Speth, 2010-09-17 Since its inception paleoanthropology has been closely wedded to the idea that big game hunting by our hominin ancestors arose first and foremost as a means for acquiring energy and vital nutrients This assumption has rarely been questioned and seems intuitively obvious meat is a nutrient rich food with the ideal array of amino acids and big animals provide meat in large convenient packages Through new research the author of this volume provides a strong argument that the primary goals of big game hunting were actually social and political increasing hunter s prestige and standing and that the nutritional component was just an added bonus Through a comprehensive interdisciplinary research approach the author examines the historical and current perceptions of protein as an important nutrient source the biological impact of a high protein diet and the evidence of this in the archaeological record and provides a compelling reexamination of this long held conclusion This volume will be of interest to researchers in Archaeology Evolutionary Biology and Paleoanthropology particularly those studying diet and nutrition

Digital Roots Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07 As media environments and communication practices evolve over time so do theoretical concepts This book analyzes some of the most well known and fiercely discussed concepts of the digital age from a historical perspective showing how many of them have pre digital roots and how they have changed and still are constantly changing in the digital era Written by leading authors in media and communication studies the chapters historicize 16 concepts that have become central in the digital media

literature focusing on three main areas The first part Technologies and Connections historicises concepts like network media convergence multimedia interactivity and artificial intelligence The second one is related to Agency and Politics and explores global governance datafication fake news echo chambers digital media activism The last one Users and Practices is finally devoted to telepresence digital loneliness amateurism user generated content fandom and authenticity The book aims to shed light on how concepts emerge and are co shaped circulated used and reappropriated in different contexts It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue digital dichotomy is often a misleading one
