable assumptions about human behaviour and unproven theoretical ideas about economics They were founded within the realms of philosophy and politics rather than hard science This book illustrates how politicians have selectively borrowed convenient economic concepts in order to promote and defend policies which entrench and escalate inequalities and other structural problems This accessible book invites readers to question the ideas that rule us and explore the challenges facing society It invites progressive thought about how we need to urgently organise action for the future

Jeffrey G. Williamson, 2013-11-05 First Published in 2005 This thirteen chapter title is divided into three parts and concludes with five appendices references and index The first part focuses on income inequality and the historical state of wages The second begins the discussion on the driving forces of economic inequality and equilibrating factors The third provides a model for inequality in a resource scarce open economy with data theory and debate Appropriate for economic students and those interested in British economic history *Reclaiming Pluralism in Economics* Jerry Courvisanos, James Doughney, Alex Millmow, 2016-03-31 Until the end of the early 1970s from a history of economic thought perspective the mainstream in economics was pluralist but once neoclassical economics became totally dominant it claimed the mainstream as its own Since then alternative views and schools of economics increasingly became minorities in the discipline and were considered heterodox This book is in honour of John Edward King who has an impressive publication record in the area of economic theory with specific interest in how economic thought in the past shapes current economic theory and enforces certain paths of economic policy and economic development This book is divided into five themes based on King's interests The first theme looks at the challenge in trying to reclaim pluralism in economics The second faces head on the direct collision of mainstream economics with history of economic thought and heterodox economics The third addresses classical economic ideas their central influence in the past and how they can still primarily guide modern pluralist economics The fourth examines Post Keynesian and Kaleckian economics with a view to providing a more coherent and extensive branch of heterodox economics The final theme critiques the policy of neoliberalism that has entrenched itself in capitalist economies which have led to financial industrial labour and behavioural consumerist crises This text aims to provide a clear path for pluralism to serve the economics discipline as its standard bearer and to no longer be merely a heterodox challenge to the mainstream This book is of interest to those who study history of economic thought political economy and heterodox economics *Law, State and Society* Bob Fryer, Alan J. Together the essays show how crucial the potential is that exists for a considerable extension and integration of work that focuses explicitly on empirical problems yet is at the same time more conscious of the theoretical issues that underpin the effectivity of law Reflections on the Cliometrics Revolution John S. Amacher,2012 While this book was written for male Baby Boomers and their significant others it also includes Boomer history and what lies ahead as we experience the decade of our own sixties This story reviews our Boomer luck recounts the great history of being a kid in the 1950s and the great opportunities provided by improved education in the 1960s not to ignore a seemingly mind expanding culture Turning sixty is not for the faint hearted There are issues ahead The first thing we all face is taking care of aging parents or what the author refers to as helping your parents check out Then there are our own Boomer health issues including cataracts and prostate cancer You likely think there is nothing funny about these topics but the quirky economist author finds humor in all of our aging experiences This book covers Boomer issues all in the context of our Boomer culture We Boomers thought we would be young forever Maybe that is why it is so amusing
