McFarlands Journal A Journal Of The Coincidences And Acts Of Thomas S McFarland:

A Journal of the Coincidences and Acts of Thomas S. McFarland, Beginning with the First Day of January A.D. 1837, A.L. 5837 Thomas Stuart McFarland, 1981 A transcription of the handwritten diary of Thomas Stuart McFarland kept from 1837 1840 **Index** Newton County Historical Commission (Tex.), 1991* **Stirpes**, 2000 *Haunting Experiences* Diane Goldstein, Sylvia Grider, Jeannie Banks Thomas, 2007-09-15 Ghosts and other supernatural phenomena are widely represented throughout modern culture They can be found in any number of entertainment commercial and other contexts but popular media or commodified representations of ghosts can be quite different from the beliefs people hold about them based on tradition or direct experience Personal belief and cultural tradition on the one hand and popular and commercial representation on the other nevertheless continually feed each other They frequently share space in how people think about the supernatural In *Haunting Experiences* three well known folklorists seek to broaden the discussion of ghost lore by examining it from a variety of angles in various modern contexts Diane E Goldstein Sylvia Ann Grider and Jeannie Banks Thomas take ghosts seriously as they draw on contemporary scholarship that emphasizes both the basis of belief in experience rather than mere fantasy and the usefulness of ghost stories They look closely at the narrative role of such lore in matters such as socialization and gender And they unravel the complex mix of mass media commodification and popular culture that today puts old spirits into new contexts **The Blue Moment** Richard Williams, 2010 History **How the Body Shapes the Way We Think** Rolf Pfeifer, Josh Bongard, 2006-10-27 An exploration of embodied intelligence and its implications points toward a theory of intelligence in general with case studies of intelligent systems in ubiquitous computing business and management human memory and robotics How could the body influence our thinking when it seems obvious that the brain controls the body In *How the Body Shapes the Way We Think* Rolf Pfeifer and Josh Bongard demonstrate that thought is not independent of the body but is tightly constrained and at the same time enabled by it They argue that the kinds of thoughts we are capable of have their foundation in our embodiment in our morphology and the material properties of our bodies This crucial notion of embodiment underlies fundamental changes in the field of artificial intelligence over the past two decades and Pfeifer and Bongard use the basic methodology of artificial intelligence understanding by building to describe their insights If we understand how to design and build intelligent systems they reason we will better understand intelligence in general In accessible nontechnical language and using many examples they introduce the basic concepts by building on recent developments in robotics biology neuroscience and psychology to outline a possible theory of intelligence They illustrate applications of such a theory in ubiquitous computing business and management and the psychology of human memory Embodied intelligence as described by Pfeifer and Bongard has important implications for our understanding of both natural and artificial intelligence **Cognitive Perspectives on Emotion and Motivation** V. Hamilton, Gordon H. Bower, Nico H. Frijda, 1988-05-31 Proceedings of the NATO Advanced Research Workshop Il Ciocco Tuscany Italy June 21 27
