Maybecks Landscapes Drawing In Nature 1:

Maybeck's Landscapes Dianne Suzette Harris, Bernard R. Maybeck, 2004 While Maybeck's architectural career has been firmly established little writing has discussed and analyzed his ideas about landscape here taken to include his garden designs by which he integrated house and land as well as his grand landscape schemes for sites such as Twin Peaks in San Francisco Maybeck produced stunning and at times gigantic pastel drawings many of which are reproduced here in color

Landscape Theory Rachel DeLue, James Elkins, 2010-10-28 Artistic representations of landscape are studied widely in areas ranging from art history to geography to sociology yet there has been little consensus about how to understand the relationship between landscape and art This book brings together more than fifty scholars from these multiple disciplines to establish new ways of thinking about landscape in art **Landscape Architecture**, 2006 Hawaiian Modern Vladimir Ossipoff, Marc Treib, 2007-01-01 At the forefront of the postwar phenomenon known as tropical modernism Vladimir Ossipoff 1907-1998 won recognition as the master of Hawaiian architecture Although he practiced at a time of rapid growth and social change in Hawaii Ossipoff criticized large scale development and advocated environmentally sensitive designs developing a distinctive form of architecture appropriate to the lush topography light and microclimates of the Hawaiian islands This book is the first to focus on Ossipoff's career presenting significant new material on the architect and situating him within the tropical modernist movement and the cultural context of the Pacific region The authors discuss how Ossipoff synthesized Eastern and Western influences including Japanese building techniques and modern architectural principles In particular they demonstrate that he drew inspiration from the interplay of indoor and outdoor space as advocated by such architects as Frank Lloyd Wright applying these to the concerns and vernacular traditions of the tropics The result was a vibrant and glamorous architectural style captured vividly in archival images and new photography As the corporate projects and private residences that Ossipoff created for such clients as IBM Punahou School Linus Pauling Jr and Clare Boothe Luce surpass their fiftieth anniversaries critical assessment of these structures offered here by distinguished scholars in the field will illuminate Ossipoff's contribution to the universal challenge of making architecture that is delightfully particular to its place and durable over time *Jewel City* James A. essential role in the region's art. The inexhaustible ability of the land to stimulate different personal meanings is made clear in this volume and the effect yields a deeper understanding of how art can shape our lives in ways both spiritual and practical. how the landscape without constantly merges with the landscape within. Published in association with The Fine Arts Museums of San Francisco. The Donnell and Eckbo Gardens Marc Treib, 2005. For the first time a detailed look at two California gardens that were pivotal in defining mid 20th century landscape design in the United States. Thomas Church's 1948 Donnell garden in Sonoma, California and Garrett Eckbo's 1959 ALCOA Forecast garden in Los Angeles. Church's brilliant integration of indoor outdoor living and Eckbo's imaginative use of new materials like aluminum left nostalgia behind and created America's new backyard. Landscape Urbanism and Green Infrastructure Thomas Panagopoulos, 2019-08-19. This volume examines the applicability of landscape urbanism theory in contemporary landscape architecture practice by bringing together ecology and architecture in the built environment. Using participatory planning of green infrastructure and application of nature based solutions to address urban challenges, landscape urbanism seeks to reintroduce critical connections between natural and urban systems. In light of ongoing developments in landscape architecture, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. Nine contributions examine a wide range of successful cases of designing livable and resilient cities in different geographical contexts from the United States of America to Australia and Japan and through several European cities in Italy, Portugal, Estonia and Greece. While some chapters attempt to conceptualize the interconnections between cities and nature, others clearly have an empirical focus. Efforts such as the use of ornamental helophyte plants in bioretention ponds to reduce and treat stormwater runoff, the recovery of a poorly constructed urban waterway or participatory approaches for optimizing the location of green stormwater infrastructure and examining the environmental justice issue of equitable availability and accessibility to public open spaces make these innovations explicit. Thus, this volume contributes to the sustainable cities goal of the United Nations. *Marion Mahony Griffin* Debora

The updated Third Edition features expanded sections on circulation, light, views and site context along with new considerations of environmental factors, building codes and contemporary examples of form, space and order.
