**Man and Mouse** William D. M. Paton, 1993 This is a new edition of Sir William Paton's acclaimed defense of the use of animals in research. *Man and Mouse* is the only book to explain fully the role of animal experiments in medical and veterinary research. The updated text includes new material on toxicity tests, the link between innovation in the field of drugs and the scale of animal experimentation, the history of the escalating violence of the Animal Liberation Front and other groups, and an extended discussion of the ethical problems surrounding animal experimentation.

**Incunabula Printed in the Low Countries** Gerard van Thienen, John Goldfinch, 1999 *Incunabula of the Low Countries* ILC is a census of fifteenth-century books printed in the area of the present-day Netherlands and Belgium. It lists 2,229 editions in more than 14,300 copies preserved in hundreds of libraries, museums, and archives all over the world but mainly in Europe and the USA. The entries for this census have been derived from the *Incunabula Short Title Catalogue* (ISTC), the database of incunabula compiled at the British Library. They combine research on Low Countries incunabula carried out by Gerard van Thienen, curator at the Koninklijke Bibliotheek in The Hague, with data assembled by ISTC from other sources. ISTC entries were further edited, indexed, and prepared for publication by John Goldfinch at the British Library. Campbell's *Annales* of 1874, the first bibliography of incunabula printed in the Low Countries, with 1,794 entries, was followed by a number of supplements of increasing complexity, the most extensive being published by M. E. Kronenberg in 1956. All the former additions and emendations together with additions not otherwise listed before are now brought together and included in one sequence in ILC.
