Selgelid,2008-07-30 What Is the Dual Use Dilemma The so called dual use dilemma arises in the context of research in the biological and other sciences as a consequence of the fact that one and the same piece of sci tific research sometimes has the potential to be used for harm as well as for good A dual use dilemma is an ethical dilemma and an ethical dilemma for the researcher and for those who have the power or authority to assist or impede

the researcher's work e.g. governments. It is an ethical dilemma since it is about promoting good in the context of the potential for also causing harm e.g. the promotion of health in the context of providing the wherewithal for the killing of insects. It is an ethical dilemma for the researcher not because he or she is aiming at anything other than a good outcome; typically the researcher intends no harm but only good. Rather the dilemma arises for the researcher because of the potential actions of others. Malevolent non-researchers might steal dangerous biological agents produced by the researcher; alternatively other researchers or at least their governments or leadership might use the results of the original researcher's work for malevolent purposes. The malevolent purposes in question include bioterrorism, biowarfare and blackmail for financial gain. *Proliferation of Weapons of Mass Destruction*, 1993. [Books in Print Supplement](#), 2002. **Coming to Terms with Security** Steve Tulliu, Thomas Schmalberger, 2003. This glossary provides clear and precise definitions of arms control terms and places them in a historical context. It introduces the reader to the primary themes and concepts in the field of arms control and explains relevant terminology. The publication looks at the major arms control and disarmament agreements related to conventional biological, chemical and nuclear weapons. The information is presented in English and Spanish. *Technologies underlying weapons of mass destruction*, *Biological Threats and Terrorism*. Institute of Medicine, Board on Global Health, Forum on Emerging Infections, 2002-03-07. In the wake of September 11th and recent anthrax events, our nation's bioterrorism response capability has become an imminent priority for policymakers, researchers, public health officials, academia and the private sector. In a three-day workshop convened by the Institute of Medicine's Forum on Emerging Infections, experts from each of these communities came together to identify, clarify and prioritize the next steps that need to be taken in order to prepare and strengthen bioterrorism response capabilities. From the discussions, it became clear that of utmost urgency is the need to cast the issue of a response in an appropriate framework in order to attract the attention of Congress and the public in order to garner sufficient and sustainable support for such initiatives. No matter how the issue is cast, numerous workshop participants agreed that there are many gaps in the public health infrastructure and countermeasure capabilities that must be prioritized and addressed in order to assure a rapid and effective response to another bioterrorist attack. **Securing Development** Bernard Harborne, William Dorotinsky, Paul M. Bisca, 2017-03-01. *Securing Development: Public Finance and the Security Sector* highlights the role of public finance in the delivery of security and criminal justice services. This book offers a framework for analyzing public financial management, financial transparency and oversight as well as expenditure policy issues that determine how to most appropriately manage security and justice services. The interplay among security, justice and public finance is still a relatively unexplored area of development. Such a perspective can help security actors provide more professional, effective and efficient security and justice services for citizens while also strengthening systems for accountability. The book is the result of a project undertaken jointly by staff from the World Bank and the United Nations, integrating the disciplines where each institution holds a

comparative advantage and a core mandate The primary audience includes government officials bearing both security and financial responsibilities staff of international organizations working on public expenditure management and security sector issues academics and development practitioners working in an advisory capacity
