Early Childhood Assessment National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on Children,

Youth, and Families, Committee on Developmental Outcomes and Assessments for Young Children, 2008-12-21 The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. *Early Childhood Assessment* addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

Developmental and Educational Psychology for Teachers Dennis McInerney, David Putwain, 2016-09-13 *Developmental and Educational Psychology for Teachers* brings together a range of evidence drawn from psychology to answer a number of critical educational questions from basic questions of readiness for example when is a child ready for school through to more complex matters such as how does a teacher understand and promote good peer relationships in their classroom. The answers to these and other questions discussed draw here on the interplay between a teacher's craft expertise and their knowledge of evidence and theory from developmental and educational psychology. Presenting a range of classic theories and contemporary research to help readers understand what the key issues are for teachers and other professionals, this book aids informed educational decisions in situations such as inclusion, ability grouping, sex differences, developing creativity, home and peer influences on learning and developing effective learners. Teachers in early years, primary and secondary settings are routinely faced with questions regarding the development of children. This not only relates to the planning and delivery of lessons but also to the mental and physical wellbeing of the children and adolescents that they teach. The pedagogical features of this book are accessible and clearly presented, including focus questions that direct the reader's attention to key issues, activity posts that point the reader to meaningful and relevant research, and show the practical applications of material covered and extension material that gives depth to many of the topics covered. This book aims to inform the practice of both in-service and trainee teachers, addressing issues that are relevant to their practice. With no other detailed and accessible text presenting this evidence and theory specifically for an audience of practicing and trainee teachers currently on the market, this book will be of essential reading to practicing and trainee teachers for early years, primary and secondary education and other related educational contexts such as educational psychologists, counsellors, paediatric and child doctors and nurses.
